Map360 V2.0

Release Date: May 8, 2018
Map360 V2.0 Overview Movie
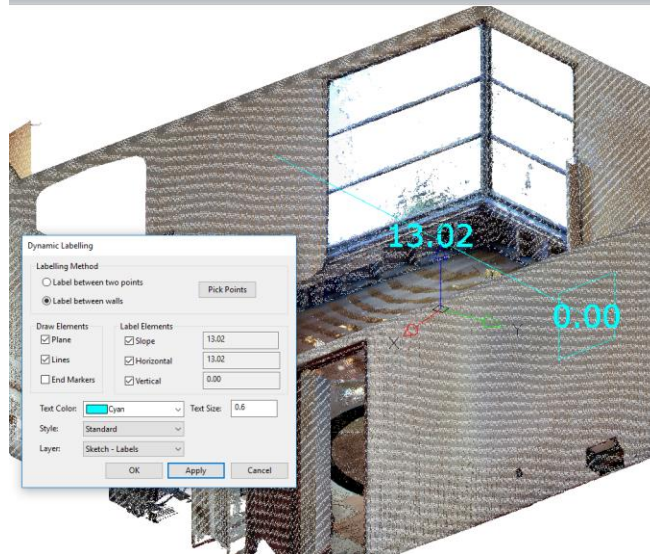

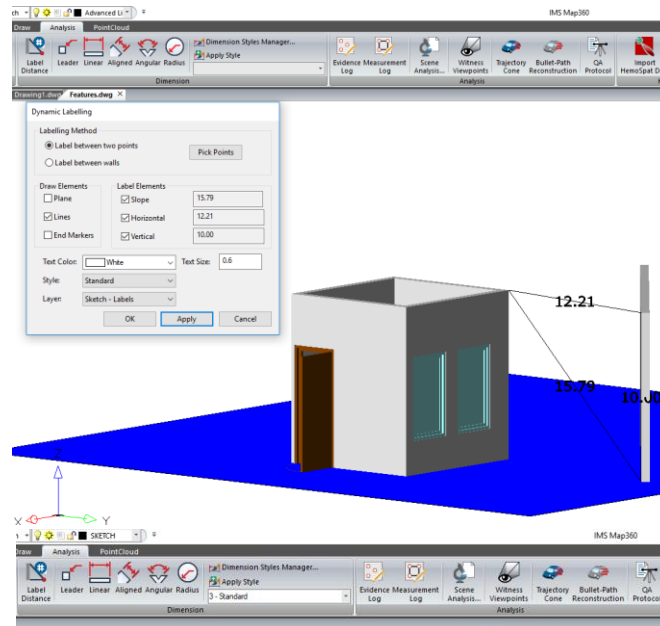

New: Advanced Linetypes

Upgrade Tour Movie: Map360 V2.0 – Advanced Linetypes

| Feature	Benefit
Advanced Linetypes	We've included new line types to save you time and transform your diagrams and they're just as easy to use as a basic line. Quickly and easily draw 2D and 3D advanced lines in your diagram such as roadway lines, tire marks, guardrails, barriers, fences and many more. Choose from nearly 100 common 2D and 3D line types. The intuitive dialog displays a preview of the selected linetype and you can choose the color and layer before you draw.

New: Label Distance

Upgrade Tour Movie: Map360 V2.0 – Label Distance

Feature	Benefit
Label Distance	Highlight important distances by adding labels to your diagram! This command allows you to label the distance between two points or to obtain the perpendicular wall distance in a point cloud. This is particularly useful for obtaining the slope distance, as well as the horizontal and vertical distance between two points.
