Strategy

Our

Increase investment into the livestock sector and sustainable agricultural solutions in Africa.

Ol Right messaging

O2 Actionable science

O3 Effective collaboration

Make the investment attractive to potential stakeholders

Build **economic and climate case** for livestock

Showcase **innovative solutions** and practices

Produce **targeted research** based on specific needs

Facilitate **effective data** and case-study sharing

Create **practical guides** for decision makers

Partner with business sector to make market-case for livestock

Join forces with **unusual voices** in the food systems activism

Ensure **coherent coalition messaging** and campaigning

Narrative change

Increased investment

Effective policies

Cross-sector collaboration

Goals

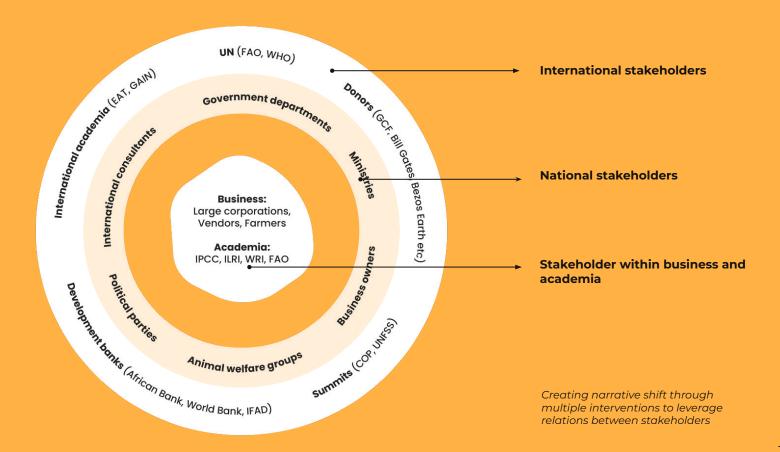

Actions

Results

Objectives

- 1. Make the investment attractive to key stakeholders.
- 2. Elevate voices of the community, farmers and local businesses.
- 3. Develop new partnerships.

Audiences

People outside the livestock community.

Use simple familiar language and relatable examples.

Draw attention first with a catchy message, explain nuance after.

Listen to what others have to say, have conversations.

Timeline

short-term

COP28 kick off

long-term

2-year activation

Strategy

There is a lot of conflicting messages and data around livestock and climate. Even if investors were sold on funding the sector in Africa, they wouldn't know where to begin.

To make investment *attractive* for funders, donors and governments – means to make it **easy, straightforward** and **focused on outcomes.**

To achieve that we need to focus on <u>proven solutions</u>, <u>outline clear opportunities</u> and <u>shape surrounding narrative</u>, where sustainable livestock production is portrayed as an opportunity and solution to climate challenges.

We need to make a statement for the sector that will engage voices beyond ILRI research community.

/ Narrative

<u>Food systems are in crisis</u> – climate change will have profound effects on all aspects of agriculture, farming and livestock raising from heat stress, extreme weather and changes in agro-ecologies.

Sustainable livestock offers solutions to this.

<u>Small-scale livestock farmers and pastoralists</u> are among those most affected by climate change, yet they are the ones who already <u>provide answers to adaptation</u>. They can help make the sector resilient to climate shocks if equipped with the right knowledge, tools and financial support. That is why, we must <u>accelerate investment</u> into nature-based solutions and steamline access to support funding within the sector.

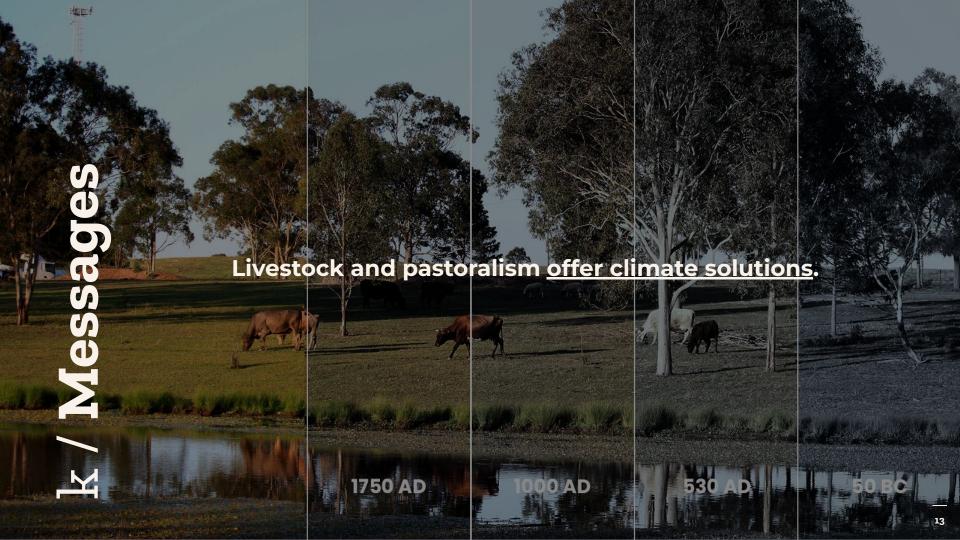

<u>Strategic and long-term investment</u> in the sector can help cut emissions, transition to more sustainable practices, facilitate scientific and technological innovation while resolving malnutrition, preventing zoonotic diseases and supporting economic growth.

Messages

Long-legacy: Livestock is one of the oldest food systems that offers unique nature-based solutions to adaptation and mitigation.

<u>People-powered change:</u> Farmers, pastoralists and entrepreneurs play a crucial role in reshaping the livestock sector for a more sustainable future.

<u>Practical evidence:</u> We need to focus on practical evidence that shows sustainability pathways for the industry.

COP28 campaign

An idea, plan, or **solution 'has legs'** when it is likely to continue or **succeed long-term.**

So does livestock.

Our playful 'Solutions with legs' campaign is here to draw attention to multiple environmental, economic and community benefits livestock has to offer to low and middle income countries.

We know where we're going, let's let livestock take us there.

If recognised, supported and properly funded by the international community, the livestock sector can be turned from being a climate-outcast to **being at the forefront of climate mitigation and adaptation.**

This campaign aims to put arguments aside and look at evidence. It shows investors and policymakers **small steps that can be taken now** to transform our food systems and our future.

It <u>tells the story of animals and humans</u>, the story of farmers and scientists, the story of policymakers and businesses. It has direction, it has energy, it has legs.

Focusing on practical solutions and actionable long-term success

Solutions with legs

Take a step in the right direction

Leading the way

Inspiring action

High-level messages

General

- Take a step in the right direction, invest in sustainable livestock.
- Invest in long-term solutions, invest in livestock.
- We need long-term and holistic thinking from policymakers and funders. This includes investment in livestock sector in Africa.

Economy and investment

- Invest in livestock, invest in innovation / climate / community / health / prosperity.
- Africa's livestock sector offers best returns for climate, communities and livelihoods.
- Economic growth doesn't need to happen at the expense of climate. Livestock can be a solution for both.

Food systems transformation

- Livestock has been around for millennia, invest in food systems that stood the test of time.
- Livestock is a solution to food security and better health.
- We can't fix one problem but creating a new one. Livestock is a key to tackling malnutrition globally.

Climate change

- Small changes in livestock practices can have huge environmental benefits.
- Sustainable livestock offers practical solutions to mitigation and adaptation.
- Farmers in Africa are on the frontline of climate crisis. Invest in solutions that stand a chance.

User activation (7 day challenge)

Harvesting Local Voices #solutionswithlegs

Objective: to amplify voices of the community - farmers, scientists, entrepreneurs – at COP28. And to show that livestock community holds solutions to climate challenges.

Audience: farmers, businesses, scientists, policy experts driving positive change in the agricultural sector with medium/large social media following.

Call to action: share your sustainable practices with policymakers to help us make the case for livestock at COP28

Hashtag: #mysolutiontforclimate.

Content: user-generated short form videos.

Duration: 7 days.

Channels: Instagram, Twitter and Tik Tok.

action Call to

Public CTA:

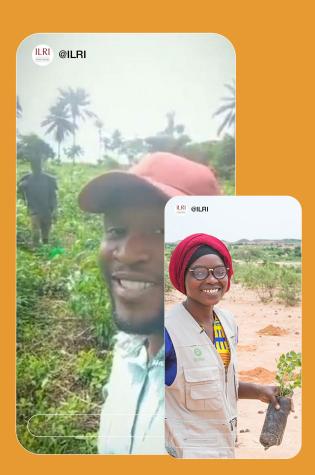

Are you a farmer, scientist or entrepreneur working in agriculture? We're inviting you to join our campaign #solutionswithlegs to bring innovative livestock solutions to policymakers at COP28.

Share your practices and ideas for more sustainable farming and we'll get your message across. Whether it's innovative practices, community collaborations or policy insights or changes, your story matters. Use #whylifestockmatters #harvestvoices #solutionswithlegs and tag us @ILRI to inspire change one story at a time.

Direct Message:

Hey [Name]. I am [Name] from ILRI. As we gear up for COP28, a crucial event focusing on global environmental challenges, we're reaching out to our community for their expertise and recommendations. We will celebrate [Farmers/ Scientists / Businesses] on [Add date] and would love to inviting you to join our campaign to help make a case for livestock for funders and policymakers.

We've only got one question: What transformative step or practice do you believe holds the key to a greener future in agriculture? Share your thoughts with us as a post or video story on the [Add date] by tagging us @ILRI and using #solutionswithlegs #mysolutiontforclimate. Your perspective will contribute to a larger conversation during COP28 about building a sustainable and resilient agricultural future. Thanks for being a part of it and please let us know if you have any questions!

What we're looking for?

- 15-30 second vertical videos
- Short-form posts with images
- Filmed using selfie mode or written in the first person
- Sharing one idea per one post
- And telling a good story (e.g. farmers showing around the farm or attending to animals, scientists in the lab)
- Educational or entertaining format
- Imagery from farms and behind-the-scenes
- Diversity of voices and people
- Production quality doesn't matter

How to reach out to community with your call to action:

- 1. First, create a list of potential people and influencers who might be interested to participate in the campaign and/or who already have similar content on their channels.
- 2. Share your CTA across your social media channels to announce the campaign.
- 3. Reach out to the coalition to share your message.
- 4. Share CTA on community forums or groups and engage with them if they have questions.
- 5. Next, send direct messages and emails to people you shortlisted at the very beginning. Make sure you personalise your CTA.
- 6. Make sure you follow-up if you don't hear back from them, it is totally normal.
- 7. And finally, watch out for tags, messages and content shared, please re-share and comment to acknowledge their contribution.
- 8. Cross-post shared solutions across social channels and create threads for ideas on a similar topic. Make sure you regularly check your channels as stories disappear after 24 hours.
- 9. Reach out to participants to ask if you can archive their footage.

Day 1: Awakening Earth's Advocates

Today kicks off a powerful journey here at COP28 as we strive to boost awareness and investment in the livestock sector and sustainable agriculture solutions across Africa.

Here's the deal: we want to hear YOUR voice! Share a video or post telling us why sustainable agriculture fires you up. Let's ignite a conversation that resonates beyond these halls. Don't forget to use our hashtags: #whylifestockmatters #mysolutiontforclimate #solutionswithlegs and tag us @ILRI

Together, let's set COP28 ablaze for a sustainable future! 🔥 🎉

Day 2: **Farmer Trailblazers**

Today, we pay tribute to the backbone of our communities—our farmers. Share stories of those breaking ground in sustainable farming. By spotlighting their efforts we not only celebrate their hard work but also elevate their crucial role in building a resilient and sustainable agricultural future.

🌱 Join us in giving our farmers the recognition they deserve. Share a post or video about a farmer you know who's breaking ground in sustainable farming. Tag them and use #mysolutiontforclimate #solutionswithlegs and tag us @ILRI 🚜 🖔

Suggested posts:

Day 3: Climate Resilience Odyssey 👺

Today's theme is resilience — a journey into climate-smart solutions. We're looking to hear from scientists and researchers who work to solve challenges of climate change with new innovative solutions. Share your thoughts with us using #mysolutiontforclimate #solutionswithlegs and tag us @ILRI

Let's weave a tapestry of strategies and solutions that stand strong in the face of climate challenges.

Day 4: Business Eco Warriors

Many enterprises are already shaping a greener tomorrow.

If your business is a pioneer in sustainable agriculture, share your impact with #mysolutiontforclimate #solutionswithlegs and tag us @ILRI

Businesses play a crucial role in steering our agricultural practices toward a more sustainable future. We want to hear your story

Schedule

Draft

Suggested posts:

Day 5: Community Fusion &

Today, we celebrate the interconnected tapestry of agricultural communities.

Tag a friend, a family member, or a colleague who's part of your community. Your shared stories with #mysolutiontforclimate #solutionswithlegs and tagging us @ILRI will not only strengthen our bonds but emphasize the power of community collaboration in advancing sustainable agriculture. Let's tell the world about the unity within our agricultural landscapes.

Day 6: Policy Champions 🏴

Today, we're diving into the realm of policies that shape our sustainable livestock. We're looking for insights on policy action. Share your thoughts using #mysolutiontforclimate #solutionswithlegs and tagging us @ILRI

It's not about complex jargon; it's about your honest take on what policies we need for a sustainable livestock future. \checkmark

Day 7: Future Livestock Visionaries 🌱

A huge thank you to everyone who shared their inspiring visions for sustainable farming and livestock during COP28!

** Today, we're thrilled to showcase some highlights from the incredible content we've received throughout the week. From breakthrough practices to aspirations, these are just a glimpse of the amazing content we've received.

Let's continue this momentum! Your dedication to sustainable farming and food practices is making a real impact. Together, we are shaping a future where agriculture thrives in harmony with our planet. **Y** #mysolutiontforclimate #solutionswithlegs #COP28

Long-form (ideas)

Produce inhouse **short articles on livestock solutions** to climate change (expert commentary, opinion, farmers stories). For example:

- 10 Solutions to Climate Change
- Advice from Farmers to Policymakers

Pitch your pieces or <u>partner with Western</u> <u>financial media</u> to produce content around the benefits of investment in livestock. For example:

- Bloomberg
- Financial Times

Produce <u>exciting educational video & audio</u> content that people would be interested to watch. This can include:

- Short explainers with on a provocative topic (under 15 min)
- Live discussions with experts

Partner up with bloggers and influencers

who can help you generate interesting content. For example:

- A walk around a sustainable farm in Kenya
- Live reporting from COP28
