## Raspberry Comparative Table

| Name                  | Hardiness | Suckering   | Height | Thorns       | Productivity | Appreciation   |
|-----------------------|-----------|-------------|--------|--------------|--------------|--|
| <b>AAC Eden</b>       | good      | strong      | tall   | no thorns    | excellent    | Very large berries, easy pull, excellent for u-pick.           |
| <b>Boyne</b>          | excellent | very strong | tall   | thorny       | excellent    | Sharp flavor berry with good cohesion, excellent for freezing. |
| <b>Double Delight</b> | medium    | excellent   | tall   | few thorns   | fair         | Mostly for western provinces, fall-bearing primocane           |
| <b>Encore</b>         | good      | very strong | medium | few thorns   | excellent    | Above average commercial fruit yields. Tolerance to root rot.  |
| <b>Heritage</b>       | good      | very strong | medium | some thorns  | good         | For a summer crop, prune new cane tops after fall production.  |
| <b>K81-6</b>          | very good | strong      | tall   | soft thorns  | good         | Very large berries, excellent for u-pick.                      |
| <b>Killarney</b>      | excellent | strong      | tall   | thorny       | excellent    | Very popular variety for the fresh market and freezing.        |
| <b>Nova</b>           | excellent | strong      | tall   | small thorns | excellent    | Excellent commercial berry, vigorous and resistant to rust.    |
| <b>Prelude</b>        | good      | strong      | medium | some thorns  | excellent    | Bears some fruit on primo canes in the fall.                   |
| <b>Red River</b>      | medium    | excellent   | short  | few thorns   | good         | Mostly for western provinces, fall-bearing primocane           |
| <b>Royalty</b>        | good      | weak        | tall   | thorny       | good         | Large purple fruit less acidic than Brandywine.                |
