ASSESSMENT & THERAPY SERVICES

Dear Parent / Carer,

Please be advised that the **NDIS does not fund neurodevelopmental assessments (e.g., Autism or ADHD) or diagnostic assessments, unless this is listed in your child's stated supports.** If an assessment is not in your child's plan, you may seek permission from the NDIA or your plan manager to approve an assessment and provide a letter of confirmation for billing.

What can be provided under NDIS?

We provide a functional assessment to comprehensively understand a child's cognitive, learning, emotional, social and / or behavioural abilities. This information will guide individualised treatment planning and recommendations for supports in the home, community and education setting. The information **is not** used to provide a diagnosis.

What can be provided under Medicare?

You may access a Medicare Plan from a Paediatrician or GP for a neurodevelopmental assessment. The maximum rebate for an assessment is \$386.60. The out-of-pocket fees contribute to your family safety net within a calendar year. If you choose to access a Medicare rebate, the plan is required **before** your child's assessment.

Assessment of Complex Neurodevelopmental Disorders

GP referral using items **3 - 51 or 91790 - 91802**

A maximum of 8 assessment appointments can be claimed per patient in a lifetime.

If your child receives a diagnosis, they are eligible for ongoing treatment under Medicare.

Treatment of Complex Neurodevelopmental Disorders

GP referral using item **139 or 92142**

Up to 20 appointments in a lifetime, provided in courses of ten sessions.
