

## Spring Is In Full Swing

Thank you for opening our latest newsletter. We have a hodge podge of stuff for you this week. It's the first time you are receiving our e-mails for a while. March is a very busy month for [Howell To Sports](#). We attend a different conference every week and hopefully we got to meet some of you. Thanks again for opening and we hope your spring is great.

The first thing we want to emphasize is our top vision training tool, the [Progressive Vision Ring Set](#). We sell quite a few of these to eye doctors who are attempting to incorporate sports vision training into their practices. If you are interested in finding out more of this excellent tool please call or e-mail us.

Believe it or not, it's not too early to start thinking about a new [football scoreboard](#) for your school or youth organization. We have actually starting selling a few football boards. If you are considering a new scoreboard or thinking about upgrading your present board with a bright, shiny video display please connect with us.

We are showing our [digital scorers tables](#) one last time before next season. We sold a few of these this past year and every athletic director who purchased them was very pleased with their purchase. If you would like to talk with one of them about their experience, e-mail [emily@howelltosports.com](mailto:emily@howelltosports.com) or call 856-381-8888 and ask for Ed.

Finally, we hope you read the tweet we included in this newsletter. It's a great read and something you can definitely show any parent thinking their student athlete is bound for a D1 scholarship. Hopefully this will help these students

consider playing more than one sport.

### [Chris Hobbs Tweet "The Truth About Athletic Scholarships To College"](#)

Thanks again for your support and readership.

---

*Progressive Vision Ring Set*

This is our latest vision training product. It consists of four rings, each progressively more difficult. This vision product is designed to improve tracking ability, depth perception and fine focus. It can be used alone, with a partner or in a group. The ring is tossed back and forth with the object to catch the correct colored ball. It will definitely improve your "sports vision". Four colorful poly-balls evenly spaced on a durable plastic ring. You use it by lightly tossing the Vision Ring up in the air, if practicing alone, or back and forth, if with another player. Concentrate on catching one of the four balls, not the ring, using either two hands or one. Remember to always focus on the ball you are trying to catch.

---

If you're really looking to make a statement nothing sets you apart from the crowd more than having a Live Video Display. By adding our Advanced Live Video System you can instantly switch between multiple feeds from live video cameras, DVD players, or a multitude of other sources.

*Video Display Scoreboard*

---

The face of athletics is changing. Everyone from players to fans and sponsors expect technology to be integrated into the game experience. BoostR Digital Displays specializes in creating easy-to-use, cost effective digital display options designed specifically for athletics. Whether you are looking for a digital scorer's table for your gym or a versatile display cube that can be easily moved around your

campus, we have displays to fit every need. We even offer custom display options built to fit your program's needs.
