

## **Talking To A Wall**

by Teri Smolens, February 2022

**Hear no evil, see no evil  
It's like talking to a wall  
When the ones you love won't listen  
That's the hardest part of all**

Doesn't matter what you've learned  
Doesn't matter what you know  
They say, "If you care about me  
Then just drop it, let it go"

They don't want to think about it  
Don't believe there's censored news  
Not interested in anything  
Espousing different views

**Hear no evil, see no evil  
It's like talking to a wall  
When the ones you love won't listen  
That's the hardest part of all**

They will hear no evil, see no evil  
I'm talking to a wall  
All I can do is knock on wood  
We just can't save them all

We ask ourselves what will it take  
To have our voices heard  
When they'll hear no evil, see no evil  
Claiming it's absurd

**Hear no evil, see no evil  
It's like talking to a wall  
When the ones you love won't listen  
That's the hardest part of all**

When you can't bring up a topic  
That you've learned is really skewed  
Your intention pure and caring  
Yet they say you're being rude

They say "I don't want to think about it  
I believe I know what's true  
I don't need for you to worry"  
Now what can I do?

**Hear no evil, see no evil  
It's like talking to a wall  
When the ones you love won't listen  
That's the hardest part of all**

## **A Most Cooperative Virus!**

by Teri Smolens, July 2022

Whatever our place on this planet  
We strive for what's most desirous  
Some may bend over backwards to please  
Whether human species or virus

The fact of the matter if you are a virus  
You can't sift yourself out from the air  
But SARS-Cov2 will play right along  
With the silliest efforts out there

**For I'm the most cooperative virus  
The whole wide world around  
Defying the laws of Nature now  
While humans I surround**

Whatever the humans determine will stop me  
I have to obey the idea  
I don't mix with the breath that fogs up their glasses  
Just making that perfectly clear

Displaying compliance I now point out  
Those plastic dividers, three feet by two  
Will keep me from getting anywhere near  
There are huge gaps but I'll never go through

**For I'm the most cooperative virus  
The whole wide world around  
Defying the laws of Nature now  
While humans I surround**

~BREAK~

Indoors where faces are masked to enter  
I'm so well behaved you can bet  
I'll act as if that will stop me though it's like  
Blocking sand with a tennis net

Walking through airports wherever you look  
Human faces are covered, it's eerie  
Unless they're sitting to eat or drink  
Which clearly pokes holes in their theory

**But I'm the most cooperative virus  
The whole wide world around  
Defying the laws of Nature now  
While humans I surround**

[A Most Cooperative Virus, cont'd.]

When the President has a press conference  
He puts on his mask to walk twenty feet  
Then at the podium takes it off you see  
Standing still he thinks a virus can't compete

Though holes in their theory are many  
Like those in their masks, I'll commence  
Ignoring the fact they can't see it's like  
Stopping gnats with a chainlink fence

**But I'm the most cooperative virus**  
**The whole wide world around**  
**Defying the laws of Nature now**  
**While humans I surround**

## **Bald-faced Lies**

by Teri Smolens & Seabury Gould, Sept. 2022

Masks are the new face fashion  
But read what it says on the box!  
It flies in the face of common sense  
To wear one out on your walks  
Bald-faced lies, bald-faced lies

Sillier yet, wearing one in your car  
Why would anyone do it?  
I guess they are scared, taking no chance  
But didn't take time to think through it  
Because of bald-faced lies, bald-faced lies

The clowns who tell us to wear masks  
Those that wanna control and chastise  
Are basing the practice on wishful thinking  
All based on some bald-faced lies  
You gotta know 'em when you hear 'em you guys - bald-faced lies

~Break~

Let's have the courage to show our faces  
Now and forever more  
While out for a walk, in the car alone  
And shopping in every store  
Let's show our faces now and forever more  
And don't fall for any bald-faced lies, bald-faced lies

## **Just Doing My Job**

by Teri Smolens, 2/5/22

I only did what they told me to  
I was only just doing my job  
It wasn't my place to ask questions  
While enforcing the rules on the mob

If someone comes into the place where I work  
With their mask down under their nose  
It's my job as a clerk to say "fix it"  
That's the rule, that's just how it goes

**I was only just doing my job  
Now where have we heard that before?  
Oh yes, from the time of the Nazis  
Working hard in the second world war**

Schools are run by administrators  
Most decisions aren't made by teachers  
They follow the lead of those higher up  
Making kids wear masks on the bleachers

As a nurse it's not my place to question or doubt  
What I'm told to do  
Simply follow the orders from above reassured  
That it's safe as I inject you

**I was only just doing my job  
Now where have we heard that before?  
Oh yes, from the time of the Nazis  
Working hard in the second world war**

-Break-

Doctors know all they need to know  
We're never to doubt what they say  
Except for those with differing views  
No second opinions are valid today

Most doctors and public health officers  
Quote guidelines from the CDC  
Doesn't matter to them that the science is flawed  
If you take a close look it's something you'll see

**I was only just doing my job  
Now where have we heard that before?  
Oh yes, from the time of the Nazis  
Working hard in the second world war**

[Just Doing My Job, cont'd.]

Local governing bodies across the land  
Supervisors, city councils, school boards  
Take cues from above not from citizens now  
Acting like harsh overlords

Politicians have reputations at stake  
Is it us or themselves they're protecting  
With restrictions unending yet they flout the rules  
And act shocked when they hear us objecting

**I was only just doing my job  
Now where have we heard that before?  
Oh yes, from the time of the Nazis  
Working hard in the second world war**

How dare you compare us to Nazis  
Our actions are nothing like theirs  
Just because we are following orders  
While ignoring the numbers on VAERS

We were just following orders  
It's not our fault if some people died  
Who should be held to account  
For damages growing worldwide

**Truth Will Rise**

by Teri Smolens, Feb. 20, 2022

**One day, one day, one day the truth will rise  
They can't cover it up forever no matter how hard they try**

One day, someday, suppression of truth will fail  
Oppressors brought to justice, lock them up without any bail

**One day, one day, one day the truth will rise  
They can't cover it up forever no matter how hard they try**

Not one day, too many days, people can't take any more  
Restricted in voice and movement, based on lies we dare not ignore

**One day, one day, one day the truth will rise  
They can't cover it up forever no matter how hard they try**

One day, one day, the light will break through in a blaze  
Dispersing this cloud of darkness, clearing the world's mental haze

**One day, one day, one day the truth will rise  
They can't cover it up forever no matter how hard they try**

One day, THIS day, watch as the truth breaks through  
Hold onto your hat and that vision, do what you have to do

**One day, one day, one day the truth will rise  
They can't cover it up forever no matter how hard they try  
One day, one day, one day the truth will rise [a cappella]  
They can't cover it up forever no matter how hard they try**

**Just Eight Mice**

*[to the tune of Three Blind Mice]*

by Teri Smolens 12/12/22

Just eight mice, just eight mice  
That's how it's done, that's how it's done  
They cut some corners with no chagrin  
Human trials weren't invested in  
Bivalent boosters were tested in just eight mice

## **I Did It**

by Teri Smolens, March 2022

**I did it, I admit it, I did what they told me to**

**All the guidelines, the restrictions and hoops that I jumped right through**

**But wait a minute, since I did it, I'm feeling just a bit confused**

I got injected then infected, so did my family and friends I hear  
There might be side effects, sure, but we're told that they are really rare  
I might be dizzy, get some shingles, or constant ringing in my ears

I have a friend who keeps on talking all about this thing called VAERS  
Tracking injuries and deaths, more now than all the last 30 years  
Not reassuring when I looked, it startled me to see what's there

I didn't question what they told us daily in the mainstream news  
"Safe and effective," it's protective, don't ask questions just believe it's true  
Myocarditis hitting children, wait..does that sound safe to you?

Swollen hearts are the 'new normal' for young children and for teens  
There are blood clots, heart attacks, brain fog, swelling and more it seems  
Like sudden deaths, dropping dead after getting the covid "vaccines"

-Break-

**I did it, I admit it, I did what they told me to**

**I got my first shot, then the second, then I went for a booster, too**

**But wait a minute, since I did it, I'm feeling just a bit confused.**

-short break-

They told us it would keep us safe and it would stop the spread  
But it does neither and has high risks for adverse effects instead  
Like bruising, joint pain, seizures, and massive pressure in your head

If we don't get whatever boosters the CDC says we need  
Doesn't matter they don't work, we gotta do it and if we don't heed  
Then we're called unvaccinated, lose our job with a family to feed

What's in a document dump resulting from a lawsuit shows  
Nine pages in fine print of side effects that Pfizer knows  
They hid data from their trials that the suit forced them to disclose

**I did it, I regret it, now I'm paralyzed while in my prime**

**This is scary, this is crazy, how can they push this one more time?**

**It seems they know what they are doing and surely know that it's a crime**

**I did it, I admit it, I did what they told me to [fade out]**

**I did it, I regret it, I did what they told me to....**

## **My Precious Baby**

By Teri Smolens, June 2023

I had a baby, a beautiful baby  
My precious baby the joy of my days  
From the day I first felt the flutters inside  
Grew a love I'll hold onto now and always

I carried my baby nine months inside me  
Gave up my coffee, gave up black tea  
I drank no wine-to-keep my body clean  
But to protect my baby I got the vaccine

My OB-GYN said it's what you need  
I believed without question and so I agreed  
Surely she'd know and not lead me wrong  
Then I had my baby before very long

My heart swelled with joy when I saw my baby  
But now my boy has been taken from me  
It was not just my heart but my baby's too  
His swelled and it killed him, pray for him and for me

The gift of new life that grew daily with me  
Who I carried close and now must let go  
My shattered heart may never mend  
If only I'd known I would have said 'no'

Now time has passed and it's shown to be  
Likely connected to that damn vaccine  
Miscarriages. stillborn, preterm, deformities  
Inflamed hearts and strokes are killing babies

Oh why did I do it? Who is to blame?  
Why did I listen to those with degrees?  
Now my tears fall in a torrent of pain  
Losing my baby brought me to my knees

The angels came down, they circled 'round  
In a tunnel of light and love from on high  
Now they have my baby, my beautiful baby  
My precious baby was taken from me

I had a baby, a beautiful baby  
My precious baby the joy of my days  
From the day I first felt the flutters inside  
Grew a love I'll hold onto now and always, now and always

**Wake Up, Everybody!**

[To the tune of 'Wake Up, Darlin' Corey']

by Teri Smolens, July 2022

Wake up, wake up, everybody  
What makes you sleep so sound  
Mass formation hypnosis  
Has the whole wide world spellbound

Get a clue, get a clue, everybody  
Please, please open your eyes  
See what they've been saying  
Is propaganda in disguise

Why would they lie, everybody?  
What have they got to gain?  
Totalitarian power  
World control is the real campaign

Wake up when I snap my fingers  
It's time to come around  
Break out of this global hypnosis  
Spread the whole wide world around

Wake up, wake up, everybody  
It's time to come around

**After It All**

by Teri Smolens, Mar. 25, '22

*[to the tune of 'After The Ball']*

After it all is over, after your friends are gone  
Where are the words "I'm sorry, I snubbed you and that was wrong"  
Many a heart is aching, if you should care to call  
Any old friends that have vanished after it all

After it all is over, after the hype dies down  
Will they admit with sorrow the pain they have spread around  
How will the friends and family, targets of this blackball  
Forgive those that acted so harshly, after it all

-Break-

After it all is over, what will it take to heal  
Fractures in families and friendships resulting from this ordeal  
Will those who shut out and shunned them try a new protocol  
Humbly ask for forgiveness after it all

## **Censored!**

Censorship is wrong, it goes without saying  
They took the words right out of my mouth  
Google, YouTube, Facebook, Twitter, Instagram  
Mainstream media 'round the world, north and south

If the powers that be don't like what you say  
You can bet your bottom dollar you'll be smeared  
They'll claim you've been fact-checked, take your platform away  
So that you and all your posts are disappeared

***What about the Constitution and our freedom of speech?  
What about the first amendment and government overreach?  
Don't say anything that disagrees or this is what we'll hear  
You violated community guidelines\_\_beeeeeep!***

As for the opinions of mere serfs and minions  
What could they possibly know?  
The same goes for the experts not toeing the line  
They'll be the first ones to go

Facts are now false, fear porn rules the day  
Any doctors that dare question are denounced  
Then almighty rulers strip their licenses away  
Now to simply pose a question you'll be trounced

***What about the Constitution, and our freedom of speech?  
What about the first amendment and government overreach?  
Don't say anything that disagrees or this is what we'll hear  
You violated community guidelines\_\_beeeeeep!***

[Short break]

You could be the most published, cited doctor in the world  
An expert with verified information  
But if you say one thing that defies the mainstream tale  
They'll 'Wakefield' you to destroy your reputation

To 'Wakefield' is to besmirch and trash what you've achieved  
By claiming you are guilty of some fraud  
And the science you present will be tossed into the bin  
By the almighty rulers here and abroad

[Censored!, cont'd.]

***What about the Constitution and our freedom of speech  
What about the First Amendment, stop government overreach  
Don't say anything that disagrees or this is what we'll hear  
You violated community guidelines [beeeeeep!]***

In a censorship hearing the Dems tried to censor  
A candidate for President, no less  
Robert, Jr should be banned shrieks the DNC  
To shut him up is what they call progress

Don't give the man a voice, or let him dare defend  
Anything we claim he's said though it's not true  
We play hardball and don't care, how much we twist the truth  
There isn't anything we will not do

***What about the Constitution and our freedom of speech  
What about the First Amendment, and government overreach  
Don't say anything that disagrees or this is what we'll hear  
You violated community guidelines [beeeeeep!]***

Censorship is wrong, it goes without saying....

## **Damn The Rebels**

by Teri Smolens, Sept. 2023

**Damn the rebels, damn the rebels  
Who do they think they are?  
Standing up for rights like it matters  
For humanity near and far**

Watching censored mainstream news  
You'd never know or see 'em  
Millions gathered in protests  
The world is wanting freedom

In Germany, Ireland, Austria, France  
Brazil, Australia, New Zealand  
Mexico, Italy, Belgium, Peru  
China, Greece and Poland

~chorus~

The truckers' freedom convoys  
Their message "stop the mandates"  
In Canada and the U.S.A.  
Stop the tyrannical dictates

When crowds chant rally cries  
Hell no, my body, my choice and  
Cops come in and knock them down  
You no longer have a voice

~chorus

Hold the line and don't back down  
Speak up for your basic rights  
See you at the barricades  
Join the masses in these fights

In days of old there were patriots  
Rebelling to be free  
Today they're scorned, called criminals  
Mocked for standing for liberty

~chorus~

[Damn The Rebels, cont'd.]

Those who stand for nothing fall for anything  
As the saying goes  
To stand for freedom not for force  
Sounds rational I suppose

No more lockdowns, masks, and mandates  
Save democracy not tyrants  
No more squashing peoples' rights  
In the name of so-called science

**Hail the rebels, hail the rebels  
We now see who they are  
They're standing up for rights 'cause it matters  
For humanity near and far  
Hail the rebels, hail the rebels  
We now see who they are  
We're standing up for 'cause it matters  
For humanity near and far**
