## What others say about our courses?

"I have taken several other CPR courses, this one is by far the most informative and thorough."  
Christine A. Independence, KS

"I honestly learned more in this CPR class than any other Health Care Providers course. Very informative and I feel I have more knowledge to perform CPR." Jessica D. Paola, KS

"The hands on training and the teacher was very knowledgeable. My last class was so short and wasn't informative. This CPR class was amazing and up to date." Stephanie M. Pittsburg, KS

Best CPR/First Aid course I have taken in 15 years. Austin R. Topeka, KS

I have been taking this class for 20 years, & I have never been to a course with as much in-depth, educational, & relevant material.  
Brandee Y. Wichita, KS

# WHAT IS SUDDEN CARDIAC ARREST?

Sudden cardiac arrest (SCA) is a condition in which the heart **suddenly and unexpectedly stops beating**. When SCA occurs, blood stops flowing to the brain, the heart, and the rest of the body, and the person collapses. In fact, the victim is clinically dead and will remain so unless someone helps immediately.

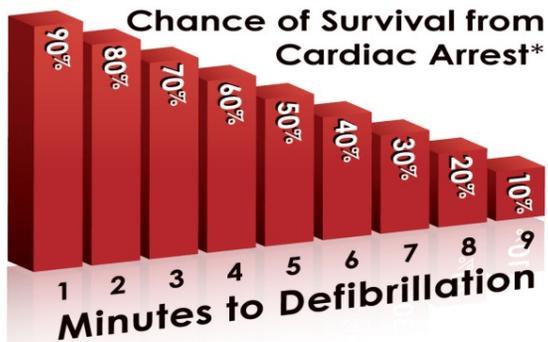

## CPR is important,

but alone cannot restore a normal heart rhythm. A shock from a defibrillator is the most effective way to restore the heart's normal pumping rhythm.

*The delay from collapse to delivery of the first shock is the single most important determinant of survival.*

If defibrillation is delivered promptly, survival rates as high as 75% have been reported.

The chances of successful defibrillation declines at a rate of about 10% with each minute of delay. CPR will help to maintain a shockable rhythm but is not definitive treatment.

# HOW SERIOUS IS SUDDEN CARDIAC ARREST?

SCA strikes over 360,000 people every year, just in the U.S. and over 7,000 of those are children under the age of 18.

## Do YOU have what it takes TO SAVE A LIFE?

Aren't all AED's the same?

**Absolutely NOT!**

All AED's will shock a shockable rhythm. What sets them apart is their unique features: dual language, CPR Coaching/Feedback, visual or voice prompts, adult/child pads, and WIFI connectivity.

In addition to providing all brands and models, we offer electrodes, batteries, cabinets, wall signs, and rescue kits.

The Emerg-A-Center Safety Command Center is a built-in emergency storage cabinet, a solution that adds immediate and necessary first-aid in the case of an emergency to your home or office. (Fits in 16" center studs and different door options to choose from to match your current decor)

## On the Go Bag

**A life-threatening emergency can occur anywhere, at anytime.**

The Emerg-A-Center On the Go! provides quick and easy access to tools and training needed in the event of an emergency. Inside the rugged, water resistant backpack is an AED, ANSI B First Aid Kit, Blood Control Kit, Instructional Video Brochure, and Flashlight.

Both items are **OSHA and ANSI certified**, and meets the necessary requirements for a safe home and workplace.
