How we collect student information

We also use registrations forms which are entered into the CPOMs system which is a requirement for contact, health and attendance requirements. This is updated when the annual data collection forms are sent out for parents and carers to update them.

Student data is essential for the provision's operational use. Whilst the majority of student information you provide to us is mandatory, some of it requested on a voluntary basis. In order to comply with the data protection legislation, we will inform you at the point of collection, whether you are required to provide certain student information to us or if you have a choice in this.

We do not share information about our students with anyone without consent unless the law and our policies allow us to do so.

Department for Education

The Department for Education (DfE) collects personal data from educational settings and local authorities via various statutory data collections. We are required to share information about our pupils with the Department for Education (DfE) either directly or via our local authority for the purpose of those data collections, under:

- section 3 of The Education (Information About Individual Pupils) (England) Regulations 2013.

All data is transferred securely and held by DfE under a combination of software and hardware controls, which meet the current government security policy framework.

For more information, please see '**How Government uses your data**' section.

8. How Government uses your data

The student data that we lawfully share with the DfE through data collections:

- underpins student funding, which is calculated based upon the numbers of children and their characteristics in each school.
- informs 'short term' education policy monitoring and provision accountability and intervention
- supports 'longer term' research and monitoring of educational policy

8.1 Data collection requirements

To find out more about the data collection requirements placed on us by the Department for Education (for example; via the school census) go to <https://www.gov.uk/education/data-collection-and-censuses-for-schools>

8.2 The National Computer Database (NPD)

The NPD is owned and managed by the Department for Education and contains information about pupils in schools in England. It provides invaluable evidence on educational performance to inform independent research, as well as studies commissioned by the Department. It is held in electronic format for statistical purposes. This information is securely collected from a range of sources including schools, local authorities and awarding bodies.

We are required by law, to provide information about our pupils to the DfE as part of statutory data collections such as the school census and early years' census. Some of this information is then stored in the NPD. The law that allows this is the Education (Information About Individual Pupils) (England) Regulations 2013.

To find out more about the NPD, go to <https://www.gov.uk/government/publications/nationalpupil-database-user-guide-and-supporting-information>

The department may share information about our pupils from the NPD with third parties who promote the education or well-being of children in England by:

- conducting research or analysis
- producing statistics
- providing information, advice or guidance

The Department has robust processes in place to ensure the confidentiality of our data is maintained and there are stringent controls in place regarding access and use of the data. Decisions on whether DfE releases data to third parties are subject to a strict approval process and based on a detailed assessment of:

- who is requesting the data
- the purpose for which it is required
- the level and sensitivity of data requested: and
- the arrangements in place to store and handle the data

To be granted access to pupil information, organisations must comply with strict terms and conditions covering the confidentiality and handling of the data, security arrangements and retention and use of the data.

8.3 Sharing by the Department

The law allows the Department to share students' personal data with certain third parties, including:

- Schools
- Local Authorities
- Researchers
- Organisations connected with promoting the education or wellbeing of children in England
- Other Government Departments or Agencies
- Organisations fighting or identifying crime

For more information about the Department's NPD data sharing process, please visit

<https://www.gov.uk/data-protection-how-we-collect-and-share-research-data>

Organisations fighting or identifying crime may use their legal powers to contact DfE to request access to individual level information relevant to detecting that crime. Whilst numbers fluctuate slightly over time, DfE typically supplies data on around 600 students per year to the Home Office and roughly 1 per year to the Police.

For information about which organisations the Department has provided student information, (and for which project) or to access a monthly breakdown of data share volumes with Home Office and the Police please visit the following website:

9. GDPR and Artificial Intelligence (AI)

The implications AI has for children's privacy, safety and security fall across a wide spectrum, from benefits related to the ability to understand threats facing children with greater specificity and accuracy than ever before (and respond accordingly), to risks around unintended privacy infringements. The positive and negative implications for children's privacy, safety, and security in an AI age are constantly changing as technology and understanding develops. As a school, we do not utilise AI, and AI is not included in our curriculum. For further details on AI and the risks to children and young people, please see our School Safeguarding and Child Protection Policy.

10. Requesting access to your personal data

Under data protection legislation, parents and pupils have the right to request access to information about them that we hold.

You also have the right to:

- object to processing of personal data that is likely to cause, or is causing, damage or distress
- prevent processing for the purpose of direct marketing
- object to decisions being taken by automated means

- in certain circumstances, have inaccurate personal data rectified, blocked, erased or destroyed; and
- a right to seek redress, either through the ICO, or through the courts

*For more information, please also see '**Data Subject Access Request**' section below.

11. Data Subject Access Request

As defined by Article 15 of the UK General Data Protection Regulation (UK GDPR), and as modified by the Data Protection Act 2018, you may make a Data Subject Access Request (DSAR) on behalf of your child.

For your information and understanding, however, whilst a young person under 18 years old can be classified as a child, in law their personal data still relates to and belongs to them.

Our students are all Gillick Competent and are mature enough to understand their rights in relation to their own Personal Data, therefore, we will only act under the instruction of the Data Subject in relation to exercising the right of access to their personal data. However, if authorisation is, in fact, provided by the Data Subject, we must still be satisfied that performing the DSAR is in the best interests of the Data Subject.

If we are not satisfied that a DSAR is in the interest of the Data Subject, the request will be refused.

If you have a concern or complaint about the way we are collecting or using your personal data, you should raise your concern with us in the first instance or directly to the Information Commissioner's Office at <https://ico.org.uk/concerns/>
