

# CELEBRATING 70 YEARS

Photo by Matt Batulis

## Zebra Mussels Found in Spring Lake in 2022

Earlier this year, there was of a “single” Zebra Mussel which was attached to a leaf stem during the initial lake survey on April 29. Zebra mussels are an Invasive Aquatic Species (AIS) and distinguished by a small striped, D-shaped shell composed of two hinged valves joined by a ligament. The shells are typically one-quarter inch to one and one-half inches long, depending on age, with alternating yellow and brownish colored stripes. Adults are typically fingernail sized. Zebra mussels attach to hard surfaces underwater.

This Spring, the Spring Lake Association, with the assistance of Charlie Malecha, placed 15 Zebra Mussel Ladders around the lake to determine the degree of infestation. This was the repeat of a similar study that Charlie did back in 2020 which at that time showed no Zebra Mussels present.

Unfortunately, the results now show that the majority of ladders have either a few, moderate or heavy concentrations. The photos above are indicative of what is considered heavy. The attached map shows the locations of the ladders and the degree of infestation present. Based on communication received from April Londo, DNR AIS Specialist, “there is not much management that can be done once zebra mussels start reproducing. One can always track their population. Some populations reach a maximum capacity and will plummet in subsequent years, with ebbs and flows in abundance”.

At this time we would suggest that boats, docks and lifts be monitored and cleaned upon removal. Procedures for cleaning equipment can be found on the DNR Website ( [Clean In Clean Out | Minnesota DNR \(state.mn.us\)](https://www.dnr.state.mn.us/clean/cleanout/) ) Another suggestion is for boats and pontoons which are kept on lifts, their outboards and props be trimmed up to minimize the possibility of zebra mussels sticking to them.

## THANK YOU 2022 SPRING LAKE ASSOCIATION SPONSORS!

### 2022 GOLD SPONSORS

Boat Doctor Marine | Boathouse Brothers Brewing Co. | Carlson & Prior Lake Ace Hardware Stores | Edina Realty - Jim Gilbertson | Great Outdoors Dock & Lift | Minnesota Inboard | Referral Collision Shakopee | RE/MAX Preferred - Lauren Peters | Sailer's Greenhouse | The Buckingham Companies | Viking Liquor Barrel

Advantage Health Center | Canopy Insurance | Complete Family Eyecare | Edwards Jones - Paul Youngs | Knotty Oar Marina | Prior Lake/Savage Rental Centers | Solar Shield

# Update on Spring Lake Regional Park Project

Thank you Spring Lake Association members for your feedback on the new amenities being planned for the lakeshore area of Spring Lake Regional Park during this year's annual meeting. Project design is well underway and construction is planned to begin Spring 2023 - in March or April - with most of the work wrapped up by fall. An open house is being held October 10. Stop by to hear about project updates, ask questions and see a preview of the project elements.

As shared at the annual meeting, the project is planned to include a fishing pier and platforms, an observation deck, canoe/kayak launch, picnic and grilling areas, trails, and parking. If you are unable to attend the open house, you may reach out to Patty Freeman with questions – [pfreeman@co.scott.mn.us](mailto:pfreeman@co.scott.mn.us)

## You are Invited to Open House

Monday, October 10, 2022

5:00 pm - 7:00 pm

Prior Lake Library

# 2022 Eurasian Water Milfoil Update

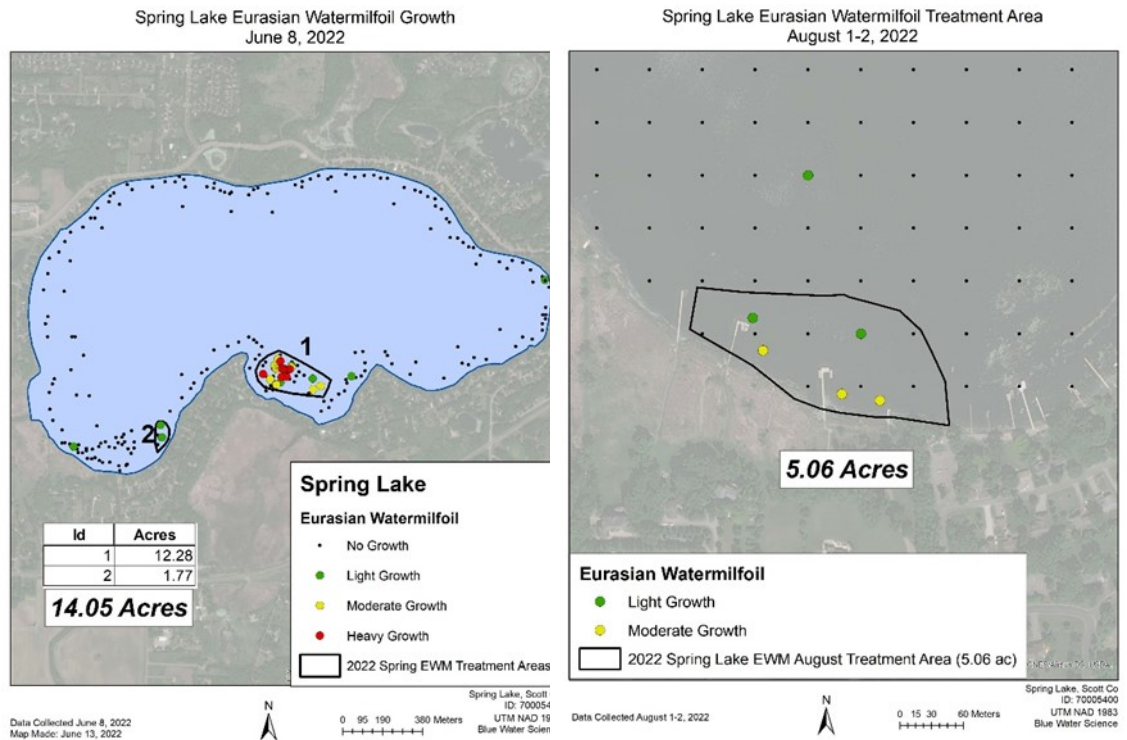

As mentioned during the Annual Meeting, the Spring Lake Association was awarded a \$50,000 Department of Natural Resources (DNR) Grant to cover project costs in 2022 and 2023 for managing the Eurasian Water Milfoil (EWM) that was discovered during the summer of 2021.

To date, the Spring Lake Association and Blue Water Science have conducted three lake surveys resulting in treatments of 14 and 5 acres by Property and Land Management Corporation. Over the growing season of 2022, the two summer treatments have prevented heavy milfoil growth. The cost for the surveys and the treatment have totaled over \$25,000 and will be covered by the DNR Grant.

In working with Steve and Connor McComas from Blue Water Science on the latest survey conducted on September 9, they sampled over 100 sites with a rake sampler. Targeted sampling found EWM at 21 sites in 1 to 3 feet of water at primarily light densities and moderate growth observed in 2 sites.

All of the observed EWM was in shallow water and believed will be impacted by the lake ice over winter. Also, they believe that autumn EWM growth generally does not predict the following summer EWM distribution or abundance. Steve suggested no further treatment this year but rather delineate the EWM next year and treat the moderate to heavy growth areas if found.

The SLA is fortunate to have established a close working relationship with Steve and Blue Water Science as his knowledge and history of Spring Lake is invaluable.

## Spring Lake Ramp Improvement Completed on

The Spring Lake Association was successful in working with the DNR on obtaining the necessary permits to try and improve lake access by knocking down the mound and filling in the hole that had been created by boaters' power loading their boats back onto their trailers.

The final bill for the work completed by Klingberg Excavating and the purchase of a floating silt fence (now owned by the SLA) came to \$3,342. A huge thank you to the City of Prior Lake and the Spring Lake Township which split the cost of the bill as well as the Prior Lake Association in helping us navigate the permitting process. Additional thank you to Matt Batulis who organized the work with Joe Sullivan and Jeff Young from Klingberg Excavating as well as the SLA volunteers who helped install and remove the floating silt barrier. The SLA will continue to work with the DNR on some additional long term ramp improvement ideas.

## SLA 70th Anniversary

### Wine

Spring Lake Association is partnering with our Sponsor **Viking Liquor Barrel** in Prior Lake to feature a Spring Lake Association 70th Anniversary Wine of the Quarter.

**The 4th Quarter 2022 wine is:**

Ely Cabernet - \$16.99

Primarius Pinot Gris - \$13.97

## SLA Highlights Sponsors

During the 3rd and 4th quarter newsletters, SLA will highlight our great sponsors. We hope you will take the time to learn more about our sponsors and what services they provide. And when you frequent their services, please let them know that SLA sent you!

### Referral Collison became a Gold Sponsor this year!!

## Presidents Message From

### Wesley Steffan

#### Summer 2022 Comes to an End!

Once again, the summer is ending and so is the time on the water.

Several things have taken place since our last newsletter and the Spring Lake Association has been involved with several activities but the thing that has driven a lot of attention is low water levels and the impact it has had on boat lifts, docks and the DNR ramp access with ramp improvements made on September 12. Aquatic plant, lake surveys, Eurasian Water Milfoil treatment, Aquatic Plant 101 seminar, Annual Summer Concert, Zebra Mussel quantification and the Fall Pick Your Paddle event have all made for a very busy summer.

Membership continues to be strong as we now have 173 paid 2022 members which includes 18 sponsors. These are both new records for membership and sponsors and a huge thank you to all who are Members, Sponsors and especially, Volunteers, Board Members and subcommittees. These numbers hopefully speak to the engagement of our lake community and involvement. We have a great lake and community.

As we look to close out 2022, we are beginning to develop plans for 2023 and are always looking for ideas and suggestions. Please feel free to contact any one of our board members or send suggestions to [board.sla@gmail.com](mailto:board.sla@gmail.com).

## Spring Lake Aquatic Plants 101

Steve McComas presented a seminar for Spring Lake residents on August 4. The SLA worked with the Prior Lake Spring Lake Watershed District who hosted the event at the City of Prior Lake City hall. The seminar covered topics such as the importance of aquatic plants on lake quality, the types of plants both native and invasive, management of plants and ways to improve lake quality. 25

people were present but another 57 participated in the live event. Since the presentation, another 207 have since visited the facebook video. Discussions also centered around the current treatment of Eurasian Water

Milfoil, Curly Leaf Pondweed and the recent discovery of Zebra Mussels. When asked what could be done to further improve water clarity, he focused on the role that carp play in negatively impacting the lake by releasing additional phosphorous into the water column. Anything that can be done to remove carp will be of benefit to the lake. To see the live presentation, visit our Facebook page for video link.

## Advantage Health Center

Dr. Jeff has been married to his wife Olivia for 15 years. They have four children that keep him and Olivia busy with all the activities associated with soccer and gymnastics. Once a year they take a much-needed family vacation! He enjoys traveling for and training others on the use and capabilities of stem cell machines. He also enjoys archery and is an avid bowhunter.

Dr. Jeff is also an author. In 2016 he wrote a book about chiropractic care sharing stories about his patients and the benefits of chiropractic care. Advantage Health Center has won the Best of the Best Southwest for chiropractic care, voted on by his patients, for the past 3 years.

Advantage Health Center was established by [Dr. Jeff May](#) in February 2008. Think about it: there's really no greater advantage than you can give yourself than getting healthy. We [offer varied solutions](#) to make sure you have access to everything you need in getting healthier. That's exactly the reason behind our practice name. Defined, the word "advantage"

means "a state of circumstance or an opportunity that's favorable for your success."

When applied to your health, that's a pretty powerful concept. No matter where you're at in your health right now, you have the chance to give yourself an advantage.

**Our Mission** | To make Scott County the healthiest in the state. From babies to adults, we welcome everyone in our community to experience our safe, all-natural solutions.

**The Latest and Greatest In Natural Care** | Just because we're a small town doesn't mean you shouldn't have access to leading-edge treatments. We want you to live the healthiest form of yourself, which often can mean you require more than [chiropractic care](#).

That's why Dr. May has added [Softwave Therapy](#) and [Metabolic Reset Weight Loss](#) to the office. You can think of different facets of your health (functioning nervous system, proper exercise, good nutrition, and more) as cogs that turn the wheel of health. They each have to work together to produce the best possible outcomes!

# PRIOR LAKE-SPRING LAKE WATERSHED DISTRICT

## Ten Years on Spring Lake | PLSLWD

Prior Lake Spring Lake Watershed District  
By **Shauna Capron**, *Water Resources Technician*

Spring Lake has experienced a lot of changes over the last decade, the most noticeable is overall improvement of the lake's appearance and water quality.

Back in 2012, the lake was visibly green from an abundance of algae in the water, and it experienced frequent algal blooms. Chlorophyll-a, which is responsible for the green color of the lake during times of high algae content, had a seasonal average of 68.5 µg/L, which is over three times the MPCA-set chlorophyll-a standard (20 µg/L) for Spring Lake! Algal blooms are fueled by excess nutrients in the water, primarily phosphorus. In 2012 the seasonal total phosphorus average measured at 109 µg/L, nearly double the standard (60 µg/L).

With the support of residents and state funding, PLSLWD decided that an alum treatment was needed to turn the lake around. Alum treatments help remove phosphorus from the water column, which reduces algae and helps increase water clarity. Spring Lake has received three alum treatments in the last ten years. While alum can be effective on its own, it is made more effective for a longer period of time when it is paired with additional phosphorus-reduction efforts, such as the removal of common carp.

Around this same time in 2012, common carp were found to be a significant problem in Spring Lake - Carp uproot native aquatic plants and stir up the lake sediment as they feed on the bottom of the lake. The uprooting of aquatic plants increases phosphorus, which fuels algal blooms and decreases the oxygen content in the water. This is harmful to native aquatic plant species and detrimental to water quality.

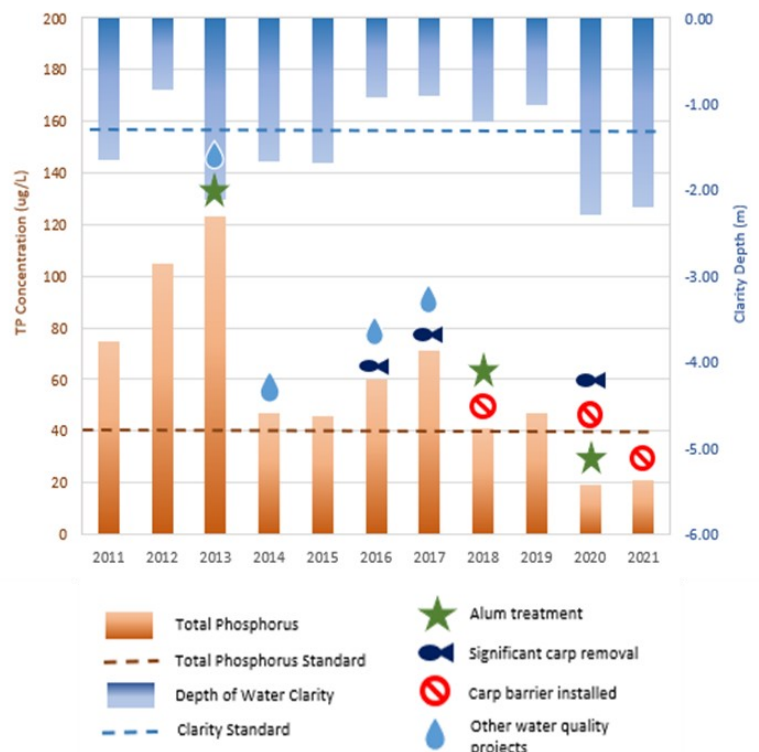

Carp are considered a significant threat to water quality at populations of 100 kg/ha and above. The carp population in Spring Lake has fluctuated over time, but in 2018 it was estimated to be approximately 266 kg/ha. As of mid-2022, that population has been reduced to approximately 227 kg/ha. This reduction was achieved through a holistic approach to carp management, including not just removals of carp directly from the lake itself, but also strategically placing barriers throughout the District to cut carp off from their spawning locations. Carp removal in Spring Lake continues to be a priority for the District heading into 2023.

Spring Lake also benefits from projects located in the area that drains to Spring Lake, referred to as the "upper watershed," such as the District's Ferric Chloride facility. This facility helps to reduce the phosphorus load coming into Spring Lake from external sources, such as roads, development, and croplands, and it also acts as a barrier against spawning carp! As the District continues to make progress on projects in the upper watershed, the levels of phosphorus coming into Spring Lake will continue to decrease over time.

Reducing phosphorus and chlorophyll-a in Spring Lake has improved water clarity, which allows sunlight to reach deeper into the water column and supports more aquatic plants to grow! Although aquatic plants are often seen as a nuisance, they play a critical role in helping maintain good water quality and clarity by absorbing phosphorus, providing food and shelter for fish and wildlife, infusing oxygen into the water, and stabilizing shorelines.

This combination over the years of alum treatments, carp management, upper watershed phosphorus reduction, and increased plant life has led to a substantial increase in Spring Lake's water quality. As can be seen in the figure below, Spring Lake has met phosphorus and water clarity standards for the last two years.

The work on Spring Lake is far from over, but it is encouraging to see that the efforts of the District and SLA have had an impact. PLSLWD staff looks forward to continuing water quality improvement initiatives on Spring Lake in 2023.

The  
**Buckingham**  
COMPANIES

[www.buckinghamcompanies.com](http://www.buckinghamcompanies.com)

The Buckingham Companies  
5980 Credit River Rd SE  
Prior Lake, MN 55372

## Buckingham Companies became a Gold Sponsor this year!!

A reliable service record is what has kept The Buckingham Companies in business and growing in the communities it serves.

Tom Buckingham started his disposal business when he was a senior at Burnsville High School. During the afternoons and on weekends he picked up trash in his hometown, emptying fifty-five gallon burner barrels from customers back yards (as was the custom in those days). He said his father was the person who provided the inspiration and encouragement to build his company to what it is today. Elmer and Rose Buckingham assisted with their son's business into the late 1990's.

Buckingham Disposal provides a variety of services to customers in Savage, Prior Lake, Burnsville, Elko/New Market, rural Shakopee, rural Jordan, and some parts of Lakeville.

Buckingham Trucking, Inc. provides roll-off container box rental. The five trucks that deliver and pick up the roll-off construction boxes are the latest technology, featuring a special system known as "The Hook". This new system allows faster loading and off loading of the boxes than traditional industry systems. Additionally, all drivers are equipped with cell phones for quick dispatch service to customers.

Since adding roll-off box services, Tom has noted that there has been continuous commercial demand for them, but there are also individual residents who rent them when they are doing a clean-up project or remodeling their homes.

Tom Buckingham states, "There have been numerous changes in the solid waste disposal business since I started over 49 years ago. It is an industry that is constantly changing and new plans for disposing of solid waste will affect our customers and us. We are a very service oriented and reliable company. We may sound like a big company because we provide service to a lot of people, but we employ less than 50 employees.

We are a growing company with numerous recycling programs and office space all located at 5980 Credit River Rd SE (county road #21) in Prior Lake, MN. The center offers Buckingham customers some very special incentives. Buckingham customers may obtain a membership card for hard to recycle items. Adding new service areas has enhanced the company's commitment to achieve a fairer system of pricing known as volume based rates, where you only pay for what you throw away.

**Community Action** | Over any given year, Buckingham Companies donates tens of thousands of dollars in cash and services towards charity and community events all around our service area. A few of the events that we contribute to are Prior Lake Fire Department, Ice Golf, Prior Lake Soccer Club, Winterfest, St John's Western Palooza, Music Fest, American Cancer Society Relay for Life, P.L.A.Y Lacrosse Tournament, Dan Patch Days and Lakefront Days, among many others.

**WE LIVE HERE, WE EMPLOY HERE, WE SERVE HERE, WE SUPPORT HERE.**

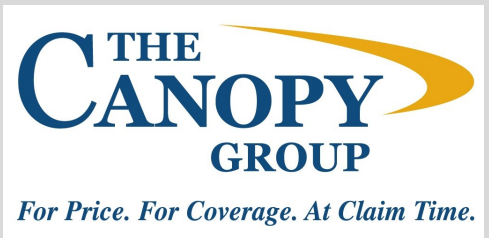

## The Canopy Group became a Silver Sponsor this year!!

**Simply put, we work for you** | At The Canopy Group, we take personal lines insurance very seriously. Today, there are literally hundreds of insurance companies changing their rates on a monthly basis, while using over 300 different factors for determining price. Your home and autos are a very important part of your life. We have 16 partnering companies, which helps us provide you with not only the best coverage, but the best long-term price.

**Consistent analysis and reevaluation is key.** We don't stop once we've found the best insurance program for you. The Canopy Group continues to scan the marketplace to

ensure that the correct companies are aligned with our clients. We conduct annual reviews of our clients' specific needs. On top of that, we're always evaluating our partner lineup to best meet the needs of all our clients. We accomplish this through our price analyzer.

**Our Growth** | Since 2012, our organization has been focused on educating the Minnesota market about the benefits of insurance options. The Canopy Group is continuously reviewing our carrier selection to assure our line up meets the needs of our clients. When their needs change, we have options for them.

**Viking Liquor Barrel has been a Silver sponsor supporting the Spring Lake Association since 2017. In 2022 they became a Gold sponsor!**

John Parish and his wife Wendy have been married for 36 years. They have one son named Ryan.

John has been at the store for 27 years and has owned it for the last 8 years. The store was in existence for many years before I started there. Wendy and Ryan both work with John at the store.

We are invested in this community! John has been a Prior Lake Rotary member for 20 years and am a member of the Prior Lake Chamber of Commerce. Our service, price and selection set us apart from other stores and we want to operate a store that Prior Lake and the surrounding area can be proud of.

## Boat Doctor became a Gold Sponsor this year!!

Who we are... Kevin Vrieze (the Boat Doctor) started in the marine industry in 1995 after graduating from Faribault Technical College in marine repair. Kevin worked at marine dealerships in the twin cities area for a total of 9 years before deciding to start his own marine repair and storage business. Boat Doctor Marine was incorporated in 2004 in Montgomery, MN.

Kevin and Kathie (his wife) thought about how they could expand the business. They agreed that selling new pontoons and deck boats would be a great compliment to Boat Doctor's current services. Kathie started with the company in 2011 after 15 years in corporate America as a sales manager. She loves connecting with customers and the flexibility it provides as a mom to 3 children, Jace, Blayne, and Shaye.

We love traveling together! Our favorite destinations are Fort Myers, Grand Marais camping, and really anywhere that has a beautiful beach and good food. As with most families though, traveling is a bit harder these days with 3 kids in various sporting activities. These are the moments we cherish the most though!

What we do... What started as a small marine business with a 1 acre lot and 4 stall shop has grown into a 20 acre lot with indoor storage, showroom, detailing and staging area, office, and 10 stall shop. We are very grateful for all of our customers, and their loyalty. Our goal is to make boat ownership EASY.

We are a full-service, year-round boat and marine service facility, providing an all-inclusive range of marine services to accommodate Minnesota's various seasons. These include: Professional winterization, shrink-wrapping, winter storage, transportation packages (some customers choose to not own a trailer), engine repairs and maintenance, electrical work, floor repair, gelcoat repair, trailer repair, addition of accessories, etc. We work on inboards, outboards, and stern drives. We sell Sylvan and SunChaser pontoons and tritoons, Starcraft deckboats, and Starweld by Starcraft fishing boats. We love the fact that we can be a customer's one-stop-shop for all of their boating needs from the purchase to service and storage throughout the years. We truly love what we do and the customers and friends we have met along the way are such a bonus.

# **BOAT DOCTOR MARINE**

**Specializing in:**

- ◆ Motor Repairs
- ◆ Winterizing and Storage
- ◆ On-site Repair Service
- ◆ New and Used Sales of Pontoons, Deck Boats and Fishing Boats

## Paul Youngs has been a Silver/Gold Sponsor supporting SLA since 2021.

Paul Young grew up in North Dakota, as the youngest of five children, where he learned small-town values and work ethic. Paul leveraged that spirit into a successful practice with 15 years of industry experience in helping clients reach their goals. Paul is happy to say that his business is more than just a job - it's an opportunity to make a difference in the lives of families and businesses in our community.

**Edward Jones**

**Paul Youngs, CFP®, CRPC®, AAMS®**

Paul wants to understand what's most important to you so that we can use an established process to create a personalized strategy to reach your goals. Paul's branch office administrator, Lynn Gilligan, and Paul want to partner with you throughout your life to help keep you on track. Let us worry about your financial matters so you can be stress-free. We work with individuals, families, successful professionals, business owners and people with complex needs.

Paul graduated from the University of North Dakota with a BS in business and public administration. Paul has continued to learn and grow and have earned the CRPC®, AAMS® and CFP® professional designations.

When not at work, Paul enjoys spending time with his family and a multitude of outdoor activities. Our two children are extremely active in hockey, dance and baseball. These activities keep my wife, Kirsti, and I constantly on the go, and we wouldn't have it any other way!

**Ace Hardware (Carlson Ace / Hardware & Prior Lake Ace Hardware) has been a Gold sponsor supporting the Spring Lake Association since 2021!**

"Al & Michelle Imholte moved into Spring Lake Township, near Spring Lake in 2002, with their daughters - Kathryn, Samantha, & Rachel.

Prior Lake ACE Hardware is the second ACE owned and operated by the Imholte's starting in 2014. Prior Lake ACE Hardware and its employees are passionate about helping the local community with their needs in completing homeowner projects and servicing and selling Small Engines, with a full-time mechanic. Our favorite part of the business is hearing back on how helpful we were in servicing our customers and how satisfied they were to get service with a smile.

We strive to help our community and sponsor the Spring Lake Association as a local community member.

Prior Lake Ace Hardware is Platinum Performance retailer award winner the last 2 years with ACE.

In our spare time, we enjoy pontooning on the local lakes, fishing, hunting, and cruising in the 1963 Ford Galaxie during the summer.

#### **A look at Ace/Carlson Ace Hardware Community Service...**

Memorial Day is a time to honor U.S. Military Personnel who served their country. For the people of Prior Lake, Minnesota, it is also a chance to pay tribute to veterans with a special mural at the local Ace Hardware.

**Ace Hardware co-owners Al Imholte and Michelle Carlson Imholte donated the mural to the community.** A local artist who went to school with Al, Greg Preslicka, was contracted to paint the mural. Al suggested using Aura paint, which was provided for the project by Benjamin Moore. "I thought it'd be something cool for the town. And something neat to bring the community," said Michelle. We hope you enjoy the video "[Flags Flying Honoring Veterans](#)"

# Knotty Oar

M A R I N A

**Knotty Oar has been a sponsor supporting the Spring Lake Association since 2021.**

Knotty Oar Marina is the only full service marina on the water of Minnesota's favorite recreational lake: Prior Lake!

We are centrally located in a protected bay between Upper and Lower Prior Lake. We are a full-service, certified clean marina. Our friendly, highly trained marine store staff and mechanics are ready to serve you. When you visit you'll see that the Knotty Oar Marina was built by Thane Tande to deliver a premiere experience and serve as a landmark gathering spot for the community.

Everything we do is designed around you having a great day on the water! Your safety is a priority. To ensure protection of your watercraft we provide a secure environment including security cameras, donation of slips to the Scott County Sheriff's Water Patrol Unit, and monitor your mooring lines and fenders (bumpers) to optimize the protection of your watercraft. Let our staff take care of the details. We will bilge pump your covers after rain, adjust the height of your lift cover and maintain a clean environment.

We are your authorized [Crest Pontoon](#) and [Mercury Outboard](#) dealership!

The best pontoons with the best power plants - backed by the professionals at Knotty Oar Marina! We also sell Pontoon & Boat trailers from Tebben and Mid-America manufacturing.

### COMMUNITY INVOLVEMENT & RECOGNITION

We proudly support, donate money, donate services and collaborate with these community organizations:

Prior Lake Rotary, Lakefront music fest, St. Jude's Children's Hospital, Chase's Warrior Foundation, Better Business Bureau, JP4 Foundation, St Michael's Catholic Church, & School, Prior Lake Lakers, ROCK, Prior Lake Association, Capable Partners, Bowl Hole, Prior Lake Chamber of Commerce, Clean Up Clean Out, Shockwaves, Scott County Sherriff Office as well as Spring Lake Association.

Knotty Oar Marina was awarded the 2019 Outstanding Sales Performance Award at the Crest Pontoon convention. What an honor!

**DNR CERTIFIED** - Knotty Oar Marina is a State of Minnesota Department of Natural Resources Permitted Lake Service Provider, Certified Clean-In-Clean-Out Marina and Aquatic Invasive Species Certified.

Mercury Marine has presented Knotty Oar Marina, its prestigious Service Customer Satisfaction Index (CSI) Award for 2020.
