Still Thinking Big by Jaime Osborn (with Dave Osborn)

First introduced to readers at age eight in Susan Kuklin's 1986 book *Thinking Big*, Jaime now continues her story in *Still Thinking Big*. Drawing on her experiences as a student, educator, world traveler, and independent woman, she offers parents, teachers, and medical professionals a deeply personal perspective on helping people of short stature build confident, successful, and fulfilling lives.

Written in her own voice, this inspiring memoir follows her remarkable journey through adolescence, college, graduate school, a successful teaching career, international travel, medical challenges, and a lifetime of proving that short stature does not limit a person's dreams or potential. Along the way, she shares the joys, disappointments, friendships, surgeries, triumphs, and lessons that shaped the woman she has become.

More than a memoir, *Still Thinking Big* is a practical guide for parents, educators, medical professionals, and anyone whose life has been touched by dwarfism. At the end of every chapter, Jaime offers thoughtful insights and practical advice drawn from decades of personal experience, encouraging others to replace fear with hope and limitations with possibilities.

"An incredible story of grit and determination not to be left behind."

*Lolly Burns
Burns Realty*

Jaime Osborn is an award-winning Master Teacher and reading specialist with more than 25 years of experience educating elementary school children in the Houston area. Born with achondroplasia, the most common form of dwarfism, Jaime has spent a lifetime demonstrating that physical stature need not determine the size of one's dreams or accomplishments.
