

NUPRESS FACADES

ABOUT US

**Engineered with passion, designed with excellence,
delivered with integrity.**

At Nupress Facades we deliver innovative structural glass facade systems. Our sole focus is to provide our clients with solutions for all their structural glass needs. We are a team of designers, engineers & project managers, all passionate about delivering expertly engineered & innovative solutions for every project. We are dedicated to the Nupress process, turning clients into partners which ultimately lead to strong relationships with impressive projects such as NFL stadiums, major transportation stations, office towers, retail storefronts, and more.

NUPRESS FACADES

DESIGN & ENGINEERING

When designing structural glass facades, we are mindful of the overall aesthetic, architectural vision and the ability of the façade to meet all the specified performance requirements.

BESPOKE PROPOSALS & COMPREHENSIVE CONCEPTS

The professional feeling of service truly sets us apart in the industry, right from the start. Our experienced team considers all aspects of the project from design assist to installation. We provide an all-inclusive quotation including clearly identified scope, engineered glass compositions and proposal details. We see our clients as partners and work to form a partnership that builds trust, integrity, and lasting relationships for many projects to come.

NUPRESS launches strong with...

PROJECT KICK-OFF

Critical to starting a project off right, Nupress initiates a project kick off between the client and the Nupress team including Sales, Project Management, Design and Engineering to review and identify pricing, scope, schedule and any outstanding challenges.. The client is then assigned a Nupress team lead and an accompanying report to summarize and confirm all items discussed.

TORONTO

NUPRESS makes it easy as 1,2,3...

DESIGN, ENGINEER, MANUFACTURE.

The Nupress team prepares & provides design details, shop drawing submittals, and fabrication drawings required for all Nupress manufactured parts and scope items. A comprehensive engineering package, including detailed calculations and geographical certification, is also provided for each project. Our team keeps everything on track using our custom, tailored project management software; providing real time updates and ensuring on time delivery.

IN-HOUSE MANUFACTURING

Nupress Group, established in 1971 is a manufacturer of precision machined components and assemblies. Located in Cardiff, Australia over 50 staff are employed in engineering, drafting, machining, logistics and administration. The AS9100 and ISO9001 accredited Quality Management System provides the Facades division with an unparalleled supply chain with in-house manufacturing at a QC level designed for Aerospace and Defence manufacturing requirements.

GO BEYOND

Nupress keeps delivering with...

ONSITE INSTALLATION

Nupress doesn't stop the service once the material ships. We provide the client with a complete commissioning binder which includes all up-to-date and critical information related to the project including installation sets of shop drawings, current calculations, site instructions, fabrication drawings, packing slips and assembly details for Nupress propriety or site specific details. To ensure a smooth and successful installation process, a Nupress representative will be onsite to provide support to the installation team.

NUPRESS ENSURES YOU ARE...

SET FOR SUCCESS

At the core of every Nupress experience is the confidence we instill in getting the job done right and with great success. For this Queen & Richmond Office tower, the installation instructions are almost as unique as the structural glass wall itself. The suspended 80-foot tall tension trusses required a project-specific tension to be put into the tension rods. Through laboratory testing, our Engineering team developed a comprehensive torque setting and sequence for the installers to follow along with on-site support from Nupress.

NUPRESS ALWAYS GETS THE...

PROBLEM SOLVED

The Youtube Theatre is 16,000 square feet of shaped, segmented, conical curved glass...all installed with perfect alignment. This highly demanding scope required an innovative solution for determining site tolerance for the glass and components order. Using 3D modeling software, CNC programming, part development and site surveys for final fit up, the Nupress team developed a process to ensure all conditions were accounted for allowing the long lead time glass order to be safely executed.

NUPRESS GOES...

BEYOND THE WALL

Our passion for engineering means we are more than just facades; providing design, engineering and manufacturing for glass bridges, skylights, canopies, and more. The Transbay project in San Francisco consists of grid shell domed skylights, glass boxes and canopies. Nupress was brought in early on a design-assist basis to help develop the various glazing & panel systems, turning the design assist into a \$92M contract.

NUPRESS IS ALWAYS...

UP FOR THE CHALLENGE

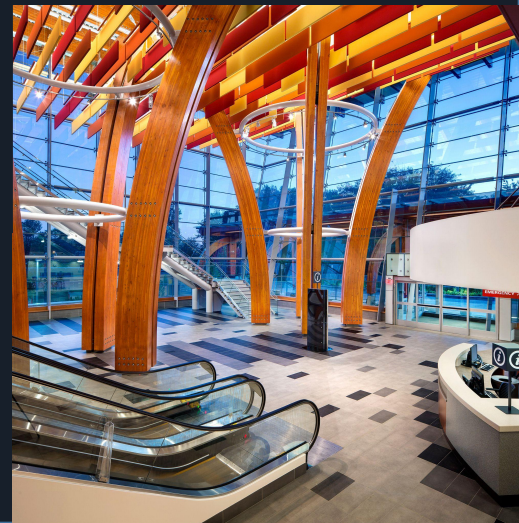

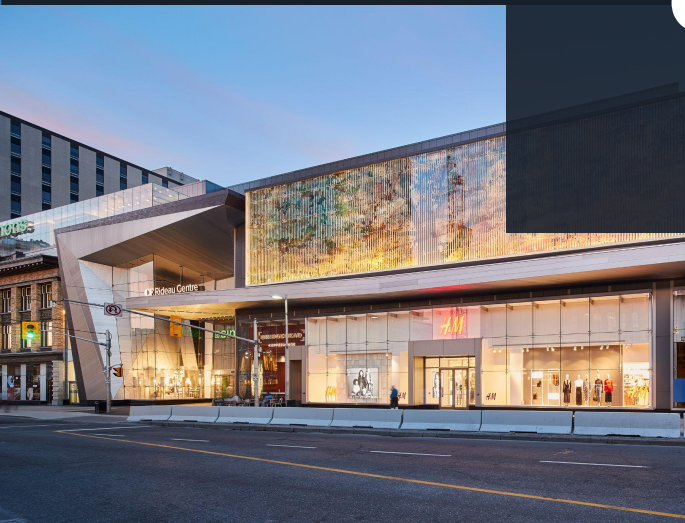

Designing a 21,000 square foot point-supported canopy, with a stainless steel tension structure support with over 500 lites of glass is challenging enough. And, to achieve the overall curvature of the facade, the design introduced the complexity of cold bending the glass, up to one inch per panel. Cobo Hall is a true testament to how we take on challenges and embrace the opportunity to realize the most remarkable projects.

Chris Couse
Founding Principal
KPMB Architects

"It has been great to see the glass go in with so little drama. I know how difficult this is in reality and it speaks to a high level of professionalism on Nupress' part. "
