

Octane Environmental

Biogas / Renewable Energy (RE) – Rescue Specialist

Location: Harrison County, WV – Biogas / Renewable Energy (RE) sites

Industry: Biogas / Renewable Energy (RE)

Work Environment: Field-based; industrial and confined space environments

Experience Level: 2–3 Years Preferred

Reporting Structure: Reports to Biogas Division Director

Who We Are

At Octane Environmental, we exist to take on the toughest environments and deliver when it matters most. We bring relentless execution, uncompromising safety, and battle-tested solutions to biogas, oil & gas, industrial cleaning, and beyond. We don't cut corners. We don't back down. We build, contain, clean, and respond with discipline and grit — protecting people, safeguarding operations, and raising the standard in every field we enter.

We rise to pressure. We perform in the critical moments.

The Opportunity

At Octane, Rescue Specialists do more than respond — they prevent. This is a hands-on field role where you'll identify hazards, run site assessments, deliver safety training, and lead emergency response in industrial and confined space environments. You'll work within our Biogas / Renewable Energy (RE) division ensuring every site meets OSHA and ANSI standards — before anything goes wrong.

Prevention first. Response ready.

Core Responsibilities

- Conduct site assessments to identify hazards and implement preventative measures
- Respond to emergencies — industrial incidents and confined space operations
- Deliver safety training to Biogas / RE site personnel on best practices and prevention
- Administer first aid and emergency medical support during workplace incidents
- Lead or support safe evacuation from hazardous or restricted areas
- Operate, inspect, and maintain all specialized rescue equipment and vehicles
- Collaborate with Biogas / RE site safety teams and external emergency services
- Maintain accurate records of incidents, interventions, and safety audits
- Participate in ongoing training — advanced rescue and confined space techniques

What We're Looking For

- 2–3 years in rescue, industrial safety, or emergency response preferred
- CPR, First Aid, and confined space rescue certifications highly valued
- High school diploma required; rescue or safety certifications preferred
- Excellent physical fitness for challenging and hazardous environments
- Strong communication and teamwork skills — professional approach in the field
- Ability to remain calm and decisive in high-pressure situations
- Willingness to work flexible hours — nights, weekends, and on-call rotations

What Sets You Apart

- Track record of preventing incidents through proactive hazard identification
- Experience in confined space rescue with hands-on equipment operation
- Ability to lead calm, effective evacuations under high-pressure conditions
- Trusted by crews to make the right call when it matters most

Compensation

Competitive, based on experience, certifications, and field background. Opportunity to grow within Octane's Biogas and Renewable Energy (RE) division.

Benefits Octane Offers

- 401K
- Dental
- Vision
- Medical Insurance (Family)

Why Octane

We are not a sit-back company. We are building something in the Oil & Gas, Renewable Energy, and Industrial Cleaning space — and we're looking for people who want to be part of it.

If you're looking to just clock in — this isn't it.

If you want to build, lead, and grow — let's talk.
