

Take the
whistle &
leave your
phone / smart
devices here

IN CASE OF EMERGENCY, CALL _____

YOU ARE LOCATED AT:

TELL EVERYONE GOING IN THE WATER
YOU ARE THE SMARTER WATER WATCHER®

SHORT
WHISTLE
BLOWS = **Warnings** – Stop and look where
the whistle sound is coming from

LONG
WHISTLE
BLOWS = **DANGER** – Get out of the water
now! Help others get to land.

BEFORE GOING INTO THE WATER

1. CHECK	2. CALL	3. CARE
Check for danger in the water – you need to stay safe, too. It might be best to evacuate all.	Call for help from others, designate someone to contact emergency medical help.	Care for injuries, get help from qualified people. Perform first aid.

Please print, cut-out, and laminate this card and attach to the lanyard. If you can use a luggage-tag lamination pouch, that is ideal.

Remember: This program is not for use in any oceans or large bodies of open water. Do not use a whistle, when there is a lifeguard present. The whistle does not make you a lifeguard. No part of this program implies first aid or life saving training has occurred.
