

# Zebra Mussel Tester Eagle Scout Project 2020

Great results on the Zebra Mussel Project! There are no zebra mussels in Spring Lake!

Charlie Malecha, Boy Scouts of America in Troop 331 of Prior Lake, lead a Zebra Mussel Study as an Eagle Scout Project for the Spring Lake Association. He had 15 ladders attached to docks around the lake for the summer. He just pulled them out this past weekend and was happy to see that there were no zebra mussels in Spring Lake!.

We also put a ladder in Prior Lake to see how many zebra mussels would attach to it. As you can see the ladder in Prior Lake was covered in zebra mussels.

Thank you for allowing me to use the various docks around the lake. The ladders will be given to the Spring Lake Association so they can be used next year.
