Rum

Rum is a distilled alcoholic drink made from sugarcane byproducts, such as molasses, or directly from sugarcane juice, by a process of fermentation and distillation. The distillate, a clear liquid, is then usually aged in oak barrels.

The majority of the world's rum production occurs in the Caribbean and Latin America.

Rhum Agricole

'Rhum agricole' is the French term for cane juice rum, a style of rum originally distilled in the French Caribbean islands from freshly squeezed sugar cane juice rather than molasses. 'Rhum' is the term that typically distinguishes rum made from molasses in French-speaking locales in the West Indies.
