

Orientation Information

What to Expect

- The first couple classes, your dog may be distracted and/or excited. Be patient and your dog will adjust to the new schedule before you know it.
- Training is a commitment. When it comes to practicing with your dog, you'll need to set aside time with your dog each day to review and advance your new skills. Not practicing means you will fall behind and none of those new skills will become habits.
- Ask questions.
- Have fun!
