

Octane Environmental

EC – Polyurea Spray Technician

Location: Harrison County, WV – Traveling to job sites across WV, OH, and PA

Industry: Oil & Gas Field Services, Environmental Containment

Work Environment: Field-Based, Outdoor, Physical

Experience Level: Open — Pay Based on Experience and Demonstrated Ability

Reporting Structure: Reports to the Environmental Containment and Renewable Energy Directors

Who We Are

At Octane Environmental, we exist to take on the toughest environments and deliver when it matters most. We bring relentless execution, uncompromising safety, and battle-tested solutions to biogas, oil & gas, industrial cleaning, and beyond. We don't cut corners. We don't back down. We build, contain, clean, and respond with discipline and grit — protecting people, safeguarding operations, and raising the standard in every field we enter.

We rise to pressure. We perform in the critical moments.

The Opportunity

This is a hands-on field role, not a desk job. We're looking for a Polyurea Spray Technician to help run and maintain several spray units, applying protective coatings and containment systems for our Environmental Containment customers.

This role is central to keeping our containment jobs moving — operating spray equipment, prepping surfaces, and delivering a clean, tight application every time, while keeping accurate records and following safety procedures on every job.

This Role Is a Strong Fit If You Have Experience With

- Plural-component spray equipment (Graco, PMC, or similar) or spray foam/coatings work
- Mechanical or industrial field work, and are comfortable learning specialized equipment
- Pulling trailers and setting up/tearing down equipment on job sites
- Working outdoors in changing field conditions on multi-day jobs
- Following strict safety protocols on active job sites
- Dependable and consistent — shows up ready and gets it done

Core Responsibilities

- Operate and maintain plural-component polyurea/polyurethane spray equipment across several spray units
- Prep surfaces (AST, PAD containment, Steel Wall systems, TUBES, and other field structures) ahead of coating application
- Apply spray coatings to spec — even thickness, full coverage, no gaps or thin spots
- Set up and break down spray trailers, hoses, heaters, and generators at each job site
- Perform daily equipment checks — proportioners, hoses, heaters — and handle basic troubleshooting and maintenance in the field
- Pull the spray trailer between job sites as needed
- Fill out work orders accurately and keep track of material usage on every job
- Follow all safety protocols — PPE, respiratory protection, confined space procedures. Safety is a big part of this role, not an afterthought
- Team player who works alongside the crew to keep jobs on schedule and communicate any issues back to your supervisor
- Travel to job sites as needed, including out-of-town work

What We're Looking For

- Prior spray foam/polyurea, coatings, or industrial field experience preferred
- Valid driver's license; CDL a plus, not required — but must be willing and able to pull a trailer
- Comfortable keeping accurate records — work orders and material usage — as part of the job
- Able to lift 50+ lbs, climb, and work in confined or elevated spaces as needed
- Ability to pass a background check and drug screen

What Sets You Apart

- Hands-on experience with plural-component spray rigs, or a strong mechanical background and the willingness to learn
- Safety-first mindset — you protect yourself, your crew, and the client's site
- Team player who shows up, pulls their weight, and communicates when something's not right
- Reliable and willing to travel with the crew when a job calls for it
- You don't wait to be told — you see the problem and fix it

Compensation

\$22–\$25/hr to start, based on experience and demonstrated ability. Room to grow beyond that range with performance.

Benefits Octane Offers

- 401K
- Dental
- Vision
- Medical Insurance (Family)

Why Octane

We are not a sit-back company. We are building something in the Oil & Gas, Renewable Energy, and Industrial Cleaning space — and we're looking for people who want to be part of it.

If you're looking to just clock in — this isn't it.

If you've built it, fixed it, and sprayed it — let's talk.
