Explain Pain Online - Night School

Duration: 6 sessions

CPD Hours: 14

Format: Online

Fee: £385

Dr. Ben Davies PhD MSc MCSP, UK

An experienced Noigroup instructor in the UK, Ben has taught Explain Pain (EP), Mobilisation of the Neuroimmune System (MONIS) and Graded Motor Imagery (GMI) courses in the UK and Europe since 2008. His background as a physiotherapist involves primary, secondary and tertiary care settings. The majority of Ben's experience is with people who have complex, persistent pain presentations. Ben's PhD at the University of the West of England was in painful diabetic neuropathy, exploring whether this group of people could benefit from the pain management approaches which are relatively common in the MSK pain world, but not in the diabetic world. Currently Ben is an advanced practice physiotherapist in rheumatology at the Royal United Hospital, Bath. This role includes managing and delivering a rehabilitation program for Axial Spondyloarthritis, one of only three such

Key Learning Outcomes:

By the end of this course participants will have:

- Reconceptualised pain and stress based on neuroimmunology, modern pain sciences and bioplasticity of homeostatic systems
- Constructed a conceptual change framework to deliver individual and group educational therapy
- Gained an understanding of the growing evidence for Explain Pain and recognise opportunities to integrate Explain Pain with other biopsychosocial evidence based strategies.
- Gathered a collection of therapeutic narratives using metaphor, literal story and linked multimedia, and the skills to construct patient centred education interventions in real time
- Developed the skills to use the Protectometer to identify immediately applicable and educationally informed multimodal treatment strategies
- Built the confidence to plan and deliver treatment for all patients with persistent pain and stress, and educate other stakeholders

Explain Pain Online - Night School

Overview:

In a world experiencing an epidemic of chronic pain and increasing evidence of the failure of synthetic drugs, simple but extremely powerful educational tools can effectively target the natural pain treatment systems within us all.

Knowledge is power. In the new series of Explain Pain courses delivered by NOI instructors around the world, contemporary pain sciences are made accessible and understandable for all.

We know more about pain in the last twenty years than in the thousand years before and it's all providing answers to "why do I hurt the way I do" and "what can I do about it". The knowledge is applicable to young and old, from back pain to hemiplegia and general aching to the complexities of phantom pain and complex regional pain syndrome.

Explain Pain works to reduce catastrophisation and negative pain beliefs and when combined with active treatment, reduces pain and enhances return to work and play. Explain Pain has no side effects, is available around the clock, and you can share the knowledge and strategies with others.

Don't miss this opportunity. NOI Explain Pain courses are fun, intellectually stimulating, based on evidence, always challenging, and integrate the Explain Pain ecosystem of Explain Pain, The Explain Pain Handbook: Protectometer, and Explain Pain Supercharged. You will come away with the most impressive therapeutic tool set ever!

Session 6:

Pre-Requisites

A strength of the Explain Pain course is that participants come from many professions, so come with an open mind.

Pre-reading:

The Explain Pain Second Edition eBook | Print Book

Other related reading: Moseley GL & Butler DS (2015) Fifteen years of Explaining Pain: the past, the present and future, J Pain 16, 803-13.

This course is open to:

Health professionals working with patients or clients in acute and chronic pain and stress states.
