

Academy Trust

EV Chargepoint Solutions

Government Grants

Workplace Charging Scheme

As an Academic Trust you are eligible to claim government funding to help toward the upfront costs of the purchase and installation of electric vehicle chargepoints.

The grant covers up to **75% of the total cost** of the purchase and installation of the chargepoints up to a maximum of **£350 per socket** and 40 chargepoints in total.

The government scheme is known as the Workplace Charging Scheme and is administered by the DVLA.

EVC are experts in helping you obtain this funding, but, please **ACT QUICKLY as the Scheme ends in March 2024**

What we do...

Our Experience

EVC have helped a number of schools to install their chargepoints.

We aim to make the process as **simple and stress free** as possible.

- We work around you to install when the school is closed, mainly **during school holiday periods**, half terms etc.
- An average **install takes only 2 days**. We have our own installers and civils teams.
- We are experts in the installation process and have extensive knowledge of all manufacturers when it comes to the hardware and the suppliers of the back office systems which run the chargepoints.
- We will give you the options of future proofing your site by laying additional **infrastructure to allow you to add further chargepoints** easily in the future. There are additional grants available for this too.
- As a company we are **passionate about the environment**. We give talks to students, free of charge on the green renewable industry in terms of environmental issues and the job market.

Testimonials

Priding ourselves on customer satisfaction

Parklands Academy

I had the task of sourcing 4x Electric Vehicle Chargers for our school based in Chorley.

As the Site Manager my aim was to source a company who could deliver on our budget price without compromising on equipment quality and customer service.

I contacted 3 companies regarding this project, each company visited site and put together a plan for installation and supplied me with a quote.

After reviewing all proposals of each company and speaking with their representatives I decided that EVC Group were the ideal company.

The installation took place by knowledgeable, friendly and quality committed EVC Group staff.

The project was finished as stated on time with no additional problems or extra cost.

Needless to say our staff are now enjoying the benefits of charging their vehicles whilst at work.

If you're looking for a company who can deliver what they say and offer, then in my opinion I made the right decision.

St Claudine's Academy

EVC Group listened to our needs, gave us a detailed proposal, and then reworked it when we had learned more about what we really did need.

They delivered their solution on time and as promised, and we are very happy customers, would recommend them to other schools wholeheartedly.

Rob Knox- School Business Manager
