

CONSTRUCTION UNDERWAY!

Construction will continue in September on the Douglas Bridge and Douglas Highway in the project area. New traffic markings will be installed and storm drain pipes will be rehabilitated throughout the project area.

Drivers can expect shoulder work, shifting lanes, and flagging operations. On-street parking may be limited in the work zone. Pedestrians will have sidewalk access through work areas, and may be escorted around equipment.

Please bear with us. To minimize traffic delays for vehicles, night work may be needed to install traffic markings. This night work will take place between 8 p.m. and 6 a.m. Drivers should expect delays and new traffic patterns during traffic marking work in the roundabout.

SEPTEMBER - OCTOBER

DOUGLAS HIGHWAY

During this time, storm drain rehabilitation and remaining bridge joint work will be completed. New signs and traffic markings will be installed and the project will be near completion.

CONSTRUCTION DETAILS

Throughout the project there will be delays in the flow of traffic and night work may be needed for portions of the project. Construction contractor, Secon, will work to accommodate all road and sidewalk users.

As a reminder: please use caution when traveling in work zones. Watch for and follow directions from construction signs and flaggers when present throughout the construction zone.
