Maryland State Park Policies - Statewide

Note: Use of State Parks regulations may be found [via this link](#).

Alcohol Policy and Frequently Asked Questions

To maintain and ensure a safe, family-oriented outdoor recreation experience for all park guests, the Maryland Park Service regulates the consumption of alcohol in State Parks. This policy has been adopted in the interest of all park patrons to maintain the family atmosphere of State Parks while still allowing for the appropriate consumption of alcoholic beverages under a special permit process.

Electric Bicycle Policy

The operation of electric bicycles is permitted in all State Park areas where motorized vehicles are allowed, e.g. interior public-use roads, parking lots, etc. Except as described below, electric bicycles are prohibited on State Park trails and other areas not designated for motorized vehicles, regardless of trail width or surface (paved, gravel, natural surface).

& Trail Passport

Class 1 (only) electric bicycles are permitted on the Torrey C. Brown Rail Trail and the Western Maryland Rail Trail. On the two permitted rail trails, Class 1 electric bicycles are regulated the same as all other bicycles, and are subject to all applicable bicycle rules and regulations regarding operation and safety equipment.

As per § 11-117.1 of the Transportation Article, Annotated Code of Maryland, a Class 1 electric bicycle is equipped with a motor that provides assistance only when the rider is pedaling and ceases to provide assistance when the bicycle reaches a speed of 20 miles per hour.

Firewood Policy

Due to the potential threat of the Emerald Ash Borer (EAB), and other invasive beetles, the Maryland Department of Natural Resources

has prohibited the importation of personal firewood into all department owned and managed properties. Please do not bring firewood with you when visiting a Department of Natural Resources Property/Park. [Click here for the complete policy.](#)

Generator Policy

The operation of generators is prohibited during the established quiet hours. Managers may make limited exceptions (e.g. medical necessity). At times outside of quiet hours, all aspects of their operation must conform to standards designed to prevent disturbing other visitors and to preserve the peace and tranquility of the park environment.

Generator use at Assateague State Park:

The operation of generators is prohibited during the established quiet hours from 10:00 pm to 7:00 am. At times outside of quiet hours, operation of any loud generator or those operated at a noise level disturbing to other campers are prohibited in the Assateague State Park campground. These generally include conventional or "construction style" generators; please refrain from bringing these generators with you to the park.

Recommended generators include inverter style, built-in, or "quiet/whisper quiet" type units. Campers operating a noisy generator disturbing to other campers will be required to turn them off.

Guidelines for Third Party RV Rental

The Maryland Park Service allows third-party rental units including vans, coaches, caravans, trailers, towables, campers, motor homes, RV, or other recreational vehicles ("third-party

rental units”), which provide Park visitors with the opportunity to camp in our many state park campgrounds. To use a third-party rental unit for your stay at one of our state parks, you must read and agree to the terms and conditions [here](#) for such usage as well as all applicable individual park policies.

Hunting Policies

Visitors should contact the appropriate managing authority for information on public hunting opportunities on state-owned public hunting lands. 📄 [Click here for the complete policy.](#)

📄 Metal Detecting Policy

Relic Collecting, Treasure Hunting, and Use of Metal Detectors

It is the policy of the Maryland Park Service to safeguard the archaeological resources under its care. Digging in search of buried relics or treasures, the removal of any prehistoric or historic artifacts, and the use of metal detectors (with some exceptions) within the boundaries of lands, beaches, or under waters controlled by the Maryland Park Service is strictly prohibited without a permit from the Office of Archaeology, Maryland Historical Trust, Department of Planning. 📄 [Click here for the complete policy.](#)

Operation of Drones

Unmanned aircraft systems, commonly referred to as unmanned aerial vehicles or drones, operated by persons on lands owned and managed by the Department of Natural Resources must be in compliance with all Federal Aviation Administration (FAA) regulations, as well as all State and federal laws, including all Use of State Parks regulations. To ensure compliance with those regulations, and that the operation of the drone does not jeopardize public safety or the protection of park resources, all drone operators must contact the Park Manager prior to flying a drone in a State Park. Drone pilots are responsible for knowing and complying with all FAA regulations.

The applicable Use of State Parks regulations are:

Pets in Park

Maryland State Parks welcome you and your pet to enjoy the great outdoors together! We ask that you please adhere to the following guidelines in order to ensure a safe and enjoyable experience, and to protect park resources, wildlife and other visitors. In order to help keep our parks available to pets, responsible pet ownership is essential. 📄 [Maryland Park Service Pet Policy for all State Parks](#).

Photography/Filming on Park Property

Maryland Park Service-managed facilities may be used for commercial photography and filming purposes if such use does not (1) significantly interfere with public use of the requested facility or land, and (2) damage the natural, cultural, or historical features of the facility or land. Commercial film and photography users with a high impact on park resources must obtain a permit or use agreement through the relevant Park Manager, as well as pay any applicable service charges.

Maryland Park Service permits/use agreements are not required for:

- private, non-commercial filming or photography conducted on park property; or
- low-impact commercial photography and filming. “Low-impact” is defined as filming and photography activities in park areas open to the public, involving five people or fewer, and using minimal equipment that can be carried.
