No more long scary Home Inspection Reports you don't understand!

Home Inspection explained in the right perspective.
Giving you the tools to make a confident decision.

Call us: 470-519-2098

Many home buyers find themselves lost in the details of the average home inspection report. Fact is, almost any house will have "findings" on a detailed inspection report. But what does it really mean to you?

Are these cracks in the basement pose a structural damage or are they just "cosmetic"?

Are these old wires just "nostalgic" or a safety hazard?

Did your Home Inspector really look at the entire roof?

Is your Home Inspector ready to brief you after you paid and receive the Inspection Report?

With years of background experience in Home Improvement and Residential Heating and Air, certified by ICA, we have developed unique methods to make Home Inspection easy and **clear** for you.

We use non invasive inspection methods, we report to you the way it is, and we confirm you understand what it means.

Ex military, devoted to hard work!
