

“Social Emotional Lessons Learned During a Global Pandemic”

Presented by Dr. Tiffany Brown, Deputy Superintendent
Long Beach Unified School District

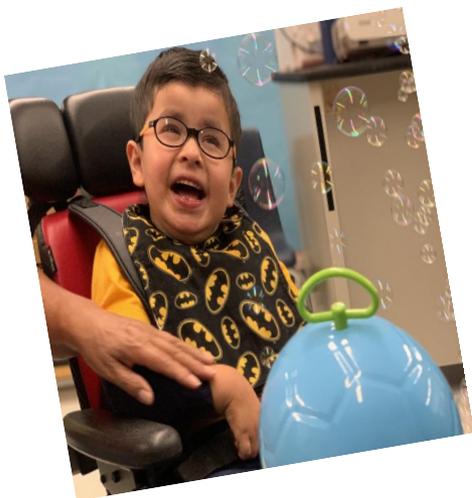

Presentation Goals for Today

- To share information about school planning for social-emotional needs
- To share some of the student perspectives that have guided our planning.
- To plan forward with the lessons of the last 18 months in mind.

How are all of the children?

Lessons #1-3

1. Student express what they need all of the time. We need to listen.
2. We need to have a “restorative re-start” as we return to campus.
3. Everyone has struggled in the last 18 months.

Lessons #4-7

4. We need to promote a sense of safety before learning can resume/occur.
5. Adults and children experience the same things differently.
6. We are actively incorporating more student voice into our district wide planning.

Lessons #8-10

8. We have worked to navigate a range of opinions/beliefs in our school community.

9. Excellence and Equity Initiatives are framing our work.

10. Our potential for momentum and growth is endless.

Thank you to all of the care providers and helpers in our community!
