

Nitrile Gloves

Features

- 100% without natural latex, synthesized from durable puncture resistance nitrile rubber ,prevent allergic reactions
- With super elastic and super soft feel and excellent tensile rate and wear resistance, suitable for medical staff
- Good chemical protection, anti-acid, alkali and grease, can be used for chemotherapeutic drug touching and protection
- The fingertip features increase friction and are suitable for holding medical devices
- More elasticity than vinyl resulting in a snug fit
- All components are FDA approved for food content
