To whom it may concern,

Ref.: Phillip Construction and Fencing LLC

Owner and CEO: Jeremy Bischoff

In 2020, I contacted Phillip Construction as I was in need of a 30 foot by 30 foot pole building style shop.

Jeremy quickly responded and provided me with an all-inclusive scope of work. I was a little apprehensive as he informed me he did all the work himself and only was assisted if the schedule was too tight for him to manage by himself. After picking colors, overhead door, windows and man door he promptly worked on getting permits in order. We set a deadline schedule to accomplish the project.

It appeared that the project was not proceeding quickly and I made contact with Jeremy. He explained the procedure of obtaining permits, wood, metals etc. and kept me informed as to their progress.

When paperwork was in order, the project seemed to proceed quickly. Site layout was completed, holes were dug and posts set. Cement was used to set the poles and time allowed to set. Wood materials arrived in a timely manner and the framing proceeded very quickly. Framing was inspected and passed without any delays. In talking with the framing inspector, he informed me that he was aware of the quality work Jeremy does on all the buildings he has inspected. Metals and insulation were ordered with a slight delay. Upon their arrival, the building was covered with no issues. Doors and windows were installed. Gravel was spread and concrete floor and entry pad were poured and finished as specified. All was completed within the time frame agreed upon.

Working with Jeremy was performed in a professional manner with few problems and as specified in the contract. His price was very fair and reasonable. He went out of his way to make the project an enjoyable experience. I highly recommend Phillip Construction to you as a reliable and competent source for you to consider on your projects.

Sincerely,

Steve Carter

P.S. My building is available for your inspection by appointment. Call to schedule (208) 818-5970
