

As part of [Corteva Agriscience's Emergency Response Plan for Field Operations](#), we'd like to submit maps showing the location of our field operations (detasseling, scouting, etc.,) for 2026.

Field locations are located on the following maps:

- Bennett & New Liberty – Cedar County & Scott County
- Durant/Walcott/Blue Grass – Muscatine County, Cedar County & Scott County
- Durant/Sunbury – Cedar County & Scott County
- Maysville/Eldridge – Scott County
- Stanwood - Cedar County
- Wilton (north of Wilton) – Cedar County

In the event of a worker pesticide exposure, three decontamination tents are ready for use. One Decon Tent is kept at our production facility site (2208 Yankee Avenue, Durant), one is kept at a grower farm location (432 IA-38, Stanwood), and one is kept in a truck that our Field Safety Tech drives daily while auditing field teams across all locations. These decon tents are equipped with a shower system which utilizes a standard Moon/American 1.5NH x GHT hose adaptor for use with standard fire hoses. Our Field Teams conduct Decon Tent setup training annually.

Corteva (Durant) Emergency Contact List:

Job Role / Name	Cell Phone	Work Phone
Plant Location Manager / Amber Hendricks	217-493-0057	1-800-535-8605
