

Solace
Advisory Group

Solace Advisory Group is an innovative project management business. We provide end-to-end solutions by leveraging our knowledge and expertise in all stages of construction. Our focus is always client-first, ensuring sustainable and efficient project outcomes.

ABOUT SOLACE ADVISORY GROUP

Leveraging the expertise of our highly experienced team and a collaborative alliance with Arcos Group, we offer clients immediate access to a pool of senior project managers, engineers, contract administrators, and technical specialists. Our professionals have delivered significant national projects across both public and private sectors and are available for both embedded secondments and specialist consultancy services.

We pride ourselves on consistent project delivery, developing our systems by learning from our history. Through the growth of our business expertise, we can provide the best solutions available to all our clients.

Our company is affiliated with the Australian Institute of Project Managers and Engineers Australia, we have RPEQ Qualified Engineers and Geotechnical resources available to provide site investigation, solution design and compliance monitoring. This professional service can ensure that Solace Advisory Group is positioned to provide a solution to any problem in the construction industry. We work closely with all our clients, to ensure they enjoy the process and receive the efficient and practical results needed.

Our values:

- Delivering for our customers
- Provide expert construction solutions
- Solving problems as a team
- Inspire others through innovation and leadership

Why Choose Solace Advisory Group:

- Access to a highly qualified pool of senior project professionals with Tier 1 and government project experience.
- National reach with the flexibility to support both local and remote projects.
- Proven history of collaborating with agencies such as the Port of Brisbane, BHP, Defence, and various local councils.
- ISO-certified management systems across Quality (ISO 9001), Environment (ISO 14001), and Safety (ISO 45001).
- Immediate availability of personnel across project management, engineering, contract administration, and specialist advisory services.

WHAT WE OFFER

CORE CAPABILITIES

- Project and Program Management
- Contract and Commercial Management
- Procurement & Supply Chain Advisory
- Stakeholder Engagement & Government Liaison
- Infrastructure & Asset Management Advisory
- Supporting government agencies and private clients in asset lifecycle planning, maintenance strategies, and capital works programming
- Comprehensive leadership throughout the full project lifecycle, ensuring alignment with client objectives, regulatory compliance, and commercial performance.
- Skilled in contract negotiations, head contract administration, claims management, and commercial risk mitigation across complex, high-value projects
- Specialist design management and constructability reviews across civil, structural, and geotechnical disciplines, supported by RPEQ-certified professionals
- Strategic procurement planning, tender evaluations, and supplier negotiations that optimise project outcomes and minimise commercial risks.
- Deep understanding of regulatory frameworks and local government processes to facilitate approvals, community consultation, and stakeholder management.

TECHNICAL CAPABILITIES

- Design and Technical Advisory
- Environmental & Remediation Advisory
- Ground Improvement & Geotechnical Solutions
- Specialist design management and constructability reviews across civil, structural, and geotechnical disciplines, supported by RPEQ-certified professionals.
- Expertise in large-scale contaminated land management, environmental remediation programs, and stakeholder engagement on sensitive environmental projects.
- Proven experience advising on complex ground improvement methods including wick drains, surcharge loading, vacuum consolidation, and Controlled Modulus Column (CMC) installations.

PROJECT EXPERIENCE: Our team members have been instrumental in delivering the following projects and programs, demonstrating the breadth of expertise available through Solace Advisory Group

Environmental & Remediation

- Site-based leadership on large-scale remediation projects for major mining clients, including works at Nelson Point and Oakey Air Base.
- Management of Defence infrastructure remediation programs, including complex environmental compliance under Federal Government frameworks.

Building and Commercial Developments

- Construction management roles across high-profile healthcare facilities, retail developments, and multi-residential luxury projects including Oasis Bokarina and Bella Nové Albany Creek.
- Advisory and delivery support for industrial and warehouse developments across Southeast Queensland.
- Successful delivery of small to large scale industrial warehouses, petrol stations and purpose-built facilities ranging from Yatala Empire Estate to Ipswich wider suburbs.

Infrastructure & Land Development

- Project management support to the Port of Brisbane for land development programs, including ground improvement projects utilising wick drains and vacuum consolidation systems.
- Delivery of large-scale master-planned communities including the Aura Development and various residential subdivision projects across Queensland and NSW.
- Road and streetscape upgrade programs for local councils including Waverley Council and the City of Karratha.

Council & Government Engagement (via Arcos Group Collaboration)

- Specialist civil, structural, and geotechnical services supporting projects for Brisbane City Council, Sunshine Coast Council, and Gold Coast City Council.
- Design and delivery management for community infrastructure including Palmview Primary School, multiple aged care developments, and regional road infrastructure upgrades.
- Successful refurbishment projects completed for universities QLD wide.

Transport & Civil Infrastructure

- Involvement in significant transport infrastructure programs including the WestConnex New M5 Tunnel, Tonkin Highway Upgrade, and the Metronet Thornlie-Cockburn Rail Link.
- Project leadership on airport precinct upgrades and city entry statements for regional governments.

National Reach & Remote Project Capability

- Our professionals have extensive experience delivering projects in both metropolitan and remote locations, from Port Hedland and the Northern Territory to regional Queensland and Victoria. We maintain strong remote delivery capabilities, backed by robust digital collaboration platforms and agile deployment of on-site resources.

WHERE WE ARE

We are a trusted organisation in public and private sectors, with successful project delivery experience across Australia. We challenge conventional approaches through innovative and practical project delivery.

Working in complex projects of any scale, we bring the innovation to provide tailored solutions to meet our clients' needs. Situated in Brisbane and Sunshine Coast, we have local resource for the SEQ area. However, our experience is national – and we are ready to travel anywhere our client needs us.

WE HAVE PROJECT HISTORY ACROSS AUSTRALIA

Dynamic Project Delivery

We tailor our approach to suit client needs and project objectives, ensuring successful outcomes every time. Our agile workforce can quickly adapt to changing situations, providing flexible solutions, and ensuring our client needs are always the focus.

Our Process

We offer end-to-end solutions, streamlining the entire construction process, whether we manage the process on our clients' behalf or self-deliver the milestones. We have the resources, project experience and capabilities to suit any project delivery model.

Sustainable Solutions

Our experience in building robust and sustainable infrastructure sets us apart. Everything in construction needs to consider the environment, longevity and future implications on our community. We promote processes, materials and systems that ensure the best solution for our client and benefits the local community.

Partnering for Success

Our expertise extends from investigation and design to on-site execution. We are committed to fostering long-term partnerships built on mutual trust and quality outcomes. Working with experts across the industry, we can ensure the highest quality construction and professional services.

Our Strategic Partnership – Arcos Group

Solace Advisory Group maintains a strong partnership with our sister company, Arcos Group—an esteemed civil, structural, and geotechnical engineering consultancy. This collaboration enables seamless access to specialist engineering and technical advisory services throughout all stages of project delivery. With over 2,000 projects completed nationally, Arcos Group offers extensive experience in planning, designing, and delivering complex infrastructure and property developments. Their RPEQ-certified engineers regularly support large-scale projects, including urban developments, transport networks, and industrial or environmental remediation works.

Key Arcos Group Capabilities

- Civil, Structural, and Geotechnical Engineering Services
- Design and Constructability Reviews
- Project Feasibility and Master Planning
- Temporary Works Design and Certification
- Infrastructure and Utilities Design
- Superintendency and Construction Supervision
- Specialist Ground Improvement and Geotechnical Solutions
- RPEQ Certification and Third-Party Technical Reviews

Through this collaboration, Solace Advisory Group can offer a true end-to-end solution for our clients—combining leadership in project and commercial management with world-class engineering and technical expertise. Whether advising on early project feasibility or providing design management and engineering support throughout construction, our integrated service offering ensures clients achieve practical, commercially viable, and technically robust outcomes.
