

3.6L JEEP LJ AND TJ POWERTRAIN AK PERFORMANCE CONVERSION

The AK Performance turn key engine/transmission conversion includes all takeout replacement parts including engine, engine accessories, transmission, cooling fan, transfer case (or option to reuse your Rubicon transfer case), PCM, TIPM, Shifter, etc. The kit also includes new and AK Performance parts including fan shroud, transmission cooler kit, motor mounts, transmission mount, gauge cluster, AC lines, etc.

This kit will be installed by Aggressive Krawlers Off-Road in Myrtle Beach, SC and takes about 45 days including installation and tuning. Because the Jeep is disassembled during powertrain installation, this is a great time to handle restoration and upgrades such as suspension, frame coating, and aftermarket accessories.

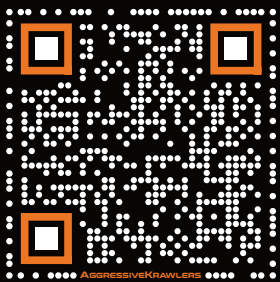

3.6L PENTASTAR

- 3.6L Pentastar – Pricing goal of \$21,995 installed*
