SEBO AIRBELT K2 Kombi and K3 Premium

The two AIRBELT K models are ultra-quiet, lightweight, canister vacuum cleaners featuring three on-board attachments, a 37-foot cleaning radius, rubber-coated wheels to protect floor surfaces, and a durable telescopic tube with quick-release connections. They also have a full bag or clog indicator and a soft-foam bumper to protect the vacuum, furniture, and walls from scuffs and scratches.

The K2 Kombi has a straight-suction combination nozzle, with retractable bristles, for use on hard floors and rugs. However, the K3 Premium model offers the commercial-quality ET-1 power head that cleans both carpets and hard floors, has excellent pet hair removal, provides manual brush roller shutoff, and the extension side of its L-shaped contour makes cleaning under counters easy. A parquet brush for cleaning hard floors with straight suction is also included. And the K3's ergonomically-designed handle, which also includes the suction adjustment switch, provides user comfort and effortless control of the power head's 180° steering ability and super low 3.5-inch horizontal cleaning profile.

Flat-to-the-floor, 3.5-inch Profile – A low, cleaning-head profile makes reaching under furniture and beds easy!

Mid-size Canister Vacuum with Large Filter Bag – The K models are considered mid-size canister vacuums, which mean they are smaller, more compact machines. They have a .8-gallon filter bag and weigh about four pounds less than SEBO's D-model canisters.

Three On-board Tools – The K canisters come with a full-size crevice tool and dusting brush, and a mid-size upholstery nozzle. Also, many optional attachments are available that can be fitted to the telescopic tube or the hose handle.

Three-step, Hospital-grade Filtration – The K machines feature an S-class, pre-motor microfilter, a three-layer AeraPure™ Bag, an exhaust filter, and a tightly-sealed casing, which prevents dirty air from escaping through its seams.

Long, 25-foot Power Cord and 37-foot Operating Range – Its cleaning radius saves time because it can clean large areas without changing electrical outlets. Plus, the seven-foot suction hose provides superb user maneuverability.

Convenient Parking and Storage Aids – After the work is done, the suction hose and telescopic tube, with parquet brush or combination nozzle, can be firmly stored on the canister's underside or backside housing.

Tug and Retract Cord Rewinder – The K models offer a "tug and retract" cord rewriter, instead of a control-switch rewriter, which is the type offered on the AIRBELT D and E models.

Full Bag or Clog Light – When a full bag, a clog in the airflow pathway, or an excessively dirty microfilter is detected, an orange warning light located on the canister body illuminates and an airflow bypass valve opens. This feature prevents overheating and motor damage from a lack of adequate airflow.

Protective, Rubber-coated Wheels – The superb castor-wheels glide easily and gently over all floor types, providing exceptional maneuverability and protection of floor surfaces.

Patented AIRBELT Bumper – The soft, textile-covered, foam bumper protects furniture, walls, and the vacuum itself from incurring scratches and scuffs during use. It also diffuses exhaust air, which contributes to its ultra-quiet performance.

AIRBELT K3 Premium

Durable Power Head with Manual Height Adjustment, Amazing Steering Ability, and Manual Brush Roller Shut Off – The K3 model comes standard with the commercial-grade ET-1 power head, which effectively cleans both carpets and hard floors, and easily removes pet hair. It is 12 inches wide and offers four-level, manual brush height adjustment. To clean delicate rugs and hard floors with straight suction, the brush roller can be manually switched off. And its 180° steering ability provides amazing maneuverability.

Easy Brush Roller Removal, User Warning Lights, and Automatic Obstruction Shut Off – The ET-1 power head has easy, tool-free brush roller removal, a handy clog removal door, and a red warning light, with automatic shut off, for brush roller obstructions. Also, its warning light remains illuminated during use, when brush height is set too high for optimal cleaning, or when the brush roller should be replaced due to reaching maximum bristle wear.

Suction Adjustment Switch on Handle – The vacuum's suction power can be adjusted from 0 to 1,250 watts by a slider switch located on the handle, providing convenient suction control for normal to more delicate cleaning tasks.

AIRBELT K2 Kombi

The K2 Kombi is a straight-suction vacuum. Thus, it differs from the K3 Premium as follows:

Kombi Nozzle, but No Power Head – The K2 Kombi has a telescopic tube and suction hose without an integrated power cord, so it does not accommodate an electric power head. The K2 Kombi comes with only a combination nozzle, with retractable bristles, to clean hard floors and rugs.

Suction Adjustment Switch on Canister Body – Because the K2 Kombi has a hose and telescopic tube without a power cord, the suction adjustment switch is located on the canister body, not the handle.

STANDARD FEATURES OF SEBO VACUUM CLEANERS

Designed and Manufactured in Germany – Legendary quality, reliability and performance make SEBO vacuums the first choice of cleaning professionals throughout the world.

World's Best Pet Vacuums – Because of superior power head and brush-roller technology, SEBO vacuums are the world's best for pet hair removal!

Excellent for Users With Allergies or Asthma – The British Allergy Foundation recommends SEBO filters.

Reliable, Commercial-grade Components – All SEBO vacuums are constructed with thick, reinforced, ABS plastic, aluminum and metal parts, steel axles and bearings, and high-end, quality motors. Therefore, SEBO users own reliable, long-lasting vacuum cleaners. Competing vacuums are made with thin, flimsy, inexpensive, plastic materials, none of which are reinforced, and typically have useful lifespans of one or two years.

Rubber Wheels and Soft Bumpers Protect Homes – Smooth-gliding, rubber wheels protect hard floors and provide exceptional maneuverability. In addition, the bumpers that surround the power heads and the soft AIRBELT bumpers that surround SEBO's canisters protect furniture, walls, and vacuum housings from incurring scuffs and scratches during use.

Advanced, Brush-roller Technology – SEBO's brush rollers are uniquely designed to funnel hair and debris into the power head's airflow channel, which improves vacuum cleaning performance on all flooring surfaces.

Bagged vs. Bagless . . . Bags are Better! – Top-fill, three-layer AeraPure™ Bags are an integral part of SEBO's filtration system because they hold virtually all the dirt captured by the vacuum, which improves the effectiveness and useful life of the microfilters. They also ensure continuously strong suction because dirt enters from the top, deposits at the bottom, accumulates upward, and air exits through the sides, which allows unimpeded airflow as they fill to capacity. And they can be tightly sealed with a hygiene cap when full, so no dust can escape into the air during bag removal and disposal.

In contrast, without bags to hold nearly all the captured dirt, the microfilters on bagless vacuums quickly clog from excessive dirt build-up and must be replaced often, or a loss of suction and cleaning effectiveness will occur. In addition, dust and other allergens become airborne when emptying bagless dirt containers. Lastly, bagless vacuum microfilters are expensive, usually costing more than a multi-year supply of SEBO filter bags.

Changing Bags is Easy and Clean – SEBO filter bags can be changed in just a few seconds, and a hygiene cap keeps dust sealed inside during removal and disposal.

Save Money! SEBO Vacuums Last for Years and Extend Carpet Life! – If properly maintained, SEBO vacuums save ordinary, residential users hundreds of dollars, by providing excellent performance for ten to fifteen years or more, and their deep-cleaning, power-brush technology extends the life of carpets. Typical vacuums perform poorly, even when new, and usually do not last beyond two years. So six or seven "disposable vacuums" must be purchased during the average life expectancy of just one SEBO machine.

Incredible Warranty Coverage – All SEBO models include a FREE seven-year warranty on the motor and five-years on non-wear parts and labor charges.
