2019 Fiber Expansion!

***North County teams up with you to bring fiber to your community
Fiber to the Home Project Area Selection now in process***

North Country is in the **final stage** of selecting which areas we will be expanding our fiber network in during the 2019 construction season. Your home/business is located in one of the areas being considered to start construction as soon as this summer. Our final selection will be based on the level of demand and community commitment. Basically, the more customers that want services in each area the more likely it will be selected. Each project area has min. requirements that can be met by any combination of the package options below. The more customers that select option #3, the fewer number of customers that are required to meet the project area requirements.

Timing is everything! Once the project commitment level requirements are met the project area will be sent to engineering for final approval and then placed on the 2019 construction schedule based on a first come, first in the build schedule. No orders will be finalized until the min. requirements are met, at that time, each customer will be required to pay all startup fees (Package options, 1, 2 or 3) and/or special construction fees. The monthly term (Option #1 & #2 is 36 months saving, Option #3 is 60 months) begins and monthly service fees will start once construction is completed and service is active.

No Data Caps!

No Hidden Fees!

<u>Option 1</u>	
Startup	\$300.00
Monthly	30Mb/\$75.00 60Mb/\$110.00
*Standard Pricing
