

# DJ Moni

Monica Sri Lestarinie or as her fans know her, DJ Moni, is a Canadian DJ and music producer who was born in Surabaya, Indonesia. DJ Moni is very skilled at her profession and it comes with little surprise since music is ingrained in her DNA with her mother being a singer and her father being a music teacher and a composer for T.V./Radio. With influences from Diplo, Armin Van Buuren, DJ Snake, Timbaland and Fat Joe, as well as pulling from her influences from the places she's lived such as Indonesia, France, United States and even Canada, it's easy to tell that she was made for this career. She is not only cultured because of the places she has lived around the globe but because she has such a vast taste in music that expands through almost every genre; guaranteeing she'll fit any occasion. To further solidify that she was destined to be a DJ, Monica has awards to boast her experienced skill set such as Top 5 Music Producer Award and the Midi College Award from Audio Recording Technology School in Houston, Texas. Her hard work, experience, communication skills, and punctuality for events drastically sets her a part from the average run of the mill DJ that most people wind up booking. If you want to take your event to the next level, eliminate the stress of finding a DJ, make sure your people have a memorable experience and just have good music/good vibes for your whole party, you can't go wrong with booking DJ Moni! You will absolutely love working with her from start to finish!
