

# SNATCHED

RAPID FAT LOSS

## COMPANY OVERVIEW

### HOW SNATCHED WAS STARTED

Founded in 2016, Dominion Aesthetic Technologies, Inc. is a laser platform aesthetic device company with corporate headquarters in Texas and R&D labs in Florida. Dominion Aesthetic aims to offer the best solutions for aesthetic physicians and practitioners by merging the expertise of its renowned Scientific Advisory Committee along with its respected research & development team. Dominion Aesthetic created EON - Smarter Body Contouring to exceed the unmet needs of aesthetic physicians by leveraging innovative touchless robotic technology to advance the aesthetic body contouring industry.

The idea for SNATCHED Rapid Fat Loss came from DAT, Inc.'s successful launch of three EON Smarter Body Contouring locations in 2023/24.

With the rise of GLP-1 medications, we saw an opportunity to create a unique store model that combines the latest technology in non-invasive weight loss treatments with GLP-1 prescriptions. Our comprehensive one-year plan focuses on reducing fat, building muscle, and maintaining a healthy lifestyle. Thus, SNATCHED Rapid Fat Loss was born.

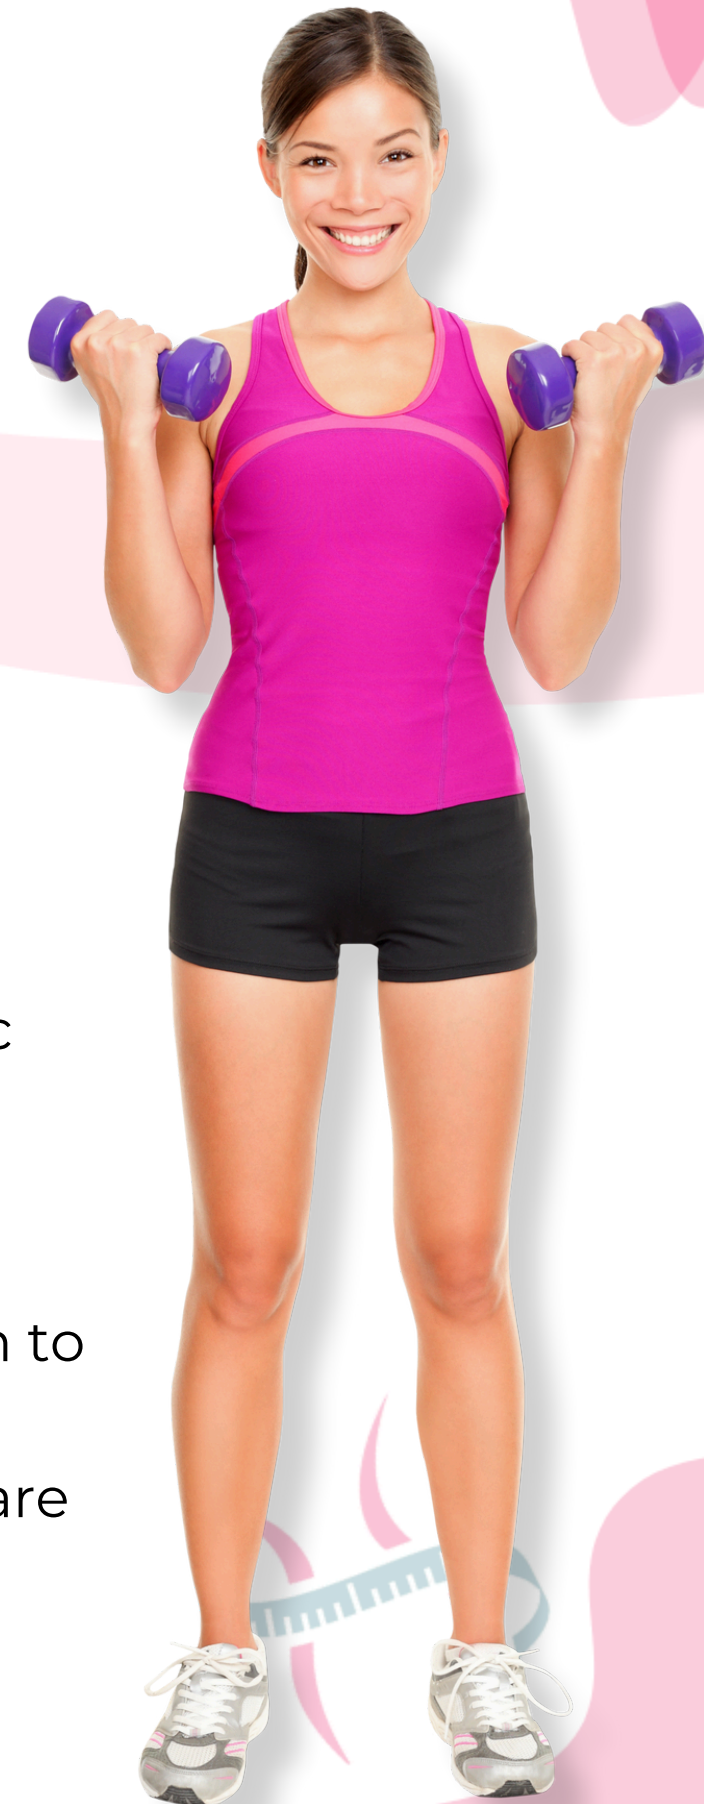

# COMPANY OVERVIEW

## WHAT IS SNATCHED Rapid Fat Loss

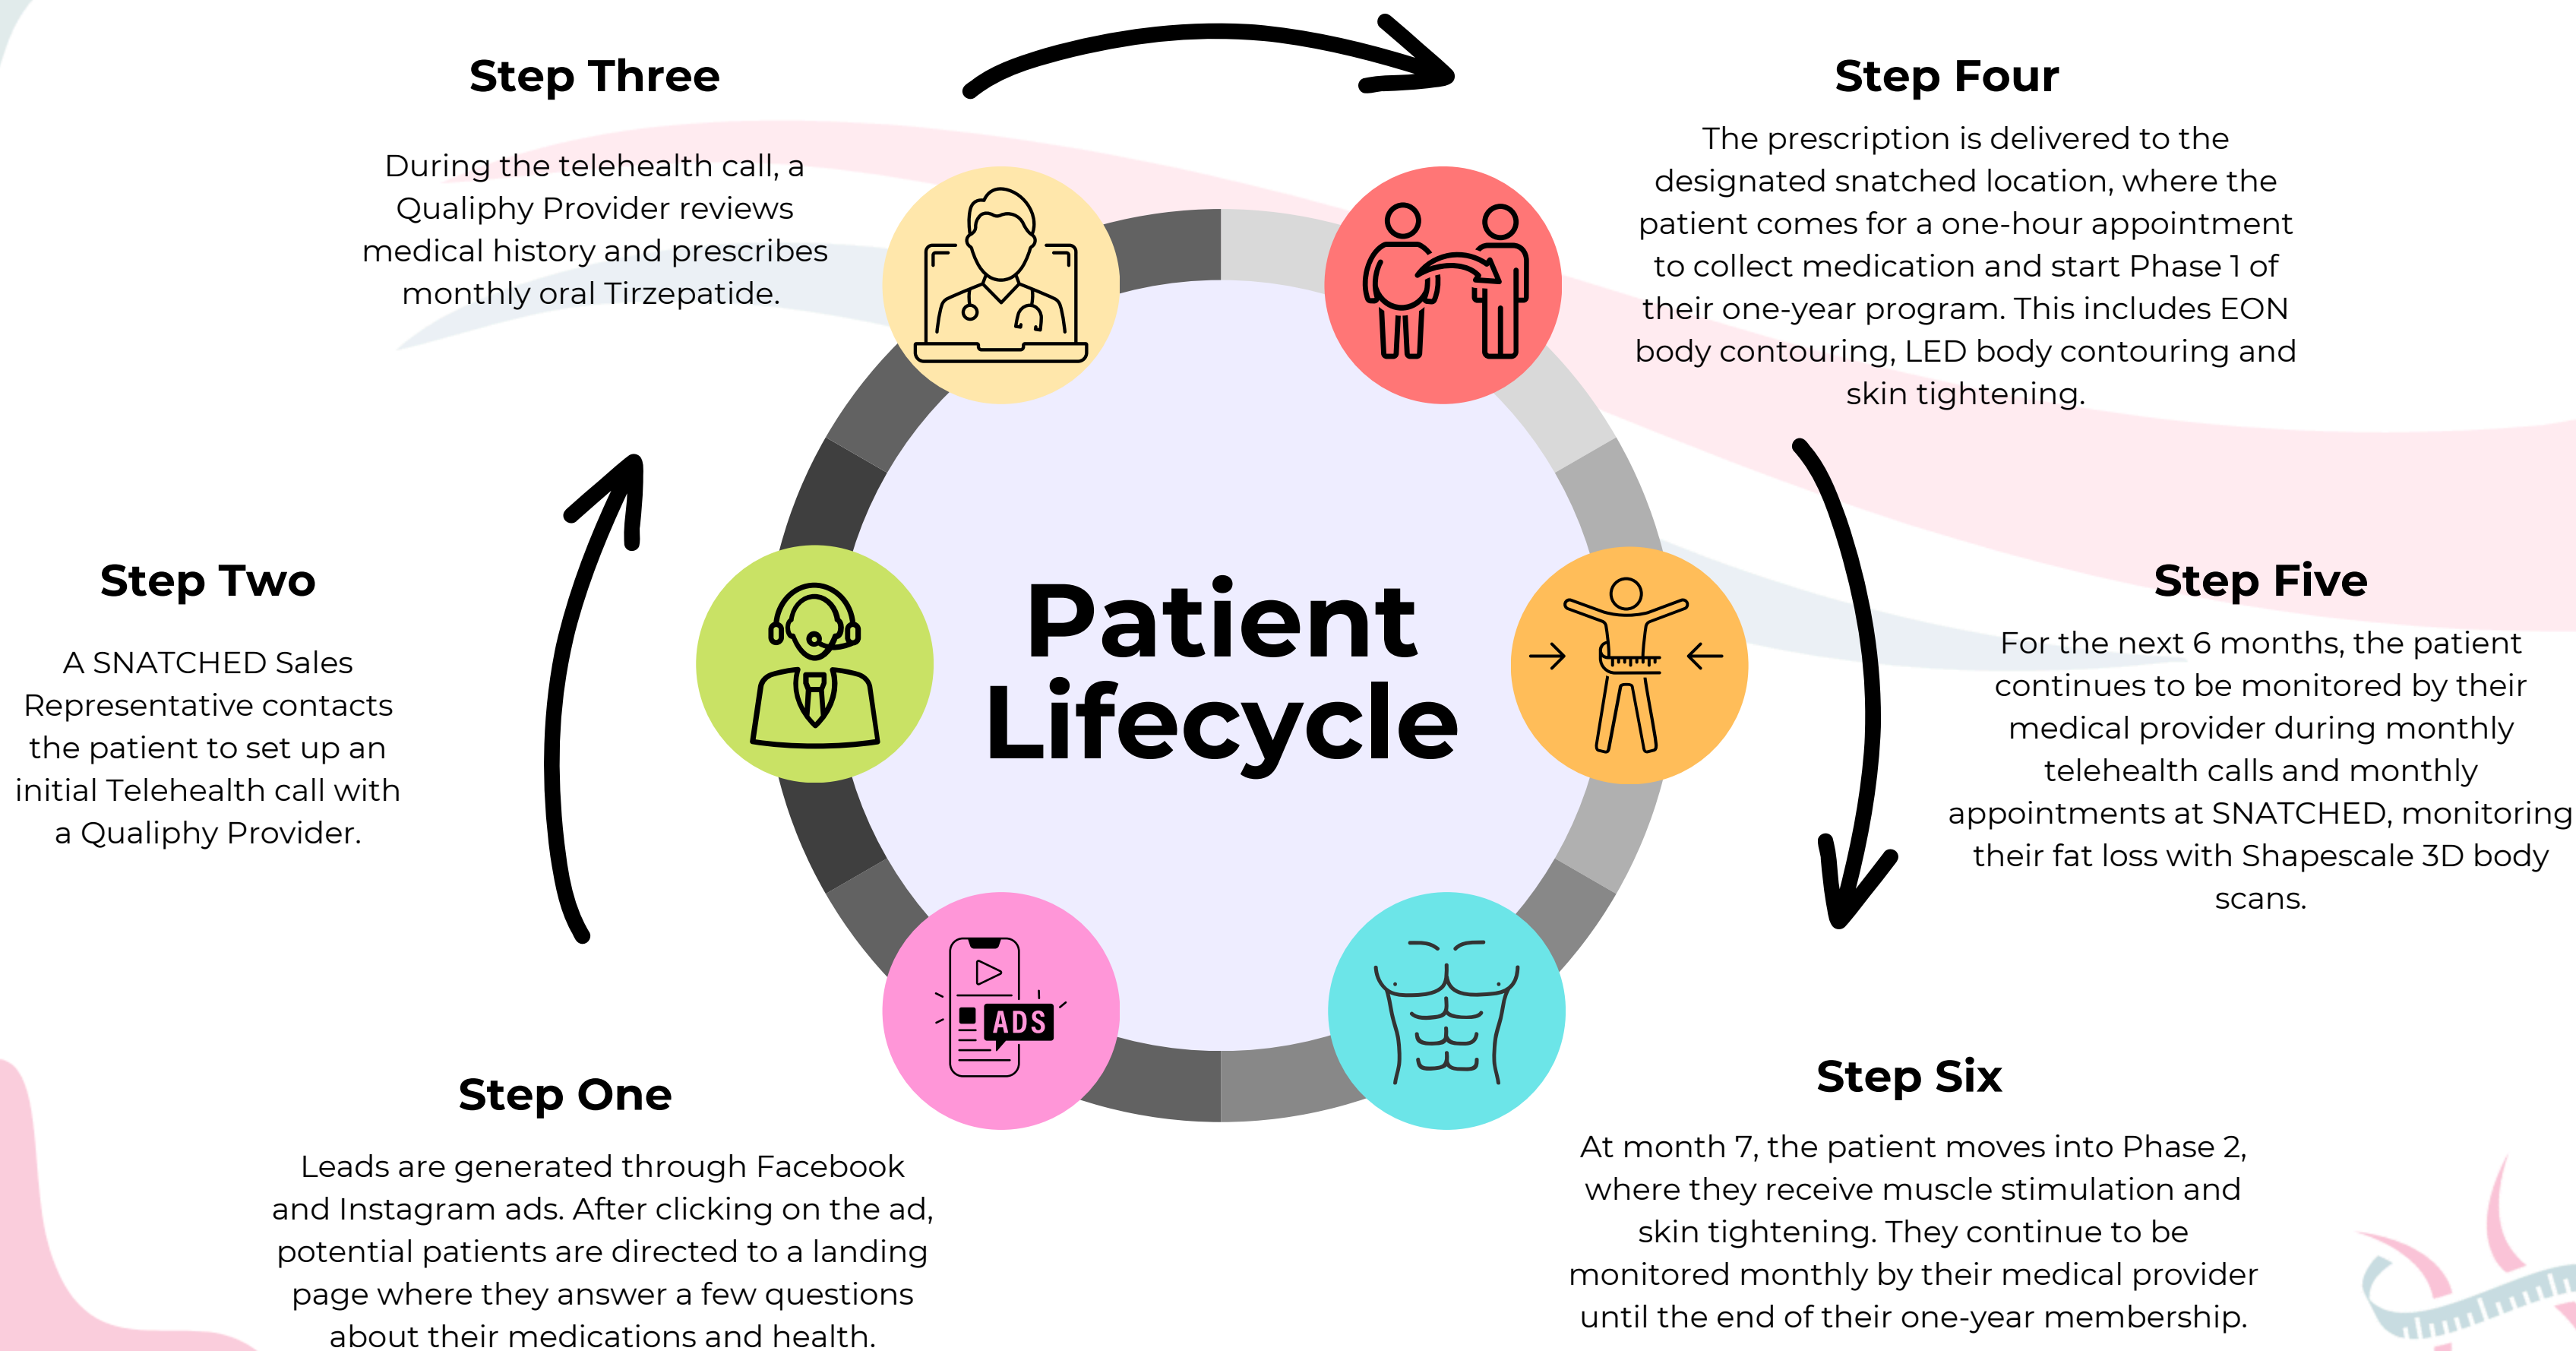

At SNATCHED Rapid Fat Loss, we have developed a comprehensive one-year approach to Rapid Fat Loss that combines the latest in medical weight loss prescriptions with advanced laser body contouring, LED light therapy, and muscle stimulation to deliver exceptional results quickly. While each of these treatments is scientifically proven to assist in creating the ideal body on its own, when combined, they complete the total body transformation by reducing stubborn fat pockets, firming sagging skin, building muscle, and toning your entire body.

### Why Choose SNATCHED Rapid Fat Loss?

- Personalized Care: Our team of medical providers tailor each treatment plan to your specific goals and needs.
- Cutting-Edge Technology: We utilize the latest advancements in medical and aesthetic treatments to ensure optimal results.
- Comprehensive Approach: Combining multiple modalities, we offer an aggressive approach to a total body transformation.
- Experienced Professionals: Our highly trained staff is committed to providing exceptional care and support throughout your journey.

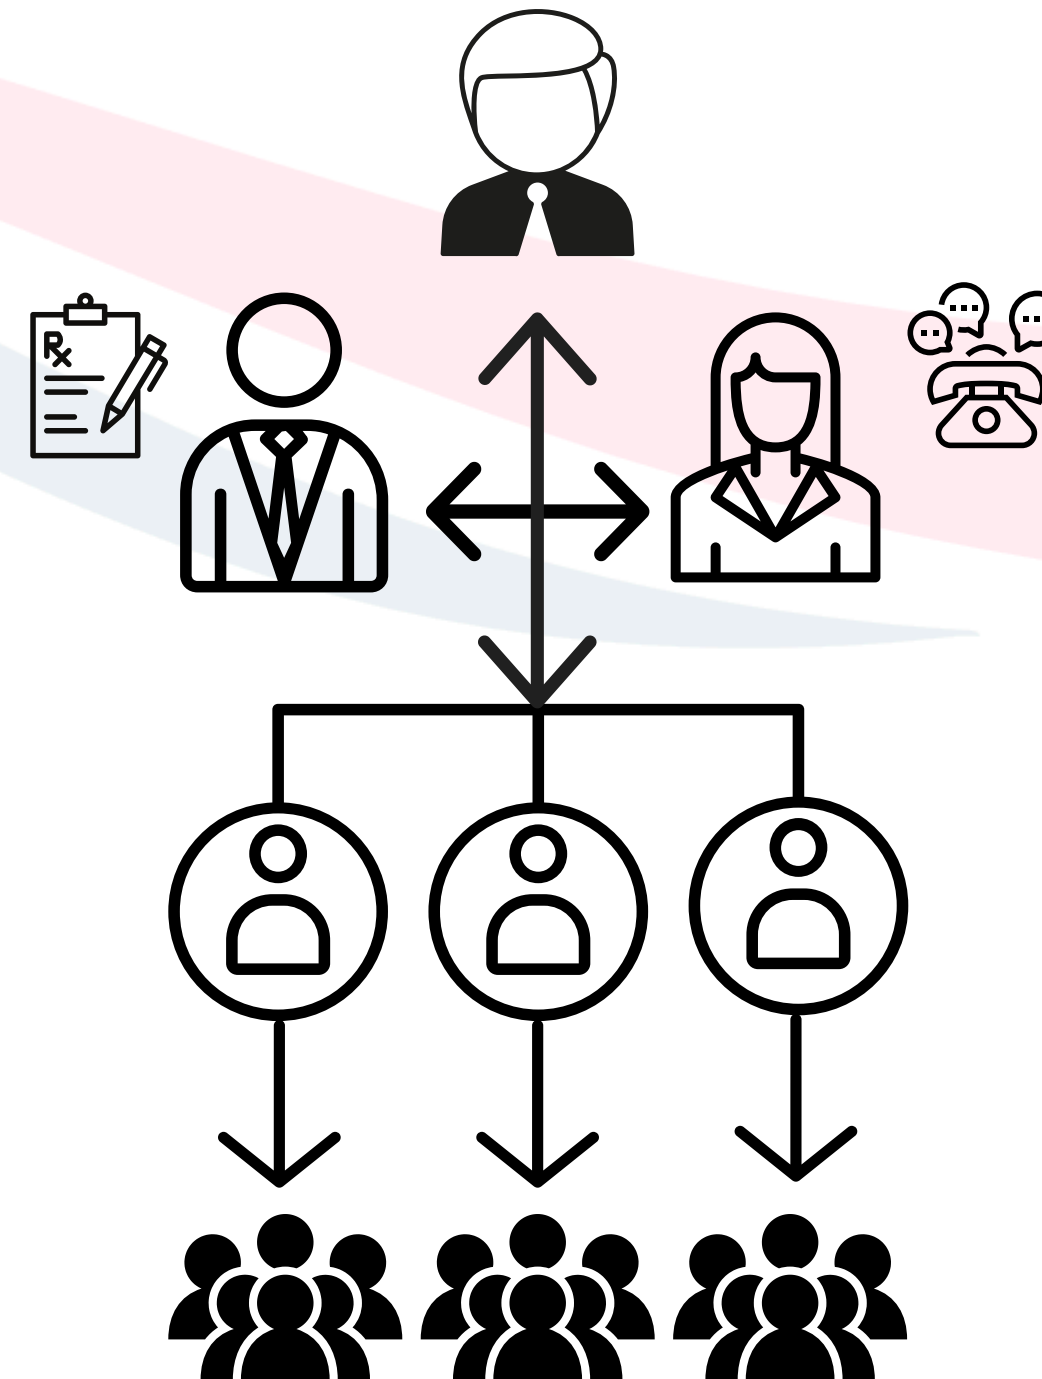

# SNATCHED FRANCHISE

## SNATCHED Organizational Chart

- FRANCHISE OWNER
- Medical Director & Sales Manager
  - Medical Director oversees 3 locations working with Qualiphy for Telehealth calls and Mycelium Pharmacy.
  - Sales Manager is the go between Qualiphy, Mycelium and MD, calls all patients, trains employees, and manages the 3 locations.
- 3 Franchise Stores
  - 2 Part Time Employees
  - Open Tuesday - Saturday - 40 hours a week
- 172 Patients Each Franchise
  - \$688 Membership

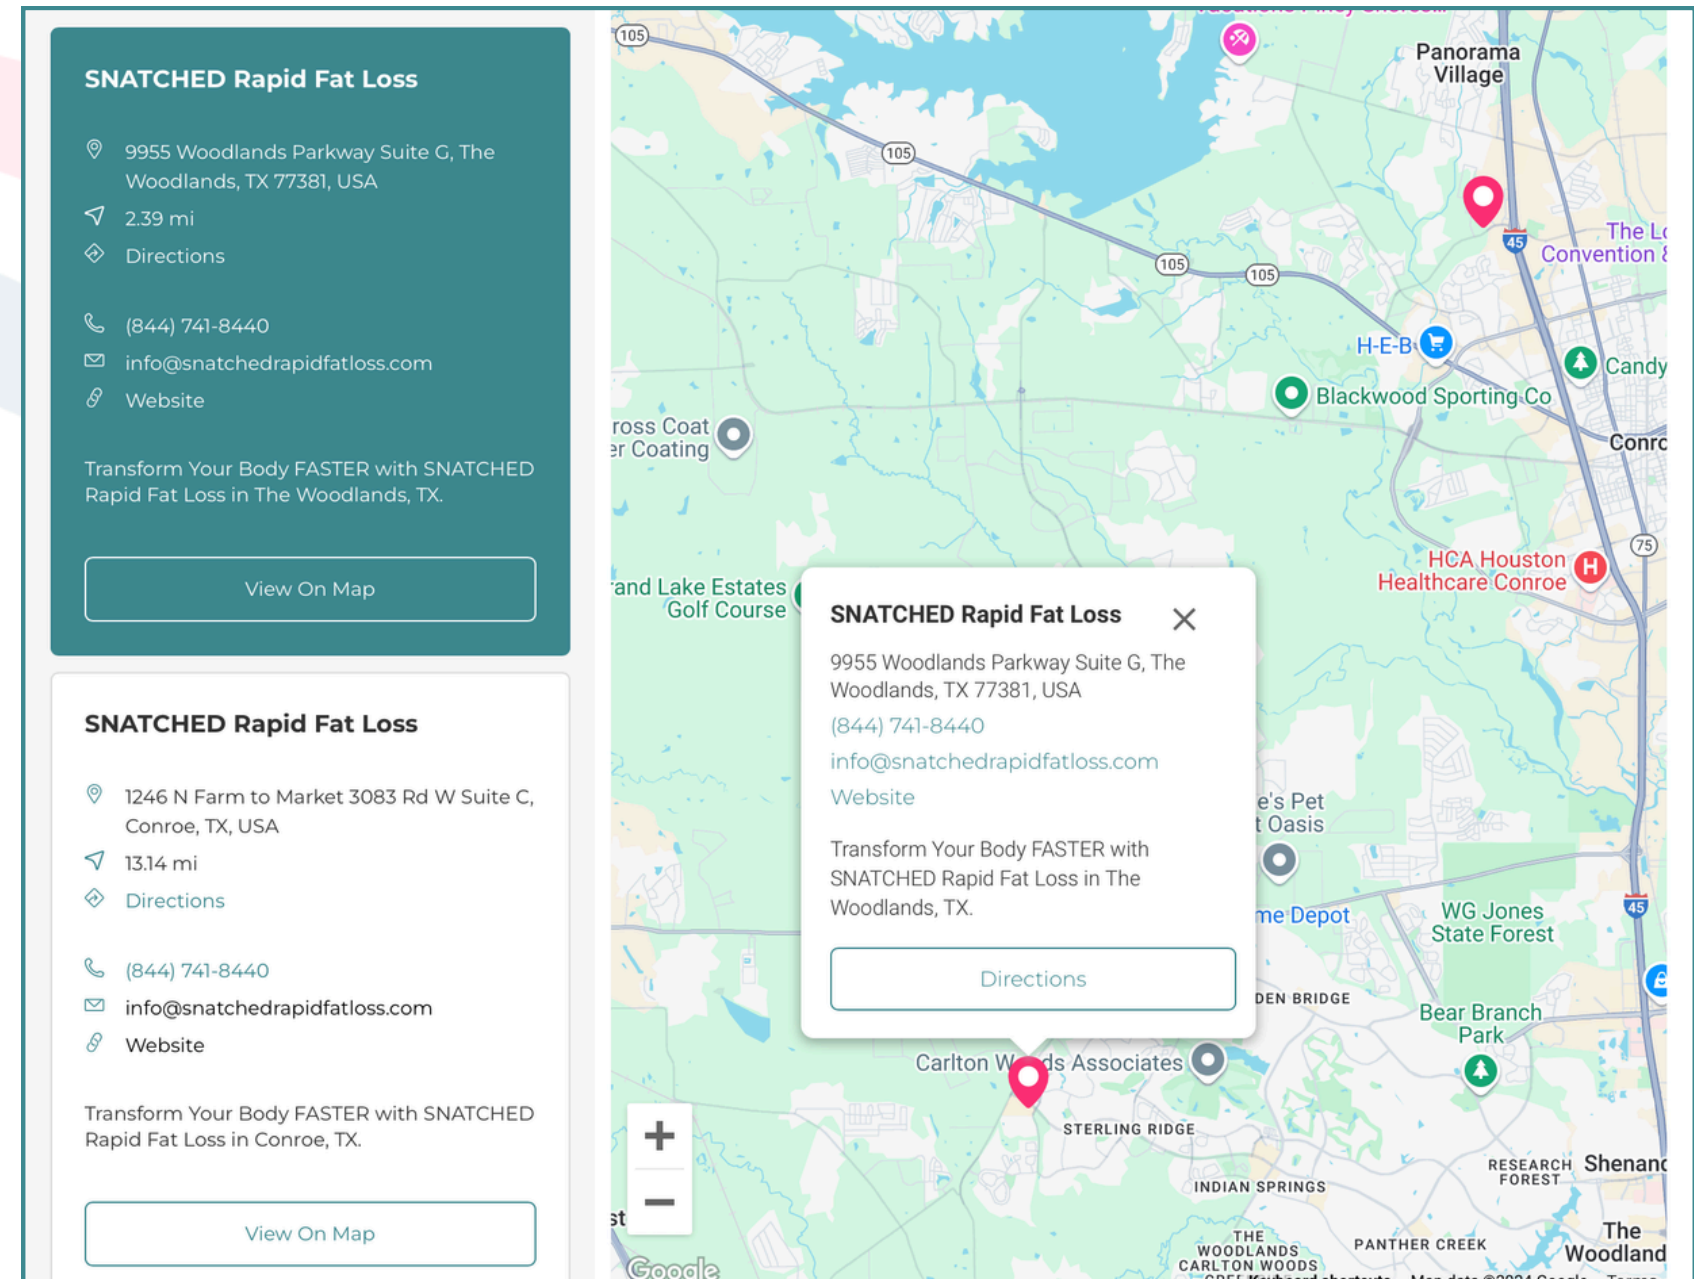

# COMPANY OVERVIEW

## FRANCHISE HOUSTON LAUNCH

SNATCHED Rapid Fat Loss, owned by Dominion Aesthetic Technologies, Inc., launched its first franchise in 2024 in Conroe, TX, followed by The Woodlands, TX. These locations form the foundation for our franchise model, which will be available for sale in 2025. This model's success is driven by its advanced technology, medical weight loss prescriptions, and comprehensive transformative weight loss plans, ensuring effective and lasting results for patients.

We are currently seeking to sign a lease for our third location in the River Oaks area.

## RAPID FAT LOSS

WHAT DOES OUR INDIVIDUALIZED WEIGHT LOSS PLAN INCLUDE?

## SNATCHED PHASE 1 MONTH ONE TO SIX

### *We Remove Fat & Firm Skin*

For the first six months of your membership, we will REMOVE FAT & FIRM YOUR SKIN. Each month, you'll book an appointment at the nearest SNATCHED location to pick up your monthly Tirzepatide oral drops. Additionally, during this visit, you'll receive one EON Smarter Body Contouring treatment along with a SNATCHED LED CONTOUR Light Therapy session. These scientifically proven treatments effectively reduce stubborn fat and firm skin, combating skin laxity and stubborn pockets of fat that are common with the rapid fat loss from GLP-1 medication. Our comprehensive program is designed to jumpstart your body transformation journey and deliver noticeable results.

# SNATCHED RAPID FAT LOSS

## GLP-1 RX of Oral Tirzepatide

Experience the benefits of an oral GLP-1 RX of Tirzepatide, a revolutionary treatment that aids in weight loss and metabolic health. Our medical professionals will guide you through your journey, ensuring you receive the support and expertise needed to achieve your desired results. Our providers are available for monthly telephone consultations, from your first set of labs to your final dose of GLP-1. Our providers help you get the most out of your individualized treatment plan.

*Our compounded GLP-1 medications are made in state-of-the-art facilities designed to meet Federal, State, and USP Regulations at Mycelium Pharmacy.*

Oral Tirzepatide contains the same active ingredients as the injectable version and delivers similar effectiveness in weight loss. The oral form may be absorbed more rapidly because of its fast-dissolving properties, potentially leading to quicker action compared to injections. Both forms provide effective weight loss support, utilizing the same active ingredients.

After you are approved as a SNATCHED candidate and your medical provider has approved your dosage, you'll receive your first prescription during your monthly SNATCHED appointment. This appointment will always be in person, allowing you to pick up your medication and receive your other non-invasive treatments.

## SNATCHED LED CONTOUR Therapy

Experience whole-body wellness with SNATCHED LED Contour – the first LED Contour device in the world for body contouring that's also FDA cleared to treat aging skin while reducing fine lines and wrinkles. Red and near-infrared light target fat cells, creating small openings in their membranes. This allows the fat to be released and naturally eliminated by your body via the lymphatic system. The SNATCHED LED Contour system uses three large LED panels to cover more area, giving you faster results.

### SNATCHED LED Contour Therapy Treatment Advantages:

- Reduce the circumference of hips, waist, and thighs.
- Drug-free, pain-free body sculpting.
- Improve skin texture and appearance.
- Reduce fine lines and wrinkles.
- Reduce inflammation and increase circulation.

### Other Details:

- FDA Cleared, Class II OTC medical device.
- Professional-grade, clinically proven.
- Safe, non-invasive, UV-free, non-toxic.

## EON Smarter Body Contouring

Achieve the silhouette you've always wanted with EON Smarter Body Contouring, an FDA-cleared 1064 nm laser. Using touchless, robotic technology, EON targets stubborn fat, reducing the targeted area by an average of 6.3mm during each 20-minute treatment. Whether you're looking to enhance your curves or streamline your figure, our customized treatments are designed to meet your unique needs.

### EON Smarter Body Contouring Treatment Advantages:

- World's first FDA-cleared robotic non-contact laser device for more effective fat reduction.
- Autonomous technology maps a patient's topography and adjusts laser energy based on skin temperature for more comfortable treatments.
- Delivers an unprecedented degree of fat-reducing laser energy more consistently than ever before.
- EON's proprietary skin-cooling technology keeps skin at least 3x cooler than previously before.
- The result is superior outcomes with more comfort.
- Dignified treatments - no pulling, no tugging, no strapping, no pinching, no gels, no massages, no wiping.
- Higher temperature to induce apoptosis in more fat cells, while keeping surface temperature cool through proprietary cooling technology.
- Dr. Thomas Fiala's study showed zero non-responders with zero downtime, with patients achieving 21-25% fat loss in their abdomen after one 20-minute treatment.
- 96% patient satisfaction rate.
- Suitable for all skin types and tones.

## SHAPESCALE

### Advanced Progress 3D Monitoring

We are excited to introduce ShapeScale, a cutting-edge 3-dimensional Optical Imaging (3DO) technology that offers unparalleled precision in body composition and measurements. All patients will have access to the ShapeScale app on their smartphones, allowing you to track localized fat and muscle content, and monitor even the smallest changes in your body. ShapeScale provides insights beyond traditional scales, giving you a comprehensive understanding of your progress and helping you achieve your fitness goals more effectively.

## SNATCHED PHASE 2 MONTH SEVEN TO TWELVE

### *Tone Muscle & Tighten Skin*

In the second six months of your membership, your SNATCHED provider will decide if you will continue your RX of Tirzepatide or if you have reached your ideal weight and can stop the medication. This is the part of your total body transformation where you will begin to TONE MUSCLE & TIGHTEN SKIN. GLP-1 can cause skin laxity and muscle loss, and we plan to tackle that with monthly muscle stimulation treatments and LED light therapy to tighten and tone any loose skin you may have. Our LED light therapy treatment can target both the body and the face.

# SNATCHED RAPID FAT LOSS

## SNATCHED LED Light Therapy

Research shows that the red and near-infrared wavelengths used in SNATCHED LED Light Therapy devices combat the signs of aging. These wavelengths enhance your body's ability to produce collagen and elastin by activating fibroblast cells. Increased fibroblast proliferation is a key benefit of LED red light therapy. Fibroblasts create collagen fibers, which are essential for anti-aging. Healthy collagen levels give us a glowing complexion, firm skin, strong nails, dense bones, and healthy hair. Collagen also keeps muscles, joints, and tendons in good working order. The more collagen our bodies produce, the better we look and feel as we age, delaying tissue and cell degeneration.

How it Works: No prescriptions. No medications. No injections. No surgery. A single treatment lasts about 30 minutes, with most patients experiencing immediate results, leaving their skin glowing. SNATCHED LED Light Therapy is designed to change the way people rejuvenate and recover. No more relying solely on costly medications, risky injections, or invasive surgery.

SNATCHED LED Light Therapy Treatment Advantages:

- Skin rejuvenation and the reduction of wrinkles and fine lines.

# SNATCHED RAPID FAT LOSS

## SNATCHED TONE Muscle Stimulation

SNATCHED TONE utilizes high-intensity magnetic pulse energy and Radio Frequency to simultaneously tone muscles and burn fat. In just one 30-minute session, you'll experience muscle stimulation equivalent to performing over 50,000 crunches! Focused high-intensity magnetic wave energy penetrates several inches of subcutaneous muscle tissue safely and non-invasively. The energy triggers strong muscle contractions, enhancing fat apoptosis (cell death) and muscle fiber movement, which normal exercise cannot achieve. The ATP energy produced by muscle contraction continues to burn fat even while you sleep. The dead fat cells are naturally removed from your body via your lymphatic system.

How it Works: The combined use of radiofrequency (RF) and high-intensity focused electromagnetic (HIFEM) energy is more effective than using them separately. Studies show that heated muscle contractions boost muscle growth and strength. RF helps destroy fat cells, while HIFEM increases fat metabolism. This combination leads to better muscle tone and fat reduction.

### SNATCHED Tone Treatment Advantages:

- Only 30 minutes per session for significant effects, similar to several hours of intense gym exercise.
- Highly effective for shaping the abdominal, legs, arms, & buttocks by building muscle and removing stubborn fat.
- Reduces loose skin and cellulite on targeted areas (stomach, thighs, arms, etc.).
- Permanent fat-burning results, as your body does not replace treated fat cells.
