Filtration Stages

1. Three Catalytic Surface passes
2. Dual High Strength Magnetic pass
3. KDF Media (eliminates chlorine, partial chloramines, heavy metals)

Benefits of the Whole Home Conditioner

1. Transforms Chlorine into Chloride (which is harmless in water) & Removes partial chloramines (100% can be removed via a secondary -post- filter)
2. Removes toxic heavy metals (Arsenic, Cadmium, Chromium, Lead and Mercury)
3. Greatly reduces hard water scale
4. Uses zero electricity
5. No wasted water/no backwash required (less utility bills compared to other systems)
6. Zero maintenance/No salt/ all filtration
7. Longer life of all water appliances and fixtures (washing machine, dishwashers, faucets, water dispensing refrigerators, water heaters, coffee makers, shower heads, etc.)
8. Uses zero electricity
9. No wasted water/no backwash required (less utility bills compared to other systems)
10. Zero maintenance/No salt/ all filtration
11. Longer life of all water appliances and fixtures (washing machine, dishwashers, faucets, water dispensing refrigerators, water heaters, coffee makers, shower heads, etc.)

HOW IT WORKS

- Uses a complex process to eliminate chlorine, partial chloramines, heavy metals, and bacteria.
 - The system greatly reduces hard water calcium scale from forming and lowers the surface tension in the water
 - This 6 stage process includes a double high strength magnetic pass, 3 chamber catalytic surfaces, and Kinetic Degradation Fluxion (KDF) media for filtration
 - With the water being an "up flow" design, no maintenance, backwash, drain, or electrical is required.
- The Whole Home Conditioner is unique to the industry and patent pending with a service life of 12+ years

Vortex Crystalline Water - Whole Home Internal Distributor

by www.Vortex-CW.com

After independent testing, this catalytic/magnetic process has shown to reduce hard water scale by 93.8% in all plumbing and water using appliances. Hardness is still present in the water and will test hard but in a different state. Crystallization prevents the dissolved calcium from adhering to internal plumbing, appliances and faucets.

Scale Prevention Process

Step #1:

Check Valve starts the formation of calcium crystallization by disrupting the flow.

Step #2:

Catalytic surface #1 increases Calcium crystallization through a catalytic reaction with stainless steel mesh.

Step #3:

Neodymium Rare Earth magnetic pass hold these calcium crystals in a suspended solid form by passing through a strong magnetic field. Suspended solid form will last 24-48 hours.

Step #4:

Catalytic Surface #2 increases even more Calcium crystallization through a different reaction with copper mesh.

Step #5

Neodymium Rare Earth magnetic final pass holds even more Calcium crystals in a suspended solid form. This double pass will prevent even more hard water scale from forming.

Vortex Crystalline Water - Whole Home Post Tank Filter

by www.Vortex-CW.com

Filtration Stages

1. Arsenic Reduction Media
2. Heavy Metal Reduction
3. Chloramine Removal Media
4. Fluoride Removal

- To Place Order -

Contact :

info@vortex-cw.com

Subject :

SQ FT of Home & Zip Code

Benefits of a Customized Post Tank

1. Tailor your filter to YOUR water quality report
2. Comprised of layered multiple media tailored to your water quality report
3. A portion of the media blend will always contain media that will remove arsenic, heavy metals, and fluoride.
4. Uses zero electricity
5. No wasted water/no backwash required (less utility bills compared to other systems)
6. Zero maintenance/No salt/ all filtration
7. NSF certified

HOW IT WORKS

The perfect Post Filter solution to your VORTEX Whole Home

With the water filter being an “up flow” design, no maintenance or backwash, drain, or electrical is required. Enjoy filtered water with zero maintenance for years to come.

We run your water quality report through the EWG data base and tailor your filter to your water quality.

We always strive to use media that will focus on excess heavy metals, chloramines, arsenic, and fluoride.

If necessary we will also add media to best suit your situation.

Gives you peace of mind knowing you have gone above and beyond for your health - let the data dictate your solutions - no guessing games, false promises, or up-charges on equipment you don't need.

Vortex Crystalline “Post Tank” Water Filter Price List - by www.Vortex-CW.com

(ARSENIC, HEAVY METAL, CHLORAMINE, FLUORIDE, + CUSTOM)

Model #	Flow Rate	# In Home	Tank Size	Gallon Capacity	Price
PT-8	8 GPM	1-3 people	8 x 44”	350,000 gallons	\$2,250.00
PT-9	9-10 GPM	2-4 people	9 x 48”	450,000 gallons	\$2,500.00
PT-10	11-12 GPM	3-5 people	10 x 54”	550,000 gallons	\$3,000.00

***Larger sizes quoted upon request**

***Gallon capacity based on municipal water with 0.8 ppm sodium fluoride, 4.0 ppb arsenic and other heavy metal contaminants**

***Tank sizes measured from diameter x height**

ALL SYSTEMS INCLUDE:

- Clack in/out head**
- Bypass**
- Tank connector assembly**
- Welded chrome jacket**

Vortex Crystalline Pre and Post Filter Option Packages - www.Vortex-CW.com

Pre-Filter

Description

Price

1. 4 x 20" with 1-1.5" in/out ports pre 5 micron sediment filter with bracket, wrench and mounting bolts.

\$275.00

Post Filters

1. 4 x 20" housing with 1-1.5" in/out ports Enhanced Carbon with bracket, wrench and mounting bolts.

\$305.00

2. 4 x 20" housing with 1-1.5" in/out ports Arsenic Removal Resin and Fluoride Removal Media with bracket, wrench and mounting bolts.

\$375.00

NOTE: Dual post filters will include double bracket and assembly. Photo below.

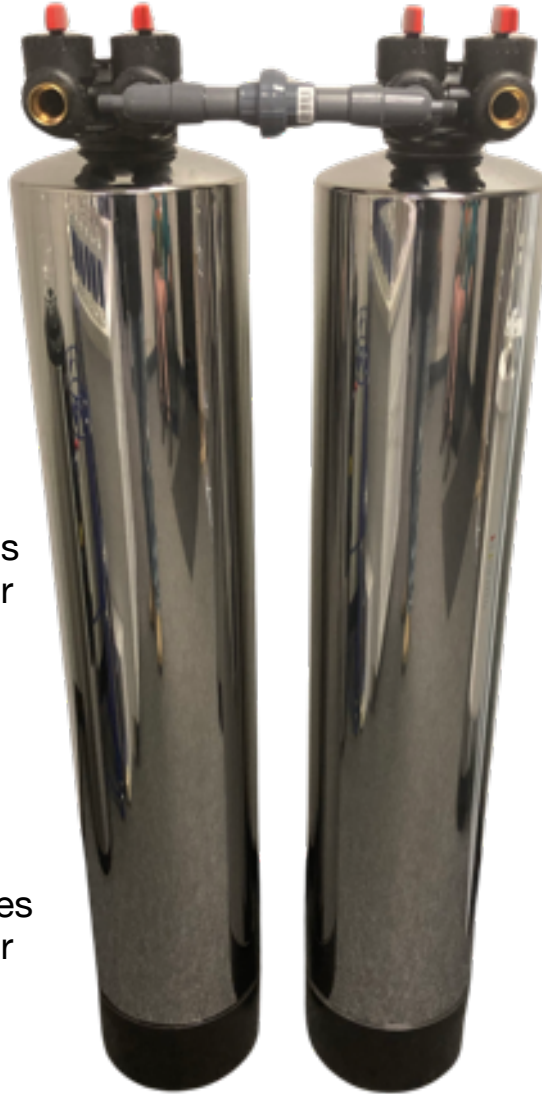

Vortex Crystalline Water - Whole Home Dual Tank

Whole Home Complete Solution - by www.Vortex-CW.com

Benefits of the Whole Home Conditioner

- 1.** Transforms Chlorine into Chloride (which is harmless in water) & Removes partial chloramines (100% can be removed via a secondary -post- filter)
- 2.** Removes toxic heavy metals (Arsenic, Cadmium, Chromium, Lead and Mercury)
- 3.** Greatly reduces hard water scale
- 4.** Uses zero electricity
- 5.** No wasted water/no backwash required (less utility bills compared to other systems)
- 6.** Zero maintenance/No salt/ all filtration
- 7.** Longer life of all water appliances and fixtures (washing machine, dishwashers, faucets, water dispensing refrigerators, water heaters, coffee makers, shower heads, etc.)
- 8.** Uses zero electricity
- 9.** No wasted water/no backwash required (less utility bills compared to other systems)
- 10.** Zero maintenance/No salt/ all filtration
- 11.** Longer life of all water appliances and fixtures (washing machine, dishwashers, faucets, water dispensing refrigerators, water heaters, coffee makers, shower heads, etc.)

**Get the best of BOTH!
our COMPLETE Solution!**

Benefits of a Customized Post Tank

- 1.** Tailor your filter to YOUR water quality report
- 2.** Comprised of layered multiple media tailored to your water quality report
- 3.** A portion of the media blend will always contain media that will remove arsenic, heavy metals, and fluoride.
- 4.** Uses zero electricity
- 5.** No wasted water/no backwash required (less utility bills compared to other systems)
- 6.** Zero maintenance/No salt/ all filtration
- 7.** NSF certified
