

Plants That Attract Birds

Cool Tip:

To keep birds happy in your garden, provide a living smorgasbord by using plants that provide berries, seeds, and foliage. A water source, such as a bird bath, will provide drinking water for them as well as a delightful place to bathe. Be sure to freshen the water often.

Shrubs

Barberry
Beautyberry
Buffaloberry*
Cotoneaster*
Currant*
Elderberry
Euonymus
Holly
Manzanita*
Oregon Grape Holly*
Photinia
Privet
Pyracantha
Rose
Saltbush (atriplex)*
Service Berry*
Snowball Bush
Snowberry
Sumac

Trees

Arborvitae*

Magnolia
Maple*
Mountain Ash
Mulberry - Fruiting
Oak*
Pine
Redbud
Russian Olive
Spruce
Sumac*
Sweet Gum

Perennials

Blackeyed Susan*
Columbine*
Coneflower*
Coreopsis*
Cornflower
Foxglove
Gaillardia*
Goldenrod
Scabiosa

Annuals

Annual Coreopsis*
Calendula
Common Sunflower
Cosmos
Love-in-a-mist
Marigold
Mexican Sunflower
Sweet Alyssum
Zinnia

*Low water use once established

More Cool Tips:

- Plant a selection of small trees, low to medium high shrubs and ornamental grasses. They will provide food, shelter, and nesting sites for birds, as well as help protect them from predators.
- Instead of deadheading flowers and grasses in the fall, leave the dried seeds on for winter. Many times they are the first thing to poke their heads up in the snow providing food for cold birds. The birds will feed on the seeds all winter and use the rest of the plant for nesting materials in the spring.
