

BASEBALL TARPS

Wind Weighted® RAIN COVERS

They stay put in high winds without stakes or sandbags.

These are the famous baseball tarps that are used by every level of baseball: Little Leagues, High Schools, Colleges, Minor and Major Leagues. Chain in the entire perimeter keeps wind from getting under, so they do not move or blow away. Remarkably, Wind Weighted Tarps have encountered hurricane force winds and did not move from the mound and home plate.

Originally introduced at the 2004 ABCA Convention, Wind Weighted Baseball Tarps are now protected by the following six (6) U.S. Patents:

8,100,785 8,025,595 7,494,433 7,270,617 D552,911 D516,360

Made of heavy duty 18 oz UV+mold treated vinyl-polyester fabric
See color chart on back cover.

Standard diameters: 18' or 20' for Mound. 26' or 30' for Home Plate
Custom configurations, round and square sizes available.
2 Year Limited Warranty

Available with **CHROMA-BOND® IMPRINTING.** See page 14 for details.

INSTALLER™ Device for Wind Weighted Tarps

INSTALLER Device is a uniquely designed PVC pipe combined with an internal aluminum pipe reinforcement and end-pivoting aircraft cable handles that can roll a Wind Weighted Tarp on and off a mound or plate. *This allows just 2 people to easily install or remove a tarp in less than 30 seconds. Also is great for tarp storage.*

SAVES TIME AND BACKS

NON-WEIGHTED MOUND & BASE COVERS

Made of durable 18 oz. vinyl-polyester or 6 oz. polyethylene, these quality tarps have grommets installed every 3' around perimeter and include low profile ground stakes. Both models covered by a 2-year prorated warranty against UV sunlight breakdown. This is baseball's most widely used type of cover.

18 oz. Outdoor Vinyl* in 17 colors. Color chart on back cover
6 oz. Polyethylene in white on top with a silver/grey bottom.

Available with **CHROMA-BOND IMPRINTING.**

See page 14 for details.
