Integrated Manual Therapy

Duration: 3 days
CPD Hours: 22.5
Format: Face to Face
Fee: £375+VAT

Dr Christopher Norris

Overview:

The Integrated Manual Therapy course is a three-day course giving an in-depth practical knowledge of modern manual therapy techniques.

Drawing on over 35 years of clinical practice, Dr Christopher Norris has produced a detailed course which distils manual therapy into its most clinically effective techniques. Combining work by Cyriax, Maitland, McKenzie and Mulligan, the Integrated Manual Therapy (IMT) course cuts through the traditional dogma which pervades much of manual therapy teaching. In three days you will learn effective techniques for the lower limb, upper limb, and spine giving you confidence to begin treating from day one.
