

## Product Details - 3D Laminate Wood Table Tops

3D Laminate is a popular option for Indoor Tables with the variety of wood and solid surface designs that provide the same seamless edge. They are a fraction of the cost of solid wood or solid surface and hold up well in a restaurant setting.

3D Laminate Tables are made with a 1 ½” particleboard core. The laminate is a special vinyl-based material that is applied with heat and pressure forming over the entire table and edge that hardens when cooled down. The end result is a seamless table that is extremely durable.

### Quick Facts:

**Seamless** - Eliminates contamination, warped seams, delamination

**Durable** - Vinyl based laminate reduces warping, cracking and splitting

**Cost Effective** - Economical pricing

***Standard Lead Time - 3 - 4 Weeks, Expedited Lead Time Available***
