

Spring Lake Fish Stocking

May 25, 2022

On Wednesday, May 25, Prior Lake Spring Lake Watershed (PLSLWD) staff, 10,000 Lakes Aquaculture Inc. and SLA Volunteers stocked Geis Wetland and Desilt Pond with a total of 3,600 bluegill! These areas, flow into Spring Lake and are common for carp spawning activity, and bluegill eat carp eggs, making this stocking another piece of the carp management puzzle!

Thank you to the Spring Lake Association ([Sla Spring Lake](#)) for contributing to the funding for this stocking event and for offering up a fantastic volunteer (Monica Costello – SLA board member). A little rain won't stop this crew from going after carp!
