ABOUT YSEN

An initiative founded by volunteers in 2023, the Young Space Exec Network (YSEN) is a group of professionals working in the space and satcom industry at executive level or higher, who are under forty years old. YSEN was created to help introduce the next generation of space and satcom leaders to one another.

We often facilitate casual meet-ups in line with industry events and stay connected in-between via WhatsApp chat. Connecting like-minded people is the sole purpose.

OUR MEMBERS

YSEN consists of 90+ professionals employed at varied companies within the space and satcom industry, from innovative start-ups to legacy organisations. Some members are new to the industry whilst others have been immersed for more than 10-15 years. Just to name a few, our members are employed at:

MENTORSHIP & EVENTS

Our industry is made up of highly experienced people who've significantly contributed to its growth and development, and who better to learn from than those who paved the way for the next generation of execs to succeed?

We're seeking senior executives to volunteer as **informal mentors** for our members, matched by roles or skills to ensure value is gained from somebody with a similar background or position they aspire to achieve.

Corporate collaboration for networking events or speaking opportunities is also available. Either part of an existing event or a standalone occasion, where current and prospective YSEN members are encouraged to meet and learn from each other.
