- c) The Permittee must provide the District with a time-stamped photograph of the face plate of each meter showing its identification number and current reading.
- d) Each meter must be a mechanically driven, digital, totalizing water meter and functioning at all times. The digital totalizer must not be resettable by the Permittee and must be capable of a maximum reading greater than the maximum expected pumpage and rate during the expected lifetime of the meter.

Such

commingling or infiltration is a violation of this Permit and the District's Rules. Permittee shall be responsible for redressing such commingling and/or infiltration to the District's satisfaction.

Periodic Permit Review:

This Permit is subject to periodic review and enforcement by the General Manager or the General Manager's designees to assess and record each well's use, pumpage volume, and compliance for use in future permit renewal assessments and enforcement in accordance with District Rule 3.6(A).

Enforcement and Involuntary Amendment or Revocation:

This Permit is subject to all enforcement remedies available to the District under the laws of the State of Texas and the District Rules, including involuntary amendment or revocation for violation of District Rules, this Permit, Chapter 36 of the Texas Water Code, the District's Enabling Legislation, waste of groundwater, falsifying records or reports, or other actions the Board determines to be detrimental to the groundwater resources in the District.

Change of Well Condition, Operation, or Status:

No person may change the type of use of a registered well; alter the size of a registered well, the well pump, or its production amount or capacity, including the elevation of the pump within the borehole; or plug a registered well without prior District authorization. Any such changes require the Permittee/Well Owner to submit the appropriate form to the District, which shall be processed in accordance District rules 3.2(C) and 3.6(D).

Notification Required Prior Pump Installation:

Permittee or Permittee's pump installer must notify the District either verbally or in writing no less than 24 hours before a pump is installed in the well in accordance with District Rule 4.1(A)(2).

Well Inspections:

Dist. Code § 8871.105, and District Rule 4.5.
- b) Permittee or Permittee's pump-installer shall equip the Well with an inspection port, inspection tube, or some other means that will allow free and clear vertical access to the water table for the purposes of measuring water levels or disinfecting the Well in accordance with District Rule 4.3(C).

- c) Permittee shall provide access to District personnel and their designees to collect groundwater data on a monthly basis, or upon request of the District's General Manager.

Laws, Policies, and Rules in Effect:

The Permittee shall comply with all such laws, policies, and rules now in effect, and as may be amended from time to time in the future.

Sealing, Capping, and Plugging Requirements:

By accepting this Permit, the Permittee acknowledges and agrees that the District may require the sealing, capping, or plugging of the Well for the reasons provided by District Rule 4.4.

Special Permit Conditions

Well Construction:

Prior to producing water from Well No. 1 under this Permit, Permittee must demonstrate to the District that well construction materials and methods used in Well No. 1 prevent commingling of formation waters of substantively different chemical quality, and that Well No. 1 is grouted or otherwise isolated to a depth that will prevent flow of groundwater from overlying aquifers into underlying aquifers, and that Well No. 1 meets all other applicable District Well Construction Standards in accordance with District Rule 4.3.
