

CONSTRUCTION UNDERWAY!

Construction will continue in July on the South Douglas Highway from Cordova Street to MP 0.5. There will be excavation for storm drain improvements on the mountain side of the highway. Guardrails will be removed and replaced near the Douglas Bridge. Installation of new signs will begin near Egan Drive and the roundabout.

Construction equipment may encroach into the travel lanes and drivers will see narrow lanes and intermittent flagging to accommodate the construction equipment.

Street parking within the work zone may be limited. Pedestrians will have sidewalk access through work areas, and may be escorted around equipment.

JUNE - SEPTEMBER

DOUGLAS HIGHWAY

During this time sidewalk replacement and storm drain improvements will be completed, pavement south of the roundabout will be removed and replaced, and new signs and traffic markings will be installed.

CONSTRUCTION DETAILS

Throughout the project there will be delays in the flow of traffic and night work will be needed for portions of the project. Construction contractor, Secor, will work to accommodate all road and sidewalk users.

As a reminder: please use caution when traveling in work zones. Watch for and follow directions from construction signs and flaggers when present throughout the construction zone.
