OPPORTUNITIES—
UGANDA

Where's UGANDA?

- Uganda is on the Equator and one of most densely populated countries in Africa with a population of 45 million, most of which make a living by farming or selling items at the market. Only 25% of the people live in urban areas.
- The official languages of Uganda are English and Swahili, while Luganda, is spoken widely too.
- It borders five countries (Kenya, South Sudan, the Democratic Republic of the Congo (DRC), Rwanda and Tanzania) and is one of the poorest/most corrupt in Africa.
- Uganda has the world's youngest population!

Rich Natural Resources with pervasive poverty

- Economy of Uganda: great potential & could have rapid economic growth. Is endowed with significant natural resources: ample fertile land, regular rainfall, and mineral deposits.
- Challenges: Chronic political instability and erratic economic management since the implementation of self-rule has unfortunately produced a record of persistent economic decline that has left Uganda among the world's poorest and least-developed countries. The informal economy is predominantly female.

Agriculture-based Economy

- Agriculture is one of the most important sectors of Ugandan economy, employing 72% of the work force.
- Uganda has very rich ground and can have up to 4 harvest seasons instead of 2 in one year with water pumps.
- Uganda is 90th poorest country in world, out of 195 (less than \$110/mo average income).
- Almost 22% of the country is below the poverty line.
- Low level of education--parents must pay for a child to attend school (This means that a 14 year old boy or girl could be attending 2nd grade due to lack of funds).

Long-Term Sustainability

Giving key leaders and pastors essential tools & training to be self-sufficient for years include:

- Bibles & Biblical Training for:
 - Supernatural healing
 - Financial Godly principles
 - Relationship principles
- Business training and start-up capital
- Strategic mentorship
- Communication equipment & regular reports
- Establishing systems:
 - Family unit to village level
 - Businesses & training for growth and expansion
 - Continued impact for the larger community

Progression of Brian's Projects in 2022

Started K-5 school with 6 teachers for 118 kids (7 orphans, 15 from single-parent families, most others with absent father), providing them one good meal/day. Built all structures, and for sustainability, sowed land for corn, bought a motorcycle for transport, is raising pigs and chickens, all of which are already helping reduce operating costs.

Brian's Projects' Direction for 2023:

Building an additional 4 rooms for Kindergartners and fence, Hiring 4 additional teachers, Passing inspection for school licensing, Sustainable food sources, & funding for daily school operations given the poverty of families (less than 10% of budget currently provided).

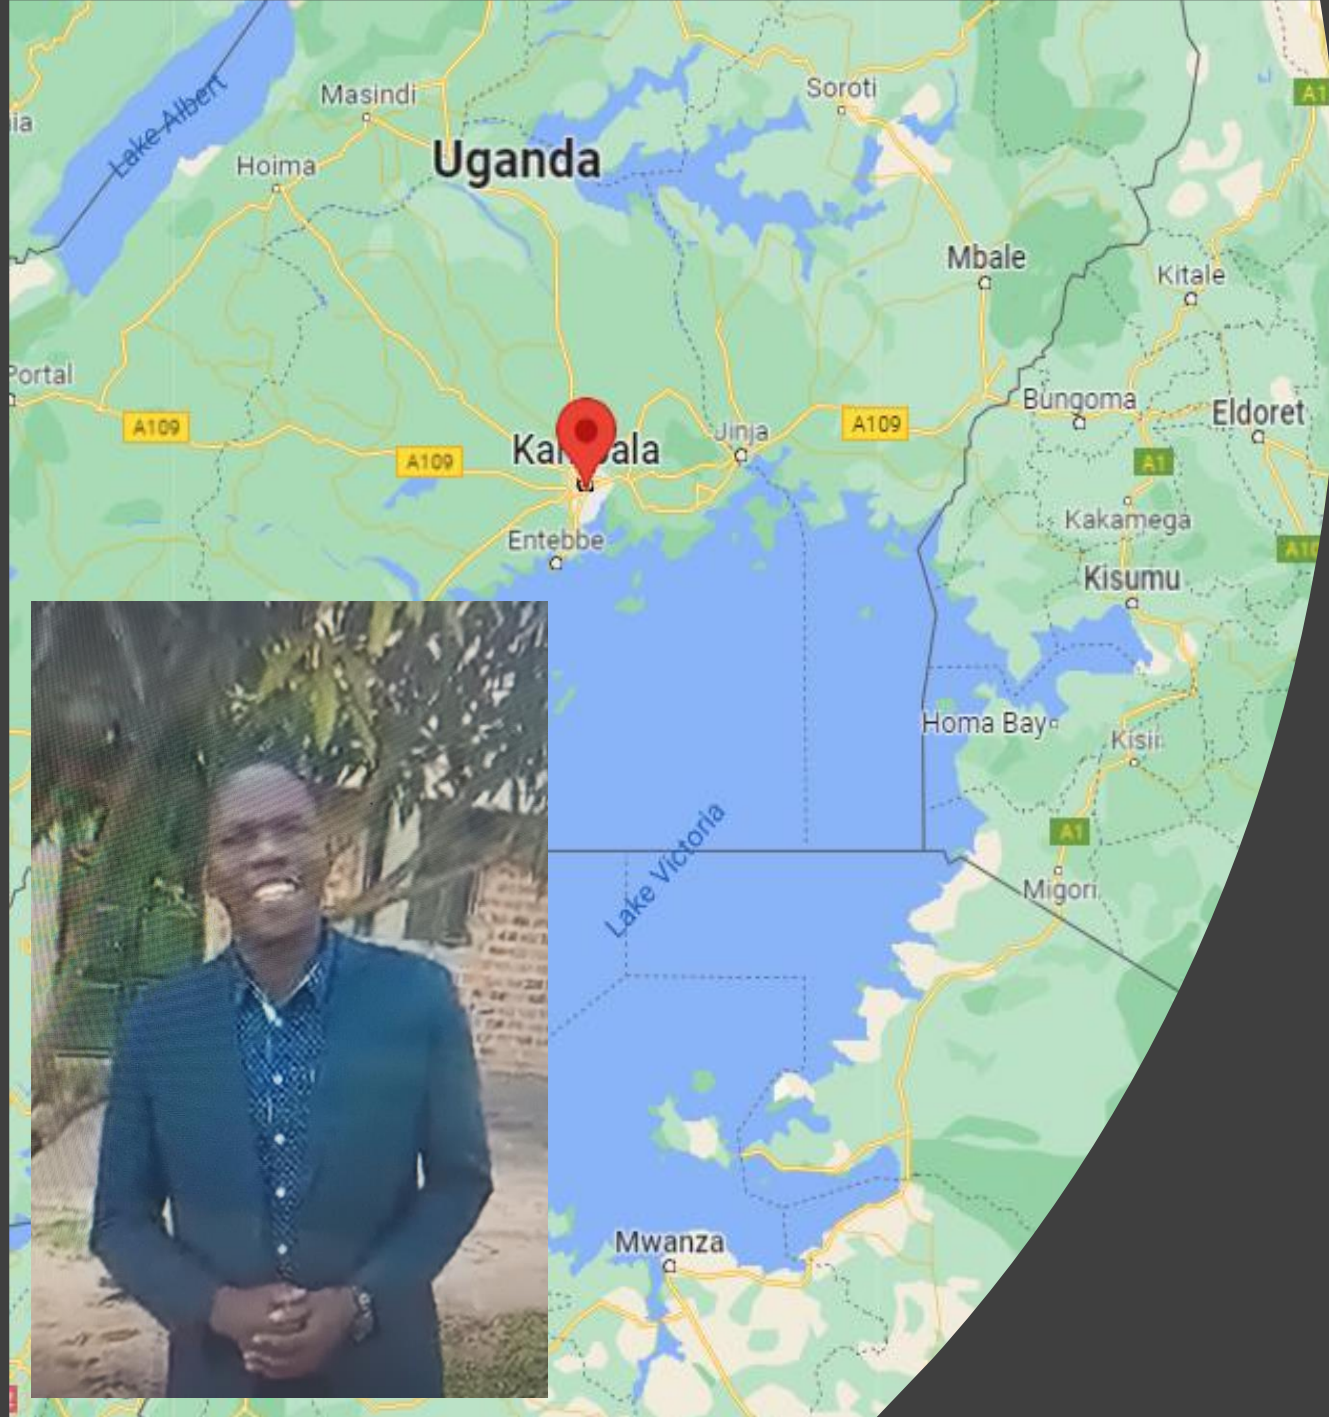

Brian Bbosa's Dominion Life Junior School

Details:

- 118 students
- 63 paying minimal fee of \$28/term
- 55 cannot pay anything
- Working with parents to pay something by helping with crops and land work
- Crops/Piggery beginning to contribute to budget

Projects: **\$22,050**

- Construction of 4 classrooms: \$8200
- Completion of 3 other classrooms, furniture and area fencing: \$6150
- Building housing for teachers: \$1500
- Cost of 4 more teachers for year: \$2800
- Basic playground Items: \$1400
- Purchase land with road access: \$2,000
- Yearly cost for scholastic materials and food for 118 students and staff: \$1800

**Pastor Neckson and their team projects:
teaching 384 kids at the school, using a
motorbike to coordinate 80 remote
churches and their pastors for
events, training and funding 100 women in
business with more to come!**

Neckson & Deborah Muhindo in Kasese - 3 Projects

1) School named “Childcare Center” for 384 Kids' Needs: \$14,650

- Desk: \$1800
- Toilets: \$1100
- Library/books (kids have nothing of their own): \$1700
