Framing Brochure

Vestra Oak
experienced in
creating the finest
oak frames

At the root of any
beautiful building, there lies a commitment to quality.
Materials sourced with care, design considered with time
and **craftsmanship delivered with pride**. At Vestra Oak,
quality is ingrained in everything we do from the ground up,
delivering **exceptional solutions for exceptional oak structures**.

a construction method as old as oak itself

Timber framing is a centuries-old construction method that has been refined into its own art form over time. Vestra Oak is proud to preserve ancient techniques whilst using cutting-edge technology to produce beautiful oak framed structures.

||/

Oak has been used in construction for thousands of years, and our team uphold the legacy of timeless timber techniques to create the finest structures.

Today, the longevity and strength of timber framing can still be seen worldwide, from The Shambles in York to the Stave churches of Scandinavia. The Vestra Oak team are inspired by the history of timber and integrate the refined practices into our artistry to supply timber frames defined by performance and strengthened by time-hallowed traditions.

the roots of a successful project

From exceptional exteriors to breathtaking interiors, Vestra Oak provides quality-driven results with speed, ease and accuracy in mind.

Quick installation

We understand the importance of working to a schedule. Our combination of efficient cutting and finishing through to reliable, on-time deliveries means we can support you with the fastest route to completion.

Easy assembly

From your initial enquiry or plans through to design, processing and delivery, we have extensive knowledge and expertise in managing oak construction projects, giving you total peace of mind.

Accurate construction

Reducing downtime is paramount on any build, and this is why our team takes time and care to ensure every aspect of your project is planned, calculated and delivered to your specification, ensuring a successful installation.

turning your vision into a reality

Using market-leading CAD software, our team can transform your ideas into a stunning oak framed building.

Our design team will turn your vision into an online concept model to ensure you are entirely satisfied with the plans before we progress to construction. We will walk through the manufacturing process with you to ensure seamless production following design completion.

bespoke frames engineered for beauty

Precision engineering and clear plans significantly reduce installation times and the associated cost of the assembly process once the frames reach your site.

Whether you require contemporary oak-framed homes or want a luxurious garden room, our skilful team will accomplish your vision with class and care.

Our design and manufacture package covers every aspect of your project, from conceptual 3D imagery up to delivery of your frame. We have the largest six-axis computer-aided CNC machine for solid timber in the UK and adopt industry developments to keep us at the forefront of European oak production.

Garages

Trusses

Garden Rooms

case study

impressive 7-bay oak garages

The architecture of the 14 luxurious homes at Somerford Square follows the local vernacular, and reflects Cheshire's rich farming heritage.

||/

The brief

An up-market housing developer from Cheshire approached Vestra Oak for their latest project. Their brand-new residential development required luxurious 7-Bay Oak Framed Garages.

The result

Vestra Oak worked closely with the developer and contractors to manufacture a stunning set of garages. The striking quality of the European Oak utilised in both sets of garages were a fitting complement to this project.

case study

sensational oak wedding venue

An unforgettable day made up of beautiful moments. The venue is one of the most important parts of any special day, and a good wedding venue should have a stunning area for the couple and guests to celebrate.

II/

The brief

The team at Chester Zoo were looking for statement oak trusses to frame their stunning new wedding venue, The Square, and solid oak cladding for the exterior to tie in with the neighbouring Listed buildings.

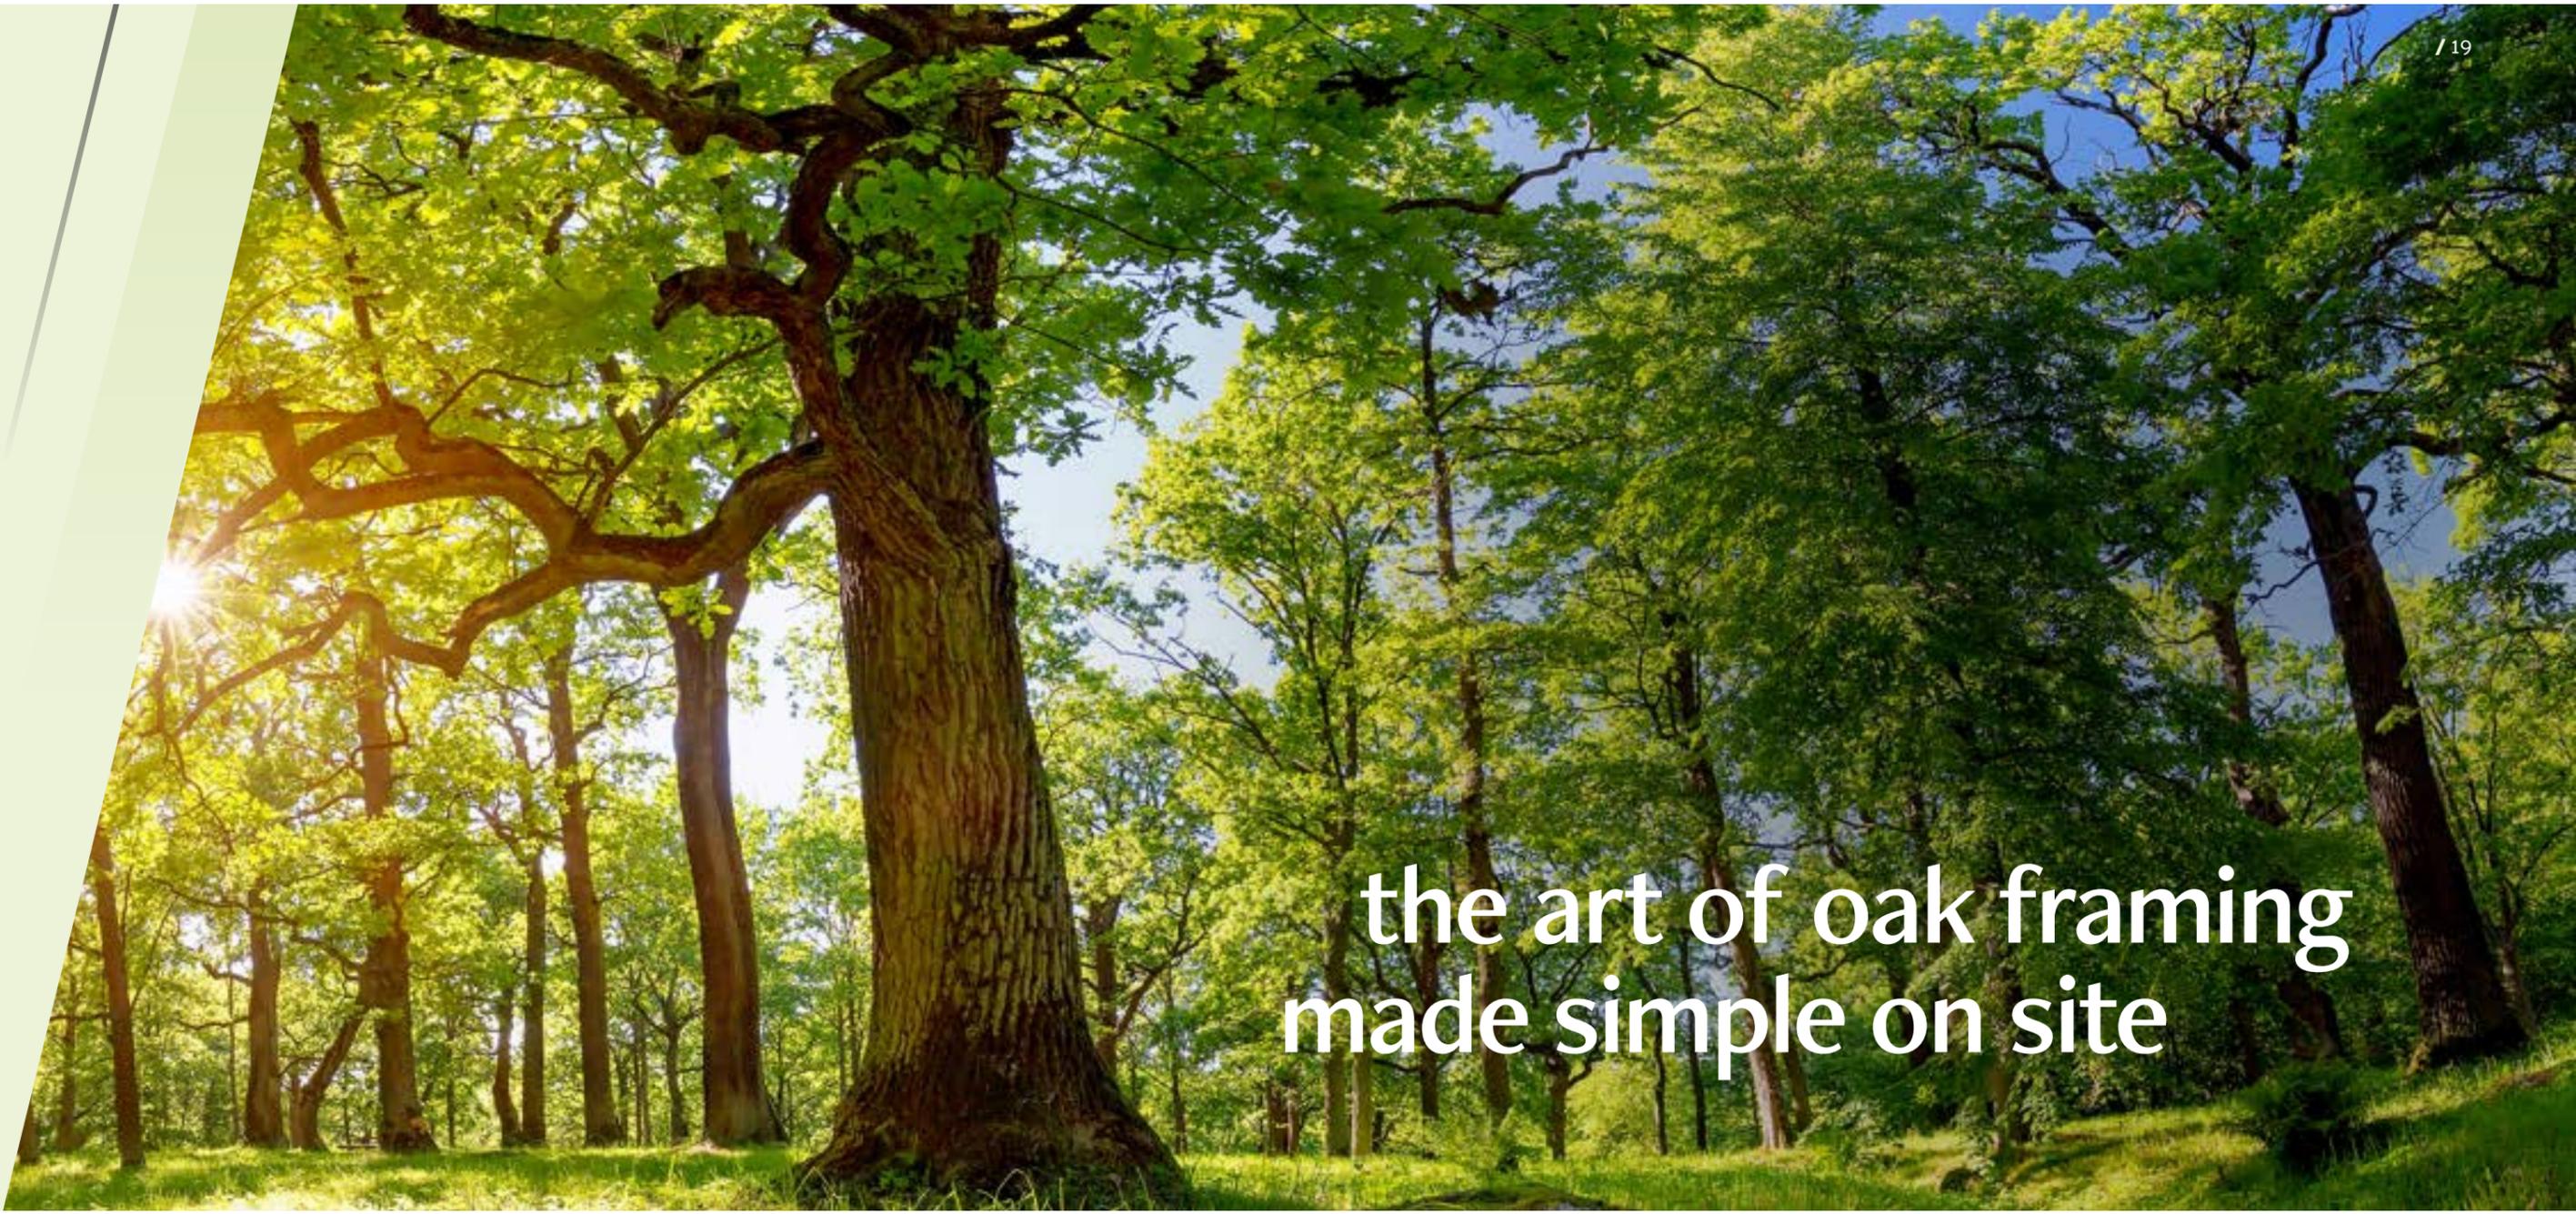

The result

The Square has a stunning modern aesthetic, featuring oak shadowgap cladding on the exterior and grand oak trusses internally. Undoubtedly one of the more luxury places to say 'I Do'!

W/

The mighty oak begins life as a humble acorn; every inspirational project starts with an idea. However, to grow to full strength, you need a partner that cares about your project as much as you. Vestra Oak have the equipment and experience to nurture your projects and help them reach exceptional heights.

Our success relies on supplying our clients with oak frames and oak-framed buildings that benefit them. That's why we remain transparent and approachable at every project stage, from technical drawings to component assembly in-house and on-site. It's also why we won't tolerate a single joint out of place or beam out of line.
