

Spring Lake Ridge Development - June 27 Update

Spring Lake Association (SLA) has been informed about a concept plan housing development located on the west side of Spring Lake that has been submitted to the City of Prior Lake. The concept plan does include a proposal for a residential marina located on the property. Currently the board does not have any information regarding details of the plan. We want to stress that this is preliminary information and not many details are known to us about the project. SLA will be working hard over the coming days to gather additional information such as public hearings, dates, information from the city, watershed district and DNR we will share what we know to keep our residents informed. Our goal is to ensure that our residents have accurate information from correct sources and are provided with resources to have their opinions and comments addressed. We will assist with any communication flow and plan to send out an additional communication by middle of next week with more details.
