

Vortex Crystalline Water

VC-RO (VC - Reverse Osmosis) Info & Pricing

Committed to the health & well being of our friends, family, community, and greater outreaches of the world.

We put quality and transparency above everything to deliver water in its perfect form.

Vortex Crystalline Water presents a 11-step process to achieve structured water of the highest purity.

Utilizing Pre-Filtration, Reverse Osmosis, Deionization (ion-exchange), Structuring, & Post-Filtration, there is not a contaminant left unturned.

VC-Water is free of all contaminants including acids, pharmaceuticals, heavy metals, disinfection by-products, chemicals, fluoride, and many other compounds.

It's then purposefully restructured and stripped of negative memory. This is achieved through vortexing, magnetic energy and select quality super crystals for dynamic healing and energetic structuring.
