

GREEN GUARDIAN

Organic Pest Control

Keep garden pests and mosquitoes
away without chemicals

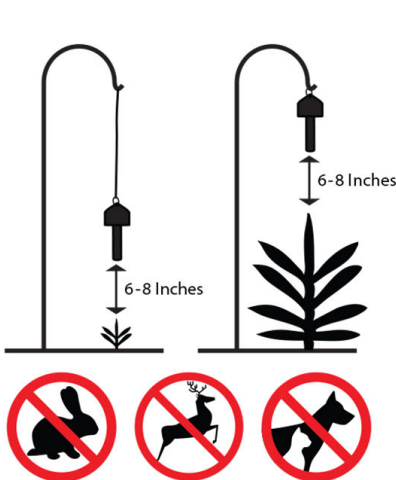

Typical chemicals can run into your garden and become part of your food. The Green Guardian simply hangs in your garden, flower bed or in your trees. When filled with the recommended white vinegar, it dispenses a smell that deters animals. This chemical-free garden protection will not impact beneficial insects, is bee-friendly and safe to use around children and pets when used as directed.

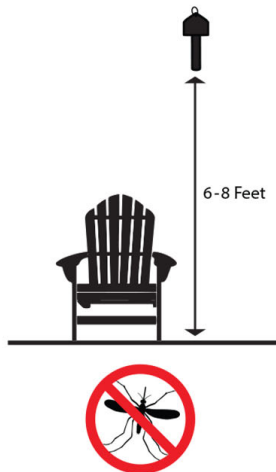

WARNING: This product safely uses white vinegar. Vinegar applied directly to vegetation will harm it.

TESTED ON THESE PESTS
