

RADCOM Diagnostic Tablet Series

Professional Portable Diagnostic Display

Overview

The RADCOM Diagnostic Tablet Series features the JUSHA CP620 6MP FDA-cleared diagnostic tablet, giving radiologists the freedom to make confident diagnostic decisions wherever they work. This lightweight medical-grade solution is ideal for travel, remote reading, emergency response, disaster recovery, and temporary reading environments. It offers a responsive touchscreen, dual Thunderbolt™ 4 (USB-C) connectivity, dual-screen viewing, automatic screen rotation, ambient light sensing, and exceptional DICOM-calibrated image quality.
