Does your business have Packaged Terminal AC and heater units?

intelliPTAC optimizes your Packaged Terminal Air Conditioners (PTAC) and Packaged Terminal Heat Pumps (PTHP) to run more efficiently and with fewer cycles. The device tracks unutilized energy within the heat exchanger or evaporative coils and expels it through the fan before cycling down. This seemingly small modification to each cycle can result in significant energy and cost savings.

- > Guaranteed to reduce energy costs 10% - 15%
- > Reduces compressor run-time by 10%
- > Installation takes only 30 minutes
- > Extends life of equipment
- > 12-month ROI
- > Reduced CO2 emissions — go green!
- > 3-year warranty
