

MACHINE INTELLIGENCE

Wondering if that expensive extruder is pulling its weight or maybe your compressor is running too hard? Wouldn't it be valuable to know how much compressed air or natural gas is being consumed? With a quick and easy installation of the Eyedro machine & utility monitoring system you have that instant visibility into your consumption, energy & costs.

No more guessing at a Preventive Maintenance Schedule by providing staff with run-time and ranking reports. By automating your workflow your operation will enjoy the uptime needed in this ever-changing global economy. Advanced Alert and Events will identify small problems before they become expansive losses.
