

Product Details - 3D Laminate Table Tops

3D Laminate is a popular option for Indoor Tables with the variety of wood and solid surface designs that provide the same seamless edge. They are a fraction of the cost of solid wood or surface and hold up well in a restaurant setting.

3D Laminate Tables are made with a 1 1/8" particleboard core. The laminate is a special vinyl-based material that is applied with heat and pressure forming over the entire table and edge that hardens when cooled down. The end result is a seamless table that is extremely durable.

Quick Facts:

Seamless - Eliminates contamination, warped seams, delamination

Durable - Vinyl based laminate reduces warping, cracking and splitting

Cost Effective - Economical pricing

Standard Lead Time - 3 - 4 Weeks, Expedited Lead Time Available

3D Laminate Table Tops are suitable for INDOOR
